Fallout Homebrew TTRPG

Game Bible

Every mechanic, item, character rule and open question in the game so far.

Compiled from `Fallout Spreadsheet(4).xlsx` and the designer's brief.
Compiled 8 November 2026. Reflects the sheet as of that date.
Updated 12 November 2026. Changes sit in the chapters they affect, on lettered pages such as 22a.

Part I. Foundations

What the game is, how to read this book, and the whole game at a glance.

1. Premise and Mindset

This is a homebrew tabletop role-playing game set in the Fallout universe. It is played at a real table with real dice, led by one Dungeon Master (DM). A party of survivors walks the wasteland, runs into trouble, talks or sneaks or shoots its way through it, then patches up, loots and moves on. Most of its ideas come from the classic Fallout and New Vegas games: S.P.E.C.I.A.L., skills, Action Points, Damage Threshold and tiered gear.

The core idea

The table keeps the drama. The bookkeeping should stay out of its way. Rolling dice, choosing what to do and making rulings belong to the people at the table. Anything with a single correct answer, such as a hit chance, a damage total or an encumbrance tier, is arithmetic. The spreadsheet handles that today, and a companion app is planned to take it over.

Mindset for the DM

- **Do not tee, do not railroad.** Describe the situation without fishing for one specific check ("teeing") and without telling players they cannot try something ("railroading"). The sheet states the principle directly: every check does something.
- **State the difficulty after the check is requested and before the die is rolled.** The player commits, the DM says how hard it is, and then the dice decide.
- **Mark success or failure before calculating the result.** The roll comes first and the math follows. This keeps the moment at the table.
- **Re-state the world often.** The loop keeps asking the DM to re-confirm exact enemy counts, ranges and loadouts: at the alert, after out-of-combat checks, and after every round.
- **Make rulings freely.** The DM rules mid-session, and any number can be overridden. The rules support the table and do not replace it.

Mindset for the players

- **Characters are flawed on purpose.** Every character carries three traits with real drawbacks, and one of the three is rolled at random. Many are jokes with teeth. Weak spots are part of the fun.
- **Losing is not the end.** Player characters generally do not die. They go down (DBNO), and a lost fight costs story and materials rather than the campaign. See Chapter 18.
- **Commit openly.** A player submits AP tokens to confirm an action, and hands them in before the roll.
- **Combat is not the only answer.** Out-of-combat checks can reshape a fight before it starts, for example by cutting the lights or talking down a guard. Peaceful solutions can be rewarded through perks and XP.

Tone

The writing is irreverent, crude and full of in-jokes, and many traits and items are parodies. The catalogues in this book transcribe the sheet's wording as written, including its spelling and its jokes, so the sheet stays recognisable and nothing is lost.

2. How to Read This Book

Where every rule comes from

Rules come from two sources, and this book says which one it is using whenever it matters:

- **The workbook:** `Fallout Spreadsheet(4).xlsx`. Rules text, roughly 20,000 formulas and all item data. Formula references such as `Combat Sheet!M9` are given so you can check them.
- **The designer's brief:** the written premise supplied with this request. It states current intent on the attack-roll order, skill checks, DBNO and defeat. Where the brief is more recent than the sheet, the brief's version is shown as the intended rule and the difference is flagged.

> **UNSURE US-01** The brief names the file `Fallout_Spreadsheet.xlsx`, but the only workbook in the folder is `Fallout Spreadsheet(4).xlsx`. This book assumes they are the same file.

Flags: what is not settled

Anything unfinished, unexplained or uncertain gets a numbered coloured box at the point where it comes up. Every box is also collected in the Open Items Register in Part IX, with a page link. There are five kinds:

Flag	Means
UNFINISHED	The sheet leaves this blank, or marks it as still in progress.
UNEXPLAINED	A value or name exists, but nothing says what it does.
UNSURE	My best reading of the rules. It needs the designer's confirmation.
CONFLICT	Two sources disagree. Both versions are shown.
BUG	A spreadsheet formula or data error.

In catalogue tables, a row shaded like this amber is missing stats. A dash (—) means the cell is blank in the sheet.

Tabs covered and tabs left out

Every tab was read except these. The first three were excluded as obsolete, and the fourth was not opened at all, as instructed:

- `Mobs (OLD)`, `(deprecated)Armor`, `(deprecated) DAMAGE CALCULATOR`: obsolete. Their contents were read while dumping the workbook but are not used in this book.
- `(DO NOT LOOK) FIRST Q`: skipped unread. Nothing here comes from it.

2. How to Read This Book: changes

Changes since the bible was compiled, oldest first. Where this page and page 5 disagree, this page is current.

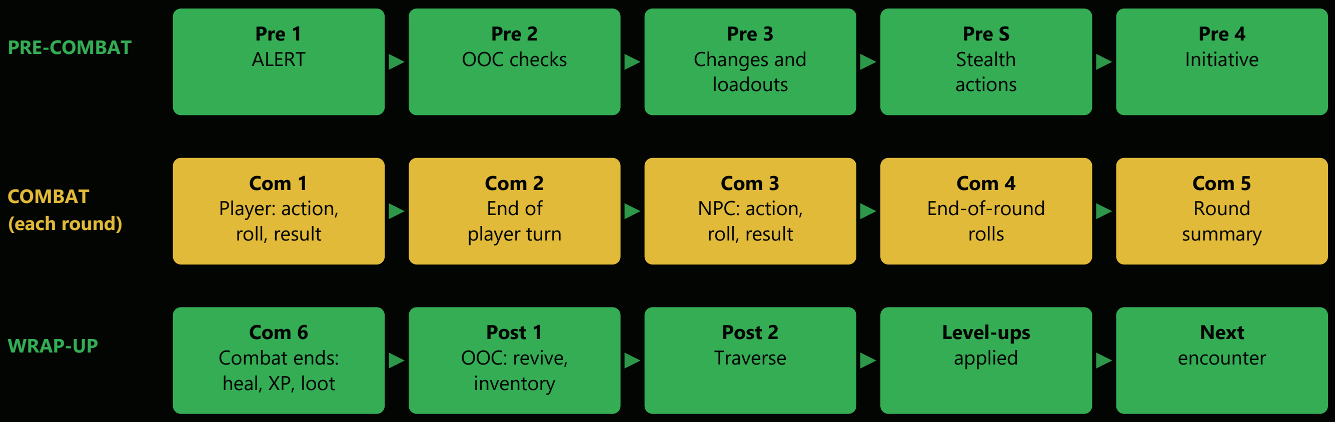
How changes are recorded

CHANGED 9 NOV 2026 Was: a separate Current Rules section at the front of the book. Now: each change sits in the chapter it changes.

- A chapter that changed has lettered pages right after it, such as 15a and 15b. Its first page says UPDATED in the header, and the contents page marks it.
- Each change gives the date it was made and what it replaced. Where a lettered page and the original chapter disagree, the lettered page is current.
- A flag that has been decided reads RESOLVED, in its chapter and in the Open Items Register, with the page that decides it.
- Tables on lettered pages are generated from the app's own data, so they match what the app does.

3. The Whole Game at a Glance

A campaign is a repeating chain of encounters. Each encounter runs through pre-combat, combat and post-combat steps. The labels in the boxes (Pre 1, Com 1 and so on) are the sheet's own step names, explained in full in Part III.



PRE-COMBAT
Pre 1 ALERT
Pre 2 OOC checks
Pre 3 Changes and loadouts
Pre S Stealth actions
Pre 4 Initiative
COMBAT (each round)
Com 1 Player: action, roll, result
Com 2 End of player turn
Com 3 NPC: action, roll, result
Com 4 End-of-round rolls
Com 5 Round summary
WRAP-UP
Com 6 Combat ends: heal, XP, loot
Post 1 OOC: revive, inventory
Post 2 Traverse
Level-ups applied
Next encounter

A session, start to finish

1. **Campaign setup.** Each player builds a character: 40 SPECIAL points, three tagged skills, two chosen traits and one rolled trait, then starting loot from their tags.
2. **Alert.** The DM describes a potentially hostile situation and gives exact numbers and ranges.
3. **Pre-combat.** Each player may attempt one out-of-combat check, which can change the situation. Players submit final loadouts. Anyone may try a stealth action. Everyone rolls initiative.
4. **Combat.** Combatants act in initiative order, spending Action Points on attacks, movement and items. Attacks roll two d10 read as 00-99 against bands for jam, miss, hit, crit and super crit. Damage is run against the target's Damage Threshold.
5. **End of round.** Downed characters roll saving throws and enemies may roll to flee. The DM re-states ranges, statuses and turn order.
6. **End of combat.** Passive healing, XP, loot, addiction rolls and effect timers. If the party lost instead, a Defeat decides what they lose.
7. **Post-combat.** Unlimited out-of-combat checks: revive the fallen, heal, fix gear, sort inventory. Then the party moves on, rests or walks into the next encounter.
8. **Level-up.** Earned XP is banked during combat and applied afterwards: skill points every level, a Level Perk every even level, and Skill Perks as skills cross 60, 80 and 100.

Table kit

From the DM Session Checklist tab.

Item	Used for
2 D-10 Dice	Essential Rolls
D-20 Dice	Essential Rolls
Deck of Cards	Gambling
Items to Represent AP (tokens, chips)	AP for rolls
Player 1 Charachter Sheet	
Player 1 Active Inventory	
Player 2 Charachter Sheet	
Player 2 Active Inventory	
Player 3 Charachter Sheet	
Player 3 Active Inventory	
Player 4 Charachter Sheet	
Player 4 Active Inventory	
Combat Roster Dry Erase Board	
Hex Grid and Figures	

> **UNEXPLAINED UX-01** The checklist includes a **Deck of Cards** for gambling, but no gambling rules exist anywhere in the workbook. Traits such as Gambling Addict and New Vegas Legend depend on them.

> **UNSURE US-02** The checklist calls for AP tokens, and the Gameplay Loop has players hand them in. The brief plans to track AP in the app instead. This book describes the token version because that is what the sheet documents, but the rule is the same either way.

Dice

Dice	Read as	Used for
2d10	00-99 (tens die and ones die). Low is bad, high is good.	Attack rolls and the bullets-hit reading on bursts.
d20	1-20	Skill checks, sneak rolls, initiative, saving throws, loot rolls, addiction (unsure).
Coin	Heads/tails	Split Personalities: which personality makes a check.

Glossary

Term	Meaning
AP	Action Points. A character's budget for one turn.
DT	Damage Threshold. Armour value that the attack's Pen is compared against.
Pen	Penetration. How well an attack gets through DT.
Tag	A chosen skill that gains double from every skill point spent on it. Three per character.
Tier	Quality band for gear and enemies, 1 (junk) to 6 (best). 0 marks natural attacks and 666 marks test or placeholder rows.
R1-R10	Range bands. R1 is point-blank and R10 is about 150m.
OOC / IC	Out of combat and in character. OOC checks happen outside the initiative order. The sheet also uses "IC Skill roll" for skill rolls made during combat.
DBNO	Down But Not Out. A player character at 0 HP. The sheet calls it KO or Knocked Out.
PRI	The sheet's column name for base initiative, (AGL+PER)/2.

Term	Meaning
Mob	Non-human enemy with hand-set stats.
Jam / Crit fail / Fail	The bottom band of an attack roll. The sheet says Fail or Critical Fail and the brief says Jam.
Super / Super crit	The top band of an attack roll.
VATS shot	A targeted shot at a chosen body part.
Count	Bullets in one burst.
Stat Converter	The tab that turns traits, perks, mods and situations into number changes.

Part II. Mechanics

The numbers. Every derived stat, roll and formula, with the sheet references to check them.

4. S.P.E.C.I.A.L.

Seven attributes define a character. Each runs on a nominal 1-10 scale. The sheet floors each effective value at 1 (`Player Sheets!F2:L2`), so penalties can never drop one to zero or below.

Attribute	Latin name (sheet)	Governs, per Gen Info
Strength	Vis	Carry Weight, Melee Weapons, Unarmed
Perception	Sentio	Chance to Hit, Random Encounter, More Visual Info
Endurance	Corpus	Health, Survival Mechanics, Fatigue, Mental Health
Charisma	Venus	Speech, Barter, NPC Amicability, Companions
Intelligence	Intelligentia	XP/Skill Points, Crafting, Int Checks
Agility	Pernicitas	Evade Chance, Action Points,
Luck	Fortuna	Crit Chance/Enemy Crit Chance, Gambling, Luck Checks

What SPECIAL actually drives in the formulas

Attr.	Feeds into
STR	Carry weight; STR requirement penalty on hit chance; skills Melee (primary), Big Guns (secondary).
PER	Hit-chance range penalty; initiative; skills Small Guns, Big Guns, Energy Weapons (primary), Repair (secondary).
END	Max HP; carry weight (one quarter weight); skills Medicine, Survival (primary), Melee (secondary).
CHA	Skills Barter, Speech (primary).
INT	Skill points per level; XP multiplier; skills Explosives, Repair, Science (primary), Barter, Energy Weapons, Lockpick, Medicine (secondary).
AGL	AP (1 per point); initiative; skills Lockpick, Sneak (primary), Explosives, Small Guns (secondary).
LCK	Saving throw; crit and jam size in the sheet's formulas; skills Science, Sneak, Speech, Survival (secondary).

> **UNEXPLAINED UX-02** Gen Info lists effects with no mechanic behind them: Perception "Random Encounter, More Visual Info"; Endurance "Survival Mechanics, Fatigue, Mental Health"; Agility "Evade Chance"; Charisma "Companions"; Luck "Gambling, Luck Checks". No evade or companion system exists in the workbook.

> **UNSURE US-03** No maximum SPECIAL is enforced. The nominal cap of 10 is inferred from the test enemy "(max opp.)" and from level perks that require "9+" and "10+". Traits can push a value above 10.

5. Skills

There are 13 skills. Each starts from SPECIAL, using a heavy primary attribute and a lighter secondary one:

```
Skill = ROUNDDOWN((Primary × 3 + Secondary) ÷ 2) + modifiers + points spent (×2 if tagged)
```

Source: Player Sheets!N2:Z2, N3:Z3.

Skill	Code	Primary ×3	Secondary	Purpose, per Gen Info
Barter	BAR	CHA	INT	Market Interractions, Quest Rewards, Bribe
Energy Weapons	E W	PER	INT	Energy Weapon Skill, Electrical Checks, Factions
Explosives	EXP	INT	AGL	Explosive Weapons, Trap Disarm, Factions
Small Guns	S G	PER	AGL	up to .308 skill, Recognition, Factions
Big Guns	B G	PER	STR	Above .308 and heavy guns, Recognition, Factions
Lockpick	LPK	AGL	INT	Lockpick, Safecracking, Alternate Paths
Medicine	MED	END	INT	Healing, Heal Crafting, Diagnosis
Melee Weapons	M W	STR	END	Melee Skill, Door Destruction, Manual Labor
Repair	REP	INT	PER	Refurbishment, Crafting (Weapons, Ammo), Checks
Science	SCI	INT	LCK	Crafting, Hacking, Checks
Sneak	SNK	AGL	LCK	Encounter Evasion, Pickpocket, Stealth Combat
Speech	SPE	CHA	LCK	Speech Checks, Deception, Leadership
Survival	SUR	END	LCK	Encounter Luck, Field Crafting, Factions

Reading a skill number

- A starting skill is usually between about 5 and 35. All 5s across SPECIAL gives (5×3+5)/2 = 10.
- Perks unlock at **over 60** (Proficiency), **over 80** (Expertise) and **over 100** (Mastery). See Chapter 25.
- Skills can go above 100. A character who does so has "overskill", which changes hit chance. See Chapter 8.
- Weapon skills also feed hit chance. Non-weapon skills feed checks. See Chapters 7 and 8.

> **UNEXPLAINED UX-03** Gen Info gives Small Guns as "up to .308" and Big Guns as "above .308 and heavy guns". The weapon tabs mostly follow this, but Big Guns also holds bows, crossbows and heavy pistols. The rule for which tab a new weapon goes on is not written down.

> **UNEXPLAINED UX-04** Several traits refer to skills that are not on the sheet: **Unarmed** (One Punch Man: "Unarmed 75"), **Shotguns** (Country Boy/Girl: "10+ shotguns") and **Hand** (Urbanite: "10+ Hand"). Unarmed attacks use the Melee Weapons skill in the formulas.

6. Derived Stats

Stat	Formula as the sheet computes it	Cell
Max HP	ROUNDDOWN((15 + END×2 + (Level−1) + HP mods) × HP multiplier)	AI2
Action Points	ROUNDDOWN((5 + AGL + AP mods) × AP multiplier)	AK2
Carry Weight (lb)	(25 + (STR + END÷4) × 25 + carry mods) × carry multiplier	AL2
Initiative base (PRI)	(AGL + PER) ÷ 2 + mods. Not rounded, so .5 is normal.	AM2
Saving Throw	ROUNDDOWN((LCK×0.1 + (Survival÷2)%÷2) × 20) − 1 + mods, with a bug. See Chapter 18.	AN2
Skill points per level	10 + ROUNDDOWN(INT÷2) + mods	AO2
DT	Sum of DT from Head, Armor and the three Accessory slots, + mods. Vanity is excluded.	AJ2
Buy factor	100 ÷ Barter	BN2
Sell factor	Barter ÷ 100	BO2

> **CONFLICT CF-01 AP.** Gen Info says 5 + (AGL÷2). The sheet computes 5 + AGL, and that is what produces every current character's AP. This book treats the formula as correct and the Gen Info text as stale.

> **CONFLICT CF-02 DT slots.** The player formula adds Head, Armor and Accessories 1-3 but not Vanity. The enemy formula (Enemies!AN2) adds Head, Armor and Vanity, and enemies have no accessory slots. If Vanity clothing is worth DT, players lose it and enemies keep it.

> **UNEXPLAINED UX-05** Gen Info keeps an old carry formula beside the new one: "was: 120 LB + (END x 10)". The new one is used. Its printed form, 25 + ((STR+(END/2)/2) * 25), matches the sheet.

Enemy derived stats

Human enemies use nearly the same formulas with no modifiers, plus a tier bonus to HP. Mobs have hand-set HP, DT, AP and initiative.

```
Human HP = 15 + END×2 + (Tier−1)×6
AP = 5 + AGL     Carry and PRI as for players     Skill pts = 10 + ROUNDDOWN(INT÷2)
```

6. Derived Stats: changes

Changes since the bible was compiled, oldest first. Where this page and page 12 disagree, this page is current.

Player and enemy HP

CHANGED 9 NOV 2026 Was: players gained 1 HP a level and enemy humans 6 a tier. Now:

- Players: HP = (15 + END x 2 + (level - 1) x 2) x 1.2, rounded down. A level 1 character with END 5 has 30 HP.
- Enemy humans: HP = 15 + END x 2 + (tier - 1) x 5. Creatures keep their listed HP.

7. Skill Checks

Source: the brief. The workbook has no skill-check tab, only worked mentions of "Science check at 10 difficulty" in the Gameplay Loop.

Roll a d20. The DM names the opposing number: an NPC's skill, or a difficulty set on the spot. The player needs to roll at least:

```
Roll needed = 11 − (Skill − Target) ÷ 5        counting only FULL 5-point differences, in either direction
Natural 1 always fails.   Natural 20 always succeeds.
A SPECIAL point counts as 10 skill points when a check uses SPECIAL directly.
```

Skill	Target	Difference	Full 5s	Roll needed
80	80	+0	+0	**11+**
85	80	+5	+1	**10+**
70	80	-10	-2	**13+**
73	80	-7	-1	**12+**
84	80	+4	+0	**11+**
30	80	-50	-10	**21+** (only a natural 20)
100	20	+80	+16	**-5+** (anything but a natural 1)

A check against a SPECIAL score converts it first. A character with PER 6 rolling against a difficulty of 80 compares 60 with 80, and needs 15+.

DECIDED, SEE 13a

RESOLVED US-04 The formula produces targets of 21+ and of 1 or below at the extremes. This book assumes natural 20 and natural 1 settle those cases, as in the table above. The same reading means the best possible check is 95% and the worst 5%.

DECIDED, SEE 13a

RESOLVED UF-01 No difficulty scale is written down. The Loop's example uses "10 difficulty", but starting skills are around 5-35 and the examples in the brief use 80. A table of what an easy, hard and impossible target looks like is needed for consistent rulings.

UNEXPLAINED UX-06 Some perks express checks as percentages, such as "Speech checks towards lies are +10% easier" and "Lockpick success chance +10%". The d20 formula has no percentage step. The conversion is undefined. The nearest reading is 10 points of skill, which is 2 on the die.

UNEXPLAINED UX-07 Several perks use their own roll formulas: Sicilia Con Furore (Melee÷100), Looksmaxxing (STR+CHA out of 20), Sowwy and Fat Roll (two SPECIAL÷20). These are percentage or roll-under rolls, a different form from the standard check.

What checks can do

Gen Info's skill list shows the intended breadth: locks and safes, hacking, trap disarm, bribes, diagnosis, manual labour, door destruction, faction recognition and more. The Loop allows **one check per player before combat** and **no limit after**. Combat also allows "IC skill rolls" such as retreat or hide.

7. Skill Checks: changes

Changes since the bible was compiled, oldest first. Where this page and page 13 disagree, this page is current.

Difficulty scale

CHANGED 8 NOV 2026 Was: no difficulty scale was written down (UF-01). Now: six named difficulties. Resolves UF-01.

Difficulty	Target
Trivial	10
Easy	25
Average	40
Hard	60
Very hard	80
Extreme	100

Roll a d20 and meet or beat the number needed: 11 - (skill - difficulty) / 5, rounded toward zero. A SPECIAL check counts the stat x 10 as its skill.

Fail and pass ranges

CHANGED 9 NOV 2026 Was: the number needed could fall below 1 or go past 20 (US-04). Now: it stays between 2 and 20, so a natural 1 always fails and a natural 20 always passes. Resolves US-04.

The check panel shows the result as ranges on the d20, for example **fail 1-12 / pass 13-20**. A target nobody can reach reads **fail 1-19 / pass 20**.

Every box that takes a dice roll has a small dice button beside it that rolls for you: a d20 for checks, initiative, stealth, saves and loot, a d100 for addiction.

Passing a check pays XP

CHANGED 10 NOV 2026 Was: the DM typed an XP amount for the players who passed. Now: a pass pays XP by itself, by difficulty.

- XP = the check's target x 0.25, then the INT bonus on top (the same bonus as enemy XP). Trivial 10 pays 2.5, Average 40 pays 10.0, Extreme 100 pays 25.0.
- Revive checks pay nothing. The old box for extra XP to everyone who passed is still there.
- Settings > XP and healing > Skill check XP per point of difficulty.

Every roll has an outcome

CHANGED 12 NOV 2026 Was: a check passed or failed. Now: the d20 lands on one of nine outcomes, scaled to the roll the check needs, and XP follows the outcome.

- With 11 needed: 1 Total Failure, 2-5 Disaster, 6-7 Setback, 8-9 Messy Success, 10 Close Call, 11-13 Success, 14-17 Strong Success, 18-19 Triumph, 20 Perfect. A harder or easier check stretches or squeezes the bands the same way.
- Messy Success (done, with mistakes and complications) and Close Call (done, with one complication) count as done, so a check that needs 11 gets done 65% of the time instead of 50%. Below them it fails: Setback, Disaster, Total Failure.
- XP: the check's XP (difficulty x 0.25, plus the INT bonus) times the outcome: Total Failure x0.1, Disaster x0.25, Setback x0.5, Messy Success x0.75, Close Call x0.9, Success x1, Strong Success x1.25, Triumph x1.5, Perfect x2. A 10 XP check pays 1 on a Total Failure and 20 on a Perfect.
- The skill check shows each person's bands as a strip, marks the roll, and names the outcome. A revive works on Messy Success or better.
- To decide: whether Messy Success and Close Call should count as done (they do now) or fail with a consolation.

Near misses are failures

CHANGED 12 NOV 2026 Was: Messy Success (8-9 with 11 needed) and Close Call (10) counted as done, so a check needing a natural 20 got done 35% of the time. Now: they are failures that still make a little progress, renamed Partial Progress and Near Miss, and a check gets done only at Success or better.

- Partial Progress: it fails, but you get somewhere (a clue, a little ground, a way to try again). Near Miss: it fails by a hair, and you get a little out of it. The DM says what the progress is.
- Their XP is unchanged: x0.75 and x0.9 of the check's XP.
- Done odds are the plain chance again: 50% when 11 is needed, 5% when only a 20 will do. A revive needs Success or better.

8. Hit Chance

Hit chance is recomputed for each attacker, weapon and range. In plain terms:

```
Hit% = Weapon base at this range
     + (Weapon skill − Skill requirement) ÷ 2  %
     − 5% per point of PER below the range number
     − STR penalty, if STR is below the weapon's requirement
     + modifiers (traits, perks, mods, situation, cover)
Maximum 95% (Gen Info). A result of 0% or lower means no roll is possible.
```

Source: Combat Sheet row 24 (slot 1) and row 32 (slot 2), ten cells per range, per combatant.

Each part

Part	Rule	Detail
Weapon base	Read from the weapon's R1-R10 columns.	Can be negative at long range, and is often negative at R1 on rifles. Each weapon has its own curve.
Skill	(Skill − Req) ÷ 2 percent.	10 points over the requirement is +5%. 10 under is −5%. The sheet writes this as two branches that do the same thing.
PER	If PER < range: −(range − PER) × 5%.	PER 6 is unpenalised through R6 and −20% at R10.
STR (guns)	If STR < Req: −(Req − STR) × Req × 1.25%.	The original form is (Req−STR) × 2.5 × (Req÷2) %. The penalty grows with how heavy the weapon is, as well as the shortfall.
STR (melee, thrown)	If STR < Req: −(Req − STR) × Req × 5%.	Written in the formula but never reached. See the bug below.
Modifiers	Player attacker: Total Acc + that range's column. Enemy attacker: the target's Enemy Acc.	All read from Stat Converter.

Worked example

Character 1 (Big Guns 11, PER 6, STR 4) fires a Pipe Shotgun (skill req 10, STR req 6) at R2:

```
Base at R2               +32%
Skill (11−10)÷2          +0.5%
PER 6 ≥ range 2          no penalty
STR (6−4) × (2.5 × 3)    −15%
Hit chance               17.5%     matches the sheet's cached Combat Sheet!J24
```

Melee

A melee attack uses the weapon's Primary Hit% (0.45 on nearly every weapon) plus the skill term. It has no range column, so a melee attack computes the same at any distance. The perk Lunge ("can hit r2 at half accuracy") suggests the intent is that melee only reaches R1.

DECIDED, SEE 154a

> **RESOLVED BG-01 Melee STR penalty never applies** (known). In Combat Sheet!I24, the outer IF returns 0 for melee before the inner melee branch can run. The brief says to apply the penalty. Melee's penalty at 5% × Req per point is much harsher than the gun version. Check this for balance before fixing: a STR 5 character using a STR 8 weapon would lose 120%.

DECIDED, SEE 15a

> **RESOLVED BG-02 Overskill** (known, and broader than described). The term IF(skill>100, skill÷100, 1) is meant to reward high skill, but it does not do so consistently. At **R1 and R6** it multiplies only the PER and STR penalties, making them worse. At the **other eight ranges** the brackets wrap the whole sum, so it multiplies base + skill + penalties: good when the sum is positive, worse when negative. The brief says high skill should not make penalties worse.

DECIDED, SEE 15a

RESOLVED BG-03 95% cap is not applied. No formula in Combat Sheet row 24 or 32 limits the result, so a sum over 100% yields a negative miss threshold. The cap exists only as text in Gen Info and in the brief.

BUG BG-04 Circular cell. Combat Sheet!K6 tests itself: =if(K6>100,"NO ROLL",...). It presumably should test the computed value. The "NO ROLL" state only works by accident of iterative calculation. The intended rule is clear: below 0% hit chance, the shot cannot be attempted.

BUG BG-05 Melee secondary Hit% is ignored. Formula reads Pr. Hit% for both attacks, so the Se. Hit% column does nothing. Current data hides this because the filled values are all 0.45, but 83 rows have it blank.

DECIDED, SEE 154a

RESOLVED CF-03 PER and STR penalties. CS Worksheet's design notes say −10% per PER point and −5% per STR point, and include a step "4. INT (?)". Gen Info says Accuracy is "Base Weapon acc (corresponding skill/2)". The live formula uses 5% for PER, the scaled STR penalty above, no INT, and (skill−req)÷2. This book follows the live formula.

UNFINISHED UF-02 Roadmap note: "Rebalance Chance to Hit with new DC" (assigned to Lead 2, not marked done), alongside "Melee Damage, Pen, Hit". Expect these numbers to change.

UNEXPLAINED UX-08 Enemy attackers only read the player target's **Enemy Acc** column. Player attackers read only their own accuracy. So nothing in the sheet reduces a player's hit chance against a target in cover or darkness, even though the Loop's example says "darkness imparts −10 enemy chance to hit" and enemies can presumably take cover.

8. Hit Chance: changes

Changes since the bible was compiled, oldest first. Where this page and pages 14-15 disagree, this page is current.

Accuracy, overskill and the cap

CHANGED 8 NOV 2026 Was: Perception and Strength penalties in the live formula, an overskill term that misbehaves (BG-02), and no cap (BG-03). Now: Resolves BG-02, BG-03.

- Accuracy is the weapon's base plus the skill. The Perception and Strength penalties are set to 0 for now. The sheet's values (0.05, 0.0125 and 0.05) can be put back in Settings.
- Skill counts for at most 100 in hit chance. Skill above that adds nothing.
- Hit chance never goes past 95%.

Gun bonus, skill and melee base

CHANGED 9 NOV 2026 Was: hit = range value + (skill - requirement) / 200 for everything, with melee at 45%. Now:

- Every gun (Small Guns, Big Guns, Energy) gets +12% to hit at every range. Thrown weapons and melee don't.
- Skill above or below a weapon's requirement counts 1.5x: (skill - requirement) / 2 x 1.5, rounded down, in percent.
- Light melee and fists start at 45%. Heavy two-handed melee (a base cost of 3+ AP, not fists) starts at 35%. Heavy weapons hit harder and pierce more, so with enough skill they pass the light ones.

Cover

CHANGED 8 NOV 2026 Was: a Take Cover action and a Cover status. Now: cover is read from the map for every shot.

The line from shooter to target takes the worst tier it crosses. Something the shooter stands inside doesn't count. Damage changes apply after Damage Threshold.

Tier	Hit chance	Damage
Open	none	none
Concealment	-10%	none
Soft cover	-25%	-10%
Hard cover	-50%	-50%
Impenetrable	-100%	-100%

Layered cover: the first object sets the odds, every object cuts the damage

CHANGED 11 NOV 2026 Was: only the worst cover between shooter and target counted, for both hit and damage. Now: objects count in order along the shot.

- Hit chance: only the first object the shot passes through lowers it, by that object's hit penalty.
- Damage: each object cuts the damage still getting through by its own damage penalty, the first in full, the second at half strength, the third at a quarter, and so on.
- Example: three pieces of hard cover (-50% damage each) let through 50%, then 75% of that, then 87.5% of that: about 33% of the damage, with the hit chance down only 50%.
- Impenetrable cover anywhere in the line stops the shot. Worn concealment and soft cover count for the health they have left. Something the shooter stands inside doesn't count.
- The accuracy ring shows the hit chance, so it drops past the first object only. Settings, Cover tiers: 'Layered cover' switches back to worst-only.

Limbs are easier to hit, the head harder

CHANGED 12 NOV 2026 Was: the part aimed at changed only the damage and the AP. Now: it changes the hit chance too.

- The hit chance is multiplied by the part's number: Body x1, a limb x1.25, the head x0.5. It applies before the 95% cap.
- Example: 60% at the body is 75% at a leg and 30% at the head.

- A chance at 0% or below stays as it is: the multiplier never makes a bad shot better.
- The attack panel's Aim tile shows it under the part's name, and the hit line ends in x Limb 1.25 or x Head 0.5. The accuracy ring uses the part picked.
- Settings, Accuracy: the three multipliers can be changed. All three at 1 is the old rule.

Tier 1 weapons need skill 1

CHANGED 12 NOV 2026 Was: tier 1 weapons asked for their workbook skill (often 10-25), so starting characters were barely over it. Now: every tier 1 weapon asks for 1.

- A starting character with skill 10 to 20 is now 9 to 19 points over, which adds about 7 to 14% to hit with the current skill multiplier.
- It makes the early fights, where the odds were 3 to 30% at range, quicker and less frustrating. Higher tiers are unchanged.
- The workbook's own number is kept. Settings, Attack roll: 'Tier 1 weapons need this much skill'. Blank goes back to the workbook's.

Aiming costs no AP

CHANGED 12 NOV 2026 Was: a limb shot cost 1 more AP and a head shot 2 more. Now: no extra AP; the part only changes the odds (head x0.5, body x1, limbs x1.25) and the damage.

- The attack panel's AP row shows the shot's cost and the three hit multipliers instead of three AP prices.

Tier 1 weapons are easier to hit with

CHANGED 12 NOV 2026 New: +10% hit chance with any tier-1 weapon, shown as its own line in the hit math.

- On top of the gun bonus and the low tier-1 skill requirement. Settings: 'Tier 1 weapons: extra hit chance'.

Aiming costs no AP

CHANGED 12 NOV 2026 Was: in campaigns saved before 11 Nov, aiming at a limb or the head still cost extra AP. Now: aiming never costs AP. The part changes the hit chance (head x0.5, body x1, limbs x1.25) and the damage (head x2, body x1, limbs x0.75).

- Older saves are brought up to date when they load. The aiming AP setting is gone from Settings; the damage and hit multipliers stay there.

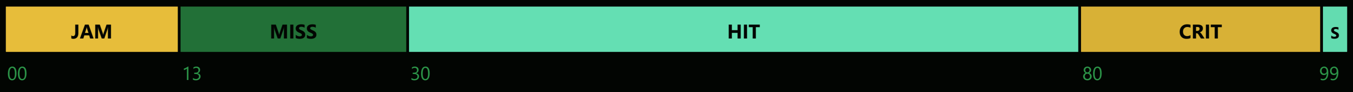
9. The Attack Roll

Roll two d10 and read them as 00-99. Low is bad. Check in this order and stop at the first match:

1. **Jam:** roll below the weapon's jam %. A 13% jam means 00-12.
2. **Miss:** roll below 100 − hit chance. A 70% hit chance means 30 or higher hits.
3. **Hit, then upgrades:** if it hit, it is a **super crit** at or above 100 − super crit %, otherwise a **crit** at or above 100 − crit %, otherwise a plain hit.

Source: the brief, which states this as the current rule.

Brief's example: 13% jam, 70% hit, 20% crit, 2% super



Crit chance comes from the weapon. Super crit is per character, normally 1-2%, and only changes through special traits or perks. The bands should be shown before the roll, for example `Jam 00-12 · Miss 13-29 · Hit 30-79 · Crit 80-97 · Super 98-99`.

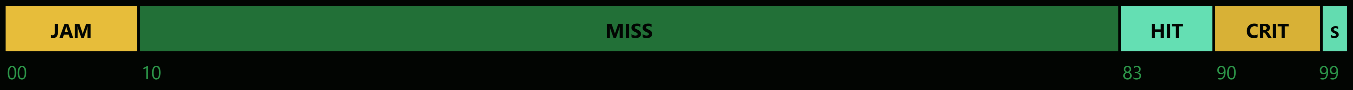
The sheet computes the bands differently

The Combat Sheet's current formulas (rows 5-6) produce different bands from the brief's rule. Both are shown here because they produce very different numbers.

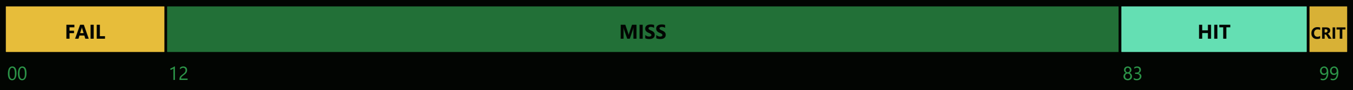
Band	Brief (current intent)	Sheet (Combat Sheet row 6)
Jam	Roll < Jam %	Roll ≤ Fail% × (10 ÷ LCK) × 100 − 1 + (10 − Condition), capped at 99
Miss	Roll < 100 − Hit%	Roll below 100 − Hit% (same)
Crit	Roll ≥ 100 − Crit%	Roll ≥ 99 − Crit% × (LCK ÷ 5) × Hit% × 100
Super	Roll ≥ 100 − Super%	Not computed. The DM picks "Super" from a dropdown. Gen Info: "1% by rolling 99".

Same shot in both systems: Character 1, Pipe Shotgun, R2, 17.5% to hit, weapon crit 10%, jam 10%, LCK 8, Condition 10.

Brief's rule (with 2% super)



Sheet's formulas: fail ≤ 11.5, hit ≥ 82.5, crit ≥ 96.2



DECIDED, SEE 154a

RESOLVED CF-04 Crit chance. Brief: crit is the weapon's % straight. Sheet: crit is scaled by LCK÷5 and by the hit chance itself, so a low-odds shot almost never crits. Gen Info says Luck drives crit. The brief lists "how much Luck affects crits" as undecided, so this needs a decision.

DECIDED, SEE 154a

RESOLVED CF-05 Jam chance. Brief: the weapon's % straight. Sheet: scaled by 10÷LCK and raised by poor Condition. At LCK 2 a 10% weapon fails on anything up to 49. CS Worksheet's note uses 2 × (10 − Condition), while the live formula uses 1 ×.

DECIDED, SEE 18a

RESOLVED UF-03 What a jam does is not written anywhere. Nothing says if the shot is lost, whether the AP is spent, or what clearing it costs. The one clue is a Stat Converter flag: "-1 Unjam Cost". Melee weapons also have a Fail % with no meaning given. Perks also refer to "Critical Fails hit YOU" and "Enemy Crit fails reflect back".

DECIDED, SEE 154a

RESOLVED US-05 **Fractional bands.** Sheet thresholds such as 82.5 land between die faces. The brief's examples use whole numbers, but no rounding rule is given when a modifier produces a fractional hit chance. Rounding hit chance down before building bands is a conservative default.

DECIDED, SEE 154a

RESOLVED UX-09 Stat Converter has columns for **Super Crit Roll**, **Super Fail Roll** and **Enemy Fail Roll**, and traits refer to "+1 Super Crit roll" and a "Super Fail". No formula reads them, and a Super Fail band is defined nowhere.

Burst fire

An automatic weapon fires **Count** bullets per attack for one AP cost. Attack resolution happens once. On a hit, the roll also decides how many bullets connect. The sheet splits the band from the hit threshold up to the crit threshold into Count equal steps (Combat Sheet row 7). The higher the roll, the more bullets hit.

```
Step = (Crit threshold − Hit threshold) ÷ Count
Pipe Shotgun, Count 2:  step = (96.2 − 82.5) ÷ 2 = 6.85
Roll 82.5 to below 89.35 → 1 bullet
Roll 89.35 to below 96.2 → 2 bullets
```

Each bullet that hits deals damage.

DECIDED, SEE 18a

RESOLVED US-06 **Ammo use.** The sheet's Magazine cell just shows capacity and never counts down, so the DM tracks rounds by hand. It presumably costs Count rounds per burst, hit or miss. Energy weapons have a separate Ammo Per Shot column, and Spray N' Pray's evolution says "criticals no longer consume ammo".

DECIDED, SEE 18a

RESOLVED US-07 **Confirm how burst hit counts work.** The brief asks for this too. There are two descriptions. Gen Info: "D100 for hit chance, divisible dice for # of hits", which fits the band-splitting above. The Loop's example: "P4 rolls for # of bullets hit", which reads like a separate roll. Also unclear: with a crit, does every bullet connect, and are they all crits? The brief's rule puts crits above the hit band, which changes the size of the band being divided.

DECIDED, SEE 18a

RESOLVED US-08 **Damage per burst.** The Combat Sheet has one Final Dmg cell and one HP Lost cell. Whether DT applies per bullet is implied by the per-bullet calculation but not stated. It matters a lot, because Pen against DT is the main defence against bursts. The Ammo tab also has unused D/2 and P/2 columns (half damage, half Pen), which may have been a burst rule.

Shotguns and pellets

DECIDED, SEE 18a

RESOLVED UF-04 **The Buckshot Mechanic row in Gen Info is blank.** Pellet loads have a damage value written as text: 12 Gauge Buckshot "2x10", 20 Gauge Birdshot "0.25x20", .22 Rat Shot "3x2". Text damage cannot pass through the damage formula, so the cell falls back to blank on these loads. Meanwhile 20 Gauge Buckshot is numeric (8). One Small Gun's note also says "Shoots 2 projectiles for one shot (one calc)".

Targeted shots

A targeted ("VATS") shot picks a body location. Gen Info prices it as **weapon AP + 1** for body and extremities, and **weapon AP + 2** for the head. The location then feeds the damage multiplier (Chapter 10).

DECIDED, SEE 18a

RESOLVED US-09 No rule says what happens to an untargeted shot. The Combat Sheet's location cell defaults to Body, so an untargeted shot is presumably a Body hit at normal AP, yet targeted Body costs +1 AP for the same multiplier. The perk Seen It Coming ("no cost for targeted body or headshot") confirms the surcharge on Body exists. Roadmap Phase Two lists "Targeted Limbs" and "Location Variance" as not started. A hit-penalty for called shots is also undefined: nothing in the formula changes with location.

UNFINISHED UF-05 Roadmap ideas not yet rules: "Snap shot (roughly 1.5) for high roll" (the perk Spec Ops mentions a "cost to snapshoot"), "Some sort of Piercing shot with AMR/GAUSS", and the Suppression perk idea.

9. The Attack Roll: changes

Changes since the bible was compiled, oldest first. Where this page and pages 16-18 disagree, this page is current.

Jams

CHANGED 8 NOV 2026 Was: nothing said what a jam does (UF-03). Now: the jam uses up the attack's AP, and clearing it costs AP by weapon type. Resolves UF-03.

AP to clear	Weapon types
0	Grenade, Mine/Trap
1	Revolver, Semi-Auto Pistol, Plinker Pistol, Pistol, Longbow, B-P, B-S, S-P, S-B, P-B, P-S, Hand
2	Machine Pistol, SMG, PDW, Carbine, Semi-Auto Rifle, Auto Rifle, Lever-Action Rifle, DMR, Special, Light Shotgun, Rifle, Crossbow, Fast Laser, Hot Laser, Fast Plasma, Electric, Magnetic
3	Sniper Rifle, Heavy Shotgun, LMG, Anti-Mat, Hot Plasma, Fueled, Powered, Launcher
4	Heavy, Missile
2	anything not listed

Bursts, burst damage and untargeted shots

CHANGED 8 NOV 2026 Was: two descriptions of burst hits (US-07), no word on whether DT applies per bullet (US-08), and no rule for untargeted shots (US-09). Now: Resolves US-07, US-08, US-09.

- In a burst the hit band is cut into Count equal steps, and a higher roll lands more bullets, at least 1. A crit or super crit lands every bullet. (Replaced on 9 Nov: see Burst bullets by roll, below.)
- Each bullet's damage is worked out against DT on its own, then multiplied by the bullets that land.
- A shot with no body part picked hits the Body. Aiming at a limb costs +1 AP, the head +2 (free from 12 Nov).

Ammo

CHANGED 8 NOV 2026 Was: the sheet never counted rounds down (US-06). Now: every shot takes its rounds from the shooter's inventory, enemies included. No rounds, no shot. Resolves US-06.

Burst bullets by roll

CHANGED 9 NOV 2026 Was: a crit landed the whole burst. Now: the roll decides how many bullets land, and only a super crit lands them all.

The hit band, from the lowest hit up to the super crit, is cut into Count - 1 steps, widest first. A higher roll lands more bullets. Only the first bullet of a crit or super crit gets the crit multiplier; the rest are plain hits.

Roll (hit at 60+, super at 95, burst of 4)	Bullets
60-75	1
76-87	2
88-94	3
95-99 (super crit)	4

The combat log

CHANGED 9 NOV 2026 Was: a block of numbers for every attack. Now: one line that tells what happened, with the numbers a click away.

- Each attack is one story line, such as Spike takes 7 DMG as Aquilius shoots them. Click it for the roll, the bands, the damage math and any status.
- Color shows the outcome: red for a miss, green for a hit, bright green for a crit, bright pink for a super crit.
- The verb follows the weapon: shotguns blast, long-range rifles snipe, blades stab and slash. A crit names the body part. Player characters never get the gory death lines.
- The roll bar shows the bands before the roll, and the band the roll lands in gets a thick border.

One sentence per attack

CHANGED 9 NOV 2026 Was: a story line could add extra sentences, such as a wound description, a remark about the ammo, a status, or an opener. Now: each attack is exactly one sentence with the damage, and nothing else.

Kills fold the outcome into that sentence, for example Spike shoots Aquilius through the eye for 9 DMG, blowing their brains out the back. A player who drops reads ..., and Spike goes down. Grenades are one sentence too. The numbers and statuses are still in the details under each line.

Weapon familiarity

CHANGED 10 NOV 2026 New.

- Each player counts the rounds they have fired with each weapon. A melee swing or a throw counts as 1. A jam counts nothing.
- A crit or super crit counts 5 times the rounds fired.
- The count shows as one word on the weapon, in the inventory and on the weapon slot: Unfamiliar from 0, Novice from 10, Familiar from 100, Proficient from 250, Expert from 750, Master from 2000.
- The DM can type a new count next to the word. For now familiarity is a label only: it changes no numbers.

Roll ranges in short form

CHANGED 10 NOV 2026 Was: a list such as Jam 00-09 · Miss 10-62 · Hit 63-96. Now: only where each result starts.

- Red 10 - means a jam on anything below 10. White 63 + means a hit from 63 up. Green 97 ++ is a crit, blue 99 $$$ a super crit. Anything not covered is a miss.
- The rolls are 00 to 99, so a 5% jam reads 05 - (00 to 04). The full ranges show when you point at the line.

Buckshot spreads: the roll and the range set how many pellets land

CHANGED 12 NOV 2026 Was: pellet loads such as 12 Gauge Buckshot (2x10) hit as one lump of all their pellets, at any range and any roll. Now: like a burst, a better roll lands more pellets, and the gun's best range lands the most. Resolves UF-04.

- Roll quality runs from 0 on a bare hit to 1 at the super crit line. A super crit always counts as 1.
- Range share: the gun's base hit at this range over its base hit at its best range, so the best band is 1 and worse bands less.
- Pellets landed = pellets x range share x (0.5 + roll quality), rounded up, at least 1 and at most all of them.
- At the best range a bare hit lands half the pellets and any roll in the top half of the hit band lands all of them. At a range where the gun has half its best odds, even a super crit lands three quarters.
- The landed pellets hit as one lump (damage x pellets landed), so Pen, DT and the damage floor work on the total as before. Crits multiply it as before.
- The log's math shows it, such as 2x6 (6 of 10 pellets). The attack panel's note says how many can land at the current range.
- Settings, Accuracy: 'Pellet ammo' can go back to One hit (the old rule) or Each pellet.

Familiarity changes crits and hits

CHANGED 12 NOV 2026 Was: familiarity was a word only. Now: each band changes crit chance and hit chance with that weapon.

- Unfamiliar: crit -5%. Novice: crit -2.5%. Familiar: hit +3%. Proficient: crit +5%, hit +7%. Expert: crit +10%, hit +12%. Master: crit +15%, hit +20%.
- Party members only; enemies don't track familiarity, so they get none. Crit chance can't go below 0.
- The bands still start at 0, 10, 100, 250, 750 and 2000 rounds fired (a crit counts 5). The weapon card in a fight shows the band, and its tooltip the bonus.

10. Damage

Source: Combat Sheet!M9, restated in Ammo!N12 and in the brief.

```
X = Base damage × Location × Crit
   Location:  Body 1    Limb 0.75    Head 2
   Crit:      Normal 1    Crit 2     Super 3

If Pen ≥ DT:   Damage = max(1, X)
If Pen < DT:   Damage = max(1, X × Pen÷DT, max(1, X) × 0.2)

Round down. Minimum 1.
```

What it means

- **If Pen matches DT, armour does nothing.** DT is not subtracted. It is a gate.
- **Below the gate, damage scales down** by Pen÷DT, but never under the **damage floor of 20%** (Gen Info: Damage Floor 0.2). Every hit that lands does at least 1 damage.
- Crits and headshots multiply before armour, so they scale the reduced result and the floor as well. They do not change whether Pen clears DT.

Where the numbers come from

Weapon class	Base damage	Pen
Small Guns, Big Guns	The loaded **ammo type** (Ammo tab), × Damage modifier	Ammo Pen + Pen modifier
Energy Weapons	The weapon (Dam column)	The weapon (Pen column)
Explosives	The weapon (Damage column)	The weapon (PEN column)
Melee	Primary or secondary attack on the weapon	Primary or secondary Pen

A ballistic gun does no damage of its own. Its class is shaped by hit curve, AP, burst and jam, and its damage by what you feed it. Junk, Standard, Hollow Point, AP and other loads trade damage against Pen and tier.

Worked examples

Case	Base	Location	Crit	X	Pen	DT	Before rounding	Final
Open target	8	Body	Normal	8	4	0	8	**8**
Pen below DT	8	Body	Normal	8	4	8	4	**4**
Head, crit	8	Head	Crit	32	4	8	16	**16**
Super crit vs. heavy armour	8	Head	Super	48	4	40	9.6	**9**
Floor	8	Body	Normal	8	0	25	1.6	**1**
Limb	3	Limb	Normal	2.25	2	2	2.25	**2**
Minimum	1	Limb	Normal	0.75	0	10	1	**1**

DECIDED, SEE 154a

RESOLVED UX-10 Stat Converter holds **Crit D**, **Crit Mult**, **Super Crit Mult**, and **Limb, Body and Head Mult** columns, and many perks use them (for example Plinkster's 4x crit). None is read by the damage formula, so those effects exist on paper only. The Damage modifier and Pen modifier are live.

BUG BG-06 Minor: on weapon slot 2, Combat Sheet!K35 tests R17="02" (slot 1's weapon) where it should test R25. It is harmless, because both branches do the same thing.

UNFINISHED UF-06 Roadmap: "(REBALANCING) Buff DT and Pen on par with projectiles" for melee. CS Worksheet also has a separate "16b. MW Damage" step and note that melee is meant to have a "STR damage calc". The live formula has no STR scaling on melee damage. Gen Info also says STR governs "Melee Weapons, Unarmed".

10. Damage: changes

Changes since the bible was compiled, oldest first. Where this page and pages 19-20 disagree, this page is current.

Armor sets the damage floor

CHANGED 9 NOV 2026 Was: a hit below DT always kept at least 20% of its damage. Now: the target's body armor sets that floor.

Wearing	Damage floor
Clothing or nothing	40%
Light armor	30%
Medium armor	20%
Heavy armor	10%
Power armor	5%
Creatures	20%

Pen at or above DT still does full damage. Below it, damage is cut to Pen / DT, but never below the floor. Heavier armor shrugs off more of what it stops.

Worn armor gives 15% less DT

CHANGED 12 NOV 2026 Was: armor gave the workbook's DT. Now: helmets, body armor and accessories give 15% less, rounded down (DT 14 to 11).

- For everyone wearing it: the party and enemy humans. A creature's own hide (its base DT) is unchanged.
- Why: with tier 4-5 armor most early guns took 10-30 turns to get through. A start; Settings: 'Worn armor gives this much less DT'.

All ammo does 20% more damage

CHANGED 12 NOV 2026 Was: each load did the workbook's damage. Now: every load of every caliber does 20% more (10mm Standard 8 to 9.6).

- Pen is unchanged. Enemies firing the same ammo hit 20% harder too.
- Why: the time-to-kill study of 12 Nov. +20% damage makes every fight about 17% shorter without making early fights one-volley; Pen only helps against armor. Settings: 'All ammo: extra damage'.

DT is a whole number

CHANGED 12 NOV 2026 Was: DT could end in a fraction (a status that removes a share of DT, or a part-point bonus). Now: DT is always rounded down to a whole number.

- For example, 15 DT with Plasma Melt taking 25% is 11, not 11.25.

11. Action Points and Actions

Each turn a combatant has their full AP to spend. A player submits AP to confirm each action, and can keep acting while AP remains. The sheet tracks AP Spent against Max AP and blocks actions when too little is left (Combat Sheet!Q5).

Action	AP cost	Source
Attack (ranged)	Weapon's Attack AP, + AP cost modifiers. One attack fires the whole burst.	Weapon tabs
Attack (melee)	Primary or secondary AP on the weapon.	Melee tab
Targeted shot	Attack AP + 1 (body or limb), + 2 (head).	Gen Info
Reload	Weapon's Reload AP, + reload modifiers.	Weapon tabs
Swap weapon	1 AP.	Gen Info
Take Cover	2 AP. Reduces chance to hit by 15.	Gen Info
Use an item	The item's AP Cost.	Items tab
Move	See Chapter 12.	Weapon tab headers
Skill roll in combat (retreat, hide)	Not stated.	Loop
Block (melee)	Not stated. Listed as a move on CS Worksheet.	CS Worksheet
Open inventory, hand item	Blank.	Action AP tab

DECIDED, SEE 21a

RESOLVED UF-07 The **Action AP** tab holds only two row labels (Open Inventory, Hand Item) and no costs. The brief confirms it is unfinished. Whether opening inventory costs AP matters: the "Active" inventory system and the Thick-Skin trait ("cannot access inventory in combat") both assume it means something.

DECIDED, SEE 21a

RESOLVED US-10 AP refresh is never stated. The sheet's AP Spent cell is cleared by hand. It is assumed that AP fully refills at the start of a combatant's turn and cannot be saved. Status effects like Thirst or Fatigue reduce AP, and several traits grant conditional AP "next turn".

UNSURE US-11 CS Worksheet lists "heal" and "use item" as separate moves, and Wield or Unjam have no cost. The trait Bad Leg and the Splint both mention extra AP for moving, which implies movement has a per-move cost the rule below does not fully settle.

11. Action Points and Actions: changes

Changes since the bible was compiled, oldest first. Where this page and page 21 disagree, this page is current.

AP costs and refresh

CHANGED 8 NOV 2026 Was: the Action AP tab had no costs (UF-07), and nothing said when AP comes back (US-10). Now: Resolves UF-07, US-10.

Action	AP
Attack	the weapon's AP
Aim at a limb / the head	free (12 Nov)
Swap weapon	1
Use an item	the item's AP column
Revive an ally	3
Clear a jam	by weapon type (chapter 9)
Throw a Frag Grenade	1
Move	by distance (below)

AP refills in full at the start of each combatant's turn. Anything that costs AP is refused if it can't be paid. Tick Free under OVR, or hold Shift while dragging, to overrule that.

Movement

CHANGED 8 NOV 2026 Was: two unlabeled AP rows (US-12). Now: AP by distance walked. Resolves US-12.

Walk up to	AP
0.5 m	0
1 m	1
3 m	2
5 m	3
10 m	4
25 m	5
50 m	7
75 m	9
100 m	12
150 m	15

On your turn, dragging your token shows the path and its cost first. Then Confirm or Cancel.

Melee, punches and bursts

CHANGED 9 NOV 2026 Was: weapons cost their listed AP. Now:

- Melee weapons cost 1.5x their listed AP, rounded up.
- Punches (fists, gloves and other hand weapons) cost 1 AP for the first in a turn, then 1 more for each one after: 1, 2, 3...
- A burst costs 1 more AP than the weapon lists. Creatures' own attacks keep their AP.

Throwing a grenade

CHANGED 9 NOV 2026 New.

Pick the grenade from Consumables or the item button. A dashed line runs from the thrower to the pointer, with the blast radius where it lands. Click to set the spot, check who's caught in it, then Throw or Cancel. Damage and range are in chapter 35.

Giant is not an ant

CHANGED 10 NOV 2026 Was: any enemy whose name had a word ending in 'ant' counted as an insect, so Giant Rats, Spore Plants and the Giant Evolved Centaur took bonus damage from perks against insects. Now: only ants, cazadores, bloatflies, scorpions, mantises and roaches are insects.

Fists never cost a swap

CHANGED 10 NOV 2026 Was: after shooting, the first punch cost 1 AP more, the weapon swap. Now: punching never pays to swap, because fists are always ready.

A grenade lands near where it's thrown, not on it

CHANGED 11 NOV 2026 Was: a grenade landed exactly on the spot picked. Now: it lands somewhere random inside a circle around that spot.

- The circle's radius is 6m less 1m for every 20 points of Explosives, never under 0.5m. Explosives 20 gives 5.0m; 100 gives 1.0m.
- Every point in the circle is as likely as any other. The blast, its damage, its Bleeding and the cover it wrecks all count from where it lands. The log says how far off it landed.
- The throw preview draws the circle as a dashed yellow ring, and the map shows the grenade flying there and bursting.
- Settings, Cover tiers: the three numbers can be changed. Setting all three to 0 makes every throw land on the spot.

Walking is a straight line by Agility

CHANGED 12 NOV 2026 Was: AP by range band (2 m cost 2 AP, 10 m cost 4, 150 m cost 15). Now: every AP walks the same distance, set by Agility.

- Meters per AP: Agility 1 walks 5 m, Agility 10 walks 8 m, a third of a meter more for each point between (Agility 4: 6 m, Agility 7: 7 m).
- Agility also gives AP (5 + Agility), so a whole turn of walking is 30 m at Agility 1 (6 AP), 60 m at Agility 5 (10 AP) and 120 m at Agility 10 (15 AP).
- Cost = distance / meters per AP, rounded up, at least 1 AP. A hurt leg or a slowing status multiplies it as before.
- Keyboard: M shows an arrow from whoever's turn it is. A and D turn it 15 degrees, W and S add or take away 1 AP of walking, Enter walks, Esc stops. The Move button still opens the Move window.
- Settings, AP costs: meters per AP at Agility 1 and 10.

What you can walk over

CHANGED 12 NOV 2026 Was: only buildings, walls and a few big things stopped a walk; a character could walk straight through crates, desks and sandbags. Now: anything that would have to be vaulted can't be walked over.

- Every object with cover above open (concealment, soft, hard, impenetrable) stops a walk. Go around it, or hold Shift to place the token by hand.
- Open things are stepped over: pallets, bedrolls, cots, benches, rail track, craters. A bed and a wheelchair are open but still in the way.
- Some concealment can be walked through: bushes, thickets, dunes, crop rows, trash piles, curtains, field tents and a rad lake. A tree stops you only at its trunk.
- The DM's "Blocks walking" box on any selected object overrides all of this. Nobody can be stuck: a walk that starts inside something isn't stopped by it.

12. Range, Position, Movement and Cover

The battlefield is a **hex grid with figures** (DM checklist). Each combatant has cube coordinates (Q, R, S). Range is the hex distance, which picks the weapon's hit column directly.

```
Distance = ROUNDDOWN((|ΔQ| + |ΔR| + |ΔS|) ÷ 2)
```

Source: Combat Sheet rows 37-48.

Range	R1	R2	R3	R4	R5	R6	R7	R8	R9	R10
Label	PB	1m	3m	5m	10m	25m	50m	75m	100m	150m
AP, cumulative	—	1	2	3	4	5	7	9	12	15
AP, per step	—	1	1	1	1	1	2	2	3	3

The AP rows are printed above the range columns on every ranged weapon tab. Explosives shows 4 rather than 3 on its last step.

DECIDED, SEE 21a

> **RESOLVED US-12 Reading the AP rows.** They have no label. Row 2 looks cumulative and row 3 looks like the cost of each step. Taken as movement, walking from R1 out to R10 costs 15 AP, and bands further out cost more. That is this book's reading, but CS Worksheet only lists "move in" and "move out", and one Stat Converter note says "Player Chooses Range in CS (costs 1AP)". Hex-grid movement and band movement also do not obviously fit together.

DECIDED, SEE 22a

> **RESOLVED UX-11 Hex scale.** A hex distance of N maps straight to column R(N), but the columns span PB to 150m. So hexes are not a fixed size, which looks like a deliberate abstraction. It is not explained. Distance beyond 10 has no column. Distance 0 (same hex) finds no column, and only melee works.

Cover

Gen Info: **Take Cover costs 2 AP and reduces chance to hit by 15.**

DECIDED, SEE 154a

> **RESOLVED CF-06 Three versions of cover.** (1) Gen Info: 2 AP, −15. (2) The Combat Sheet's per-player COVER checkbox feeds Stat Converter's "Hard Cover" row, which gives −25% Enemy Acc. (3) The Status Effects tab has a Cover row with five named tiers (open, concealment, soft cover, hard cover, impenetrable) and no numbers. Perks like Unstoppable Force also mention destroying concealment. Which one rules?

DECIDED, SEE 22a

> **RESOLVED UF-08** Nothing says when cover ends, or if moving breaks it. Roadmap Phase Two lists "Env. Interacting" as not started. The Torbjorn perk builds cover, and Hunker Down gives a bonus "when in cover".

12. Range, Position, Movement and Cover: changes

Changes since the bible was compiled, oldest first. Where this page and page 22 disagree, this page is current.

Meters, not hexes

CHANGED 8 NOV 2026 Was: a hex distance picked a range column directly, so hexes had no fixed size (UX-11). Now: real distance on a map. Resolves UX-11.

Every map uses a 2 m grid. Range bands reach R1 0.5 m, R2 1 m, R3 3 m, R4 5 m, R5 10 m, R6 25 m, R7 50 m, R8 75 m, R9 100 m, R10 150 m. A location sets the map's size, and so which ranges can happen.

Location	Width x height
Small room	6 x 6 m
Medium room	12 x 10 m
Big room	30 x 20 m
Long hallway	40 x 4 m
Building, several rooms	24 x 16 m
Warehouse	50 x 30 m
Urban streets	90 x 70 m
Tight forest	40 x 40 m
Open woods	120 x 90 m
Wilderness	220 x 160 m
Canyon	200 x 30 m
Shack	8 x 6 m
Courtyard	20 x 20 m
Parking lot	40 x 30 m
Stretch of road	80 x 24 m
Walled compound	70 x 50 m
Cavern	60 x 40 m
Open field	150 x 110 m
Custom size	you choose

Cover comes from the map

CHANGED 8 NOV 2026 Was: nothing said when cover ends or whether moving breaks it (UF-08). Now: cover is checked for every shot from where people stand, so moving changes it at once. The tiers are in chapter 8. The Take Cover action and the Cover status are gone. Resolves UF-08.

Low objects are open

CHANGED 9 NOV 2026 Was: beds, campfires and other low things counted as soft cover. Now: anything that sits close to the floor gives no cover.

Open: Bar stool, Bed, Bedroll, Bench, Campfire, Concrete floor, Cot, Crater, Dirty mattress, Flagpole, Footlocker, Lake, Pallet, Pond, Rad lake, Rail track, Scarecrow, Shallow water, Small rock, Stage, Stump, Tent pole, Tiled floor, Wheelchair, Wooden floor. A kitchen table is concealment only.

Nobody stands inside things

CHANGED 9 NOV 2026 New.

A move, drag or placement that would put someone inside a wall, a piece of furniture or a tree trunk is refused. Random placement and Surround take the nearest free spot instead.

Turning objects

CHANGED 9 NOV 2026 New.

While dragging an object on the map, E turns it clockwise and Q counterclockwise, 15 degrees a press. Hold Shift for 5 degrees.

Room layouts

CHANGED 9 NOV 2026 Was: items scattered at random. Now: layouts follow how a place is used.

- A building setting on open ground puts one building in the middle, furnished inside, with junk around its walls. The rest stays wilderness.
- On city streets, every block becomes a building of that setting. Cars and lamp posts stay in the street.
- Warehouses get parallel shelf rows with aisles. Factories get conveyor lines with presses on them, oil drums in rows and a boiler and generator corner. Offices put a chair at every desk and split desk pods with partitions. Homes get a kitchen strip, a bedroom and a bathroom. Police stations get a front counter and a row of cells. Camps put beds around the fire.
- Every piece can be walked up to, the floor stays in one piece, and each item has a maximum count.

Items placed = map area x density x a random 0.8 to 1.2, kept between the minimum and maximum. Higher weights come up more often.

Setting	Density per m2	Min-max	Items (weight)
Home	0.09	3-50	Bed (3), Kitchen table (2), Toilet (1), Bathtub (1), Sink (2), Stove (1), Fridge (1), Couch (2), Dresser (2), Bookshelf (1), Potted plant (1)
Office	0.1	3-60	L-shaped desk (3), Desk (5), Office chair (4), Filing cabinet (3), Bookshelf (2), Copier (1), Water cooler (1), Potted plant (2), Cubicle partition (4), Couch (1), Safe (1)
Factory	0.05	3-60	Conveyor (3), Press machine (3), Boiler (1), Workbench (4), Oil drum (3), Pipe rack (2), Generator (2), Tool cart (2), Crate (2)
Warehouse	0.05	3-60	Shelves (6), Crate (4), Crate stack (3), Pallet (3), Forklift (1), Barrels (2)
Police station	0.08	3-60	Desk (4), Office chair (2), Toilet (1), Cell bars (3), Lockers (3), Sandbags (2), Bench (2), Front counter (1), Armory cage (1), Filing cabinet (2)
General store	0.08	3-50	Store shelf (6), Front counter (1), Cash register (1), Crate (3), Crate stack (1), Vending machine (1), Barrels (1), Filing cabinet (1)
Clinic	0.07	3-50	Hospital bed (4), Exam table (2), Medicine cabinet (3), Privacy curtain (3), Desk (1), Office chair (2), Bench (2), Wheelchair (1), Potted plant (1)
Tent	0.1	2-50	Bedroll (4), Cot (3), Footlocker (3), Campfire (1), Tarp wall (2), Tent pole (2), Crate (1)
Desert	0.012	3-70	Small rock (5), Medium rock (4), Boulder (2), Dune (3), Cactus (3), Dead tree (1), Rusted wreck (1), Ruined wall (1), Stone wall (1)
Forested	0.09	4-240	Bush (6), Tree (9), Big tree (2), Fallen log (2), Thicket (2), Stump (2), Medium rock (1)
City streets	0.012	3-70	Wrecked car (5), Burned-out bus (1), Dumpster (3), Mailbox (2), Hydrant (2), Lamp post (3), Concrete barrier (2), Rubble (3), Concrete wall (1)
Scrapyard	0.02	3-60	Rusted wreck (4), Stacked cars (2), Scrap heap (4), Tire pile (4), Shipping container (2), Engine block (2), Oil drum (3), Crate stack (1), Sheet metal (2), Rubble (2)
Military outpost	0.018	3-60	Sandbags (5), Hesco barrier (4), Ammo crate (3), Razor wire (3), Field tent (2), Guard tower (1), Radio table (1), Concrete barrier (2), Crate (2), Flagpole (1), Concrete block (2)
Saloon or casino	0.07	3-60	Bar counter (1), Bar stool (5), Poker table (3), Slot machine (4), Jukebox (1), Stage (1), Piano (1), Kitchen table (2), Couch (1), Barrels (1)
Vault	0.06	3-60	Console (3), Bunk bed (3), Lockers (3), Water purifier (1), Reactor (1), Generator (1), Crate (2), Bench (2), Pipe rack (1), Footlocker (2)
Farmstead	0.016	3-60	Hay bale (5), Wooden fence (5), Crop row (5), Water trough (2), Tractor (1), Scarecrow (1), Silo (1), Crate (2), Barrels (2), Fallen log (1)

Setting	Density per m2	Min-max	Items (weight)
Gas station	0.016	3-60	Gas pump (3), Vending machine (2), Billboard (1), Phone booth (1), Toll booth (1), Wrecked car (4), Dumpster (2), Lamp post (2), Concrete barrier (2), Oil drum (2), Tire pile (2)
Ruins	0.02	3-60	Collapsed wall (5), Broken column (4), Ruined wall (4), Rubble (5), Statue (1), Crater (2), Pillar (2), Stone wall (2), Dead tree (1)
Raider camp	0.03	4-60	Burn barrel (3), Dirty mattress (3), Tire wall (2), Spiked barricade (3), Scrap wall (3), Captive cage (1), Trash pile (3), Motorcycle (2), Rusted wreck (1), Crate (2), Oil drum (2)
Hospital ward	0.07	4-60	Hospital bed (6), Privacy curtain (3), Gurney (2), Medicine cabinet (2), Wheelchair (2), Operating table (1), Filing cabinet (1), Desk (1), Office chair (1), Potted plant (1)
Subway station	0.025	3-40	Subway car (1), Pillar (4), Bench (3), Turnstile (3), Ticket booth (1), Trash pile (2), Vending machine (1), Rubble (2), Rail track (2)
Diner	0.08	4-50	Diner booth (5), Kitchen table (3), Bar stool (5), Diner counter (1), Jukebox (1), Nuka-Cola machine (1), Stove (1), Fridge (1), Sink (1)
Checkpoint	0.02	4-60	Concrete barrier (3), Tank trap (3), Sandbags (3), Wrecked truck (1), Guard booth (1), Spotlight (1), Razor wire (2), Concrete pipe (1), Metal crate (2), Ammo crate (1)
Church	0.06	4-50	Pew (8), Altar (2), Pulpit (2), Pillar (2), Statue (1), Rubble (1), Bookshelf (1)
Cave or mine	0.03	3-60	Stalagmite (6), Medium rock (4), Boulder (2), Small rock (4), Ore vein (3), Mine cart (2), Support beam (3), Rail track (1), Crate (1)

Furniture and scenery

CHANGED 9 NOV 2026 The current list, from the app's data.

Item	Cover	Size (m)
Desk	Soft cover, blocks walking	1.6 x 0.8
Office chair	Concealment, blocks walking	0.6 x 0.6
Filing cabinet	Hard cover, blocks walking	0.6 x 0.6
Bookshelf	Soft cover, blocks walking	2 x 0.4
Copier	Soft cover, blocks walking	1 x 0.8
Water cooler	Concealment, blocks walking	0.5 x 0.5
Potted plant	Concealment, blocks walking	0.7 x 0.7
Cubicle partition	Concealment, blocks walking	2 x 0.2
Couch	Soft cover, blocks walking	2 x 0.9
Safe	Hard cover, blocks walking	1 x 1
Conveyor	Soft cover, blocks walking	5 x 1
Press machine	Hard cover, blocks walking	2 x 2
Boiler	Hard cover, blocks walking	2.5 x 2.5
Workbench	Soft cover, blocks walking	2 x 0.8
Oil drum	Soft cover, blocks walking	0.8 x 0.8
Pipe rack	Concealment, blocks walking	3 x 0.5
Generator	Hard cover, blocks walking	2 x 1.5
Tool cart	Concealment, blocks walking	1 x 0.6
Shelves	Soft cover, blocks walking	6 x 1
Crate	Soft cover, blocks walking	1 x 1
Crate stack	Hard cover, blocks walking	2 x 2
Pallet	Open	1.2 x 1.2
Forklift	Hard cover, blocks walking	2.4 x 1.2

Item	Cover	Size (m)
Barrels	Soft cover, blocks walking	1.6 x 0.8
Cell bars	Concealment, blocks walking	3 x 0.2
Lockers	Hard cover, blocks walking	2 x 0.5
Sandbags	Hard cover, blocks walking	2 x 0.6
Bench	Open	1.8 x 0.5
Front counter	Hard cover, blocks walking	4 x 0.8
Armory cage	Concealment, blocks walking	3 x 2
Bedroll	Open	1.8 x 0.7
Cot	Open	1.8 x 0.7
Footlocker	Open	1 x 0.5
Chest	Soft cover, blocks walking	1 x 0.6
Campfire	Open	1 x 1
Tarp wall	Concealment, blocks walking	3 x 0.2
Tent pole	Open	0.3 x 0.3
Small rock	Open	1 x 1
Medium rock	Soft cover, blocks walking	2 x 2
Boulder	Hard cover, blocks walking	4 x 4
Dune	Concealment	6 x 3
Cactus	Concealment, blocks walking	1 x 1
Dead tree	Soft cover, blocks walking	2.5 x 2.5
Rusted wreck	Hard cover, blocks walking	4 x 2
Ruined wall	Hard cover, blocks walking	3 x 0.5
Bush	Concealment	1.5 x 1.5
Tree	Soft cover, blocks walking	3.5 x 3.5
Big tree	Soft cover, blocks walking	6 x 6
Fallen log	Soft cover, blocks walking	3 x 0.8
Thicket	Concealment	3 x 3
Stump	Open	0.8 x 0.8
Wrecked car	Hard cover, blocks walking	4.5 x 2
Burned-out bus	Hard cover, blocks walking	9 x 2.5
Dumpster	Hard cover, blocks walking	2 x 1
Mailbox	Soft cover, blocks walking	0.6 x 0.6
Hydrant	Soft cover, blocks walking	0.5 x 0.5
Lamp post	Concealment, blocks walking	0.4 x 0.4
Concrete barrier	Hard cover, blocks walking	3 x 0.6
Rubble	Soft cover, blocks walking	3 x 2
Concrete building	Impenetrable, blocks walking	18 x 18
Concrete wall	Impenetrable, blocks walking	6 x 0.4
L-shaped desk	Soft cover, blocks walking	2 x 2
Kitchen table	Concealment, blocks walking	1.8 x 1.2
Bed	Open, blocks walking	2 x 1.4
Toilet	Concealment, blocks walking	0.7 x 0.9

Item	Cover	Size (m)
Bathtub	Hard cover, blocks walking	1.8 x 0.8
Sink	Concealment, blocks walking	0.8 x 0.6
Stove	Hard cover, blocks walking	0.8 x 0.8
Fridge	Hard cover, blocks walking	0.9 x 0.8
Dresser	Soft cover, blocks walking	1.4 x 0.6
Stone wall	Hard cover, blocks walking	4 x 0.6
Pillar	Hard cover, blocks walking	1.2 x 1.2
Out of bounds	Impenetrable, blocks walking	4 x 4
Tire pile	Soft cover, blocks walking	1.5 x 1.5
Scrap heap	Hard cover, blocks walking	3 x 2.5
Shipping container	Impenetrable, blocks walking	6 x 2.4
Stacked cars	Hard cover, blocks walking	4.5 x 2.2
Engine block	Hard cover, blocks walking	1 x 0.8
Guard tower	Hard cover, blocks walking	3 x 3
Hesco barrier	Hard cover, blocks walking	2 x 1
Ammo crate	Soft cover, blocks walking	1.2 x 0.6
Razor wire	Concealment, blocks walking	4 x 0.6
Field tent	Concealment	4 x 3
Flagpole	Open	0.3 x 0.3
Radio table	Soft cover, blocks walking	1.6 x 0.8
Concrete block	Hard cover, blocks walking	1 x 1
Sheet metal	Soft cover, blocks walking	2 x 0.2
Bar counter	Hard cover, blocks walking	5 x 0.8
Bar stool	Open	0.4 x 0.4
Poker table	Soft cover, blocks walking	1.8 x 1.8
Slot machine	Hard cover, blocks walking	0.8 x 0.7
Jukebox	Soft cover, blocks walking	1 x 0.7
Stage	Open	4 x 2.5
Piano	Soft cover, blocks walking	1.5 x 1.4
Console	Hard cover, blocks walking	2 x 0.8
Bunk bed	Soft cover, blocks walking	2 x 1
Reactor	Hard cover, blocks walking	3 x 3
Water purifier	Hard cover, blocks walking	2 x 1.5
Hay bale	Soft cover, blocks walking	1.4 x 1.4
Wooden fence	Concealment, blocks walking	4 x 0.2
Water trough	Soft cover, blocks walking	2 x 0.7
Tractor	Hard cover, blocks walking	3.5 x 1.8
Scarecrow	Open	0.5 x 0.5
Crop row	Concealment	5 x 0.8
Silo	Hard cover, blocks walking	4 x 4
Gas pump	Hard cover, blocks walking	1 x 0.6
Vending machine	Hard cover, blocks walking	1 x 0.8

Item	Cover	Size (m)
Billboard	Concealment, blocks walking	5 x 0.4
Phone booth	Soft cover, blocks walking	1 x 1
Toll booth	Hard cover, blocks walking	2 x 2
Broken column	Hard cover, blocks walking	1 x 1
Collapsed wall	Hard cover, blocks walking	5 x 0.8
Statue	Hard cover, blocks walking	1.5 x 1.5
Crater	Open	4 x 4
Stalagmite	Hard cover, blocks walking	1 x 1
Mine cart	Hard cover, blocks walking	1.6 x 1
Support beam	Soft cover, blocks walking	0.4 x 0.4
Ore vein	Hard cover, blocks walking	2.5 x 1.2
Rail track	Open	6 x 1
Wrecked truck	Hard cover, blocks walking	7 x 2.6
Motorcycle	Soft cover, blocks walking	2 x 0.8
Tank trap	Hard cover, blocks walking	1.5 x 1.5
Concrete pipe	Hard cover, blocks walking	3 x 1.4
Cable spool	Soft cover, blocks walking	1.6 x 1.6
Fuel tank	Hard cover, blocks walking	3 x 3
Metal crate	Hard cover, blocks walking	1.2 x 1.2
Trash pile	Concealment	2.5 x 2.5
Hedge	Concealment, blocks walking	4 x 1
Spiked barricade	Soft cover, blocks walking	3 x 0.7
Burn barrel	Soft cover, blocks walking	0.8 x 0.8
Dirty mattress	Open	2 x 1.4
Captive cage	Concealment, blocks walking	2 x 2
Scrap wall	Hard cover, blocks walking	4 x 0.4
Tire wall	Soft cover, blocks walking	3 x 1
Hospital bed	Soft cover, blocks walking	2.1 x 1
Gurney	Concealment, blocks walking	1.9 x 0.7
Privacy curtain	Concealment	3 x 0.15
Medicine cabinet	Hard cover, blocks walking	1.2 x 0.5
Wheelchair	Open, blocks walking	0.8 x 0.8
Operating table	Soft cover, blocks walking	2 x 0.9
Subway car	Impenetrable, blocks walking	14 x 3
Turnstile	Soft cover, blocks walking	1.2 x 0.5
Ticket booth	Hard cover, blocks walking	2.2 x 2
Diner booth	Soft cover, blocks walking	2 x 1.1
Diner counter	Hard cover, blocks walking	6 x 0.8
Nuka-Cola machine	Hard cover, blocks walking	1 x 0.8
Guard booth	Hard cover, blocks walking	2 x 2
Spotlight	Concealment, blocks walking	1 x 1
Pew	Soft cover, blocks walking	4 x 0.6

Item	Cover	Size (m)
Altar	Hard cover, blocks walking	2 x 1
Pulpit	Soft cover, blocks walking	1 x 1
Wooden door	Concealment, blocks walking and sight while shut	1.2 x 0.2
Iron door	Soft cover, blocks walking and sight while shut	1.2 x 0.2
Steel door	Hard cover, blocks walking and sight while shut	1.4 x 0.3
Radioactive barrel	Soft cover, blocks walking	0.8 x 0.8
Rad lake	Open	8 x 5
Wooden floor	Open	4 x 4
Concrete floor	Open	4 x 4
Tiled floor	Open	4 x 4
Lake	Open, blocks walking	24 x 14
Pond	Open, blocks walking	6 x 4
Shallow water	Open	6 x 4
Store shelf	Soft cover, blocks walking	3 x 0.8
Cash register	Soft cover, blocks walking	0.6 x 0.5
Exam table	Soft cover, blocks walking	1.9 x 0.8

Enemy starting distance

CHANGED 10 NOV 2026 New.

When setting up an encounter the DM can place enemies close to the party, at mid range or far, or leave it at any distance. The three are shares of the map's longer side, measured from the middle of the party: close 8-20%, mid range 25-45%, far 55-90%. So close is a few meters in a room and a few dozen in the wilderness.

Enemy map icons

CHANGED 10 NOV 2026 Was: every enemy was the same person shape. Now: an enemy's icon is chosen for it.

- A human gets the icon of its faction: a skull hat for raiders, a brimmed helmet for the NCR, a crested helmet for the Legion, power armor for the Brotherhood, and so on.
- Anything else is matched by what it is: robot, eyebot, ant, scorpion, cazador, deathclaw, gecko, horned beast, rat, dog, ghoul, spore plant. An unknown animal gets a paw print.
- An unaligned human stays a plain person. Players still pick their own icon, and every new icon is on their list.

Map creator

CHANGED 10 NOV 2026 New.

- Create map, in encounter setup, opens a window to draw a location: its name, its size in meters and its shape (rectangle, L, U, T, cross or cut corners).
- Buildings and walls are drawn by dragging, so they can be any size. Cover and other things are picked from a menu and placed with a click.
- A saved map is kept with the campaign and listed under Location. Its setting reads As built. Any other setting can still be rolled on it, inside the same shape, and As built brings the drawing back.
- A shape other than a rectangle is the rectangle with parts closed off as out of bounds: nobody can stand, walk or shoot there.

More settings, objects and locations

CHANGED 10 NOV 2026 Was: 9 settings, 72 objects and 12 locations. Now: 17 settings, 118 objects and 19 locations.

- New settings: scrapyard, military outpost, saloon or casino, vault, farmstead, gas station, ruins, cave or mine. Their things are spread about with at least a meter to walk between them.
- New locations: shack, courtyard, parking lot, stretch of road, walled compound, cavern and open field.
- Each new object has a cover tier like the old ones: a hesco barrier is hard cover, a hay bale is soft, a crop row is concealment.

Names on the map

CHANGED 10 NOV 2026 Was: a token showed two letters, such as CC. Now: it shows the whole name, or the nickname when the enemy has one, on two lines when it is long.

Cover has health

CHANGED 10 NOV 2026 New.

- When a shot goes through cover, the cover takes the damage it stopped. Soft cover stops 10% of a hit, so it takes that 10%; hard cover stops half.
- Each tier lasted a set number of 5.56 Standard rounds (11 damage each): soft 15, hard 60, impenetrable 400. Its health was that many rounds of the damage it stops, so soft cover had 17 HP and hard cover 330.
- Open ground and concealment stop no damage, so they never break.
- Explosives hit objects for 3x their blast damage at that distance.
- Damaged cover shows a small health bar. At 0 it is destroyed and taken off the map. Settings > Cover health and familiarity.

Flimsy cover wears out faster, and protects less as it does

CHANGED 10 NOV 2026 Was: cover took the damage it stopped, so hard cover took the most and concealment never broke. Now: it is the other way round.

- A hit through cover hurts it by the shot's damage before cover, times a share for its tier: concealment x1.5, soft x1, hard x0.5, impenetrable x0.25. Misses and jams leave it alone.
- Each tier still lasts a set number of 5.56 Standard rounds: concealment 4, soft 12, hard 60, impenetrable 400. So its health is rounds x 11 x its share: concealment 66 HP, soft 132 HP, hard 330 HP, impenetrable 1100 HP.
- Concealment and soft cover protect in proportion to the health they have left: at half health a bush gives half its hit penalty and soft cover half its damage cut. The attack panel shows the percent left. Hard cover and impenetrable protect fully until they break.
- Explosives still hit objects for 3x, times the same share.

Square or hex grid

CHANGED 10 NOV 2026 Was: a 2m square grid. Now: the map can show 2m squares, hexes 12.5m across, or no grid.

The buttons are next to the zoom. The grid is only a picture: ranges are still measured in meters.

Chests

CHANGED 10 NOV 2026 New, for testing.

- Tick Chest next to Randomize room and a chest of ammo for the party's guns is placed a few meters in front of them.
- A chest opens for whoever starts a turn, or finishes a move, within R1 of it. Its loot goes into their pack and the log says what was inside.

Range ring and range snapping

CHANGED 10 NOV 2026 New.

- On anyone's turn a ring around them shows their hit chance with the weapon in hand at every range band: clear where they can't hit, light red at low odds through yellow, green only above 65%, brighter as it rises.
- The ring leaves out the target's own modifiers and cover.
- Hold Ctrl while dragging on a turn and the token snaps to the middle of the range band from the target (or the nearest enemy).

The accuracy ring shows line of sight

CHANGED 11 NOV 2026 Was: a soft halo of hit chance by range band, ignoring cover. Now: solid bands that drop behind cover.

- Each band is one solid color, from dark red at low odds to bright yellow at high odds, so lightness alone tells them apart.
- Behind each object the ring loses that object's cover penalty, and past several it keeps losing more. Where the chance reaches 0% the ring is clear.
- A black line marks every edge between where a shot can land and where it can't, at the ends of the bands and along the sides of cover.
- The ring still measures against a target with no modifiers of its own. The attack panel has the exact number for the target picked.

More cover, more settings, and placing things by name

CHANGED 11 NOV 2026 Was: +Cover and +Hard placed a plain box. Now: you pick what to place from a list and can name it first.

- +Cover lists every concealment and soft cover object, +Hard every hard and impenetrable one, each at its real size. +Hazard lists fire, radiation, toxic gas, acid, live wires, mines, spike traps and deep water. +Marker lists note, objective, loot, way in or out, trap, ambush point and waypoint.
- 31 new objects, among them wrecked trucks, tank traps, concrete pipes, fuel tanks, hedges, spiked barricades, burn barrels, hospital beds, subway cars, diner booths and pews.
- Six new settings: raider camp, hospital ward, subway station, diner, checkpoint and church.
- Settings lay out with more sense: barricades, tank traps and turnstiles stand in lines, pews in rows one behind another, beds and counters against the walls, stools along the open side of a counter, one altar or ticket booth, and most other things lined up the same way.
- Objects take the color of what they're made of (wood, metal, rust, stone, plants, cloth, sand, tile). The cover tier shows in the outline: dashed for concealment, thin for soft, thick for hard, thickest for impenetrable.
- Map tokens stand on a base: round for the party, dashed round for allies, a diamond for enemies. They are drawn smaller, so a map's scale shows.

How full a room gets

CHANGED 11 NOV 2026 New: Sparse, Normal or Cluttered next to Randomize room. Normal is the default and is the old amount.

- Sparse fills a setting to about 55% of normal and also leaves out about a third of an indoor plan's furniture. Cluttered fills it to about 160%.
- Indoor plans (home, office, factory, warehouse, police) are laid out room by room, so Cluttered adds little to them; it shows most on open ground and the spread-out settings.

The accuracy ring uses the target picked

CHANGED 11 NOV 2026 Was: the ring always measured against someone with no modifiers of their own. Now: with a target picked, it uses that target's own modifiers, as the attack panel does.

- Its hover text names the target. With nobody picked it works as before. The cover shading on top is unchanged.

A shot that only clips an object goes past it

CHANGED 12 NOV 2026 Was: a shot touching any part of an object's box counted that object as cover. Now: every object's box is a little smaller for shots.

- Each side is pulled in by 0.1 m, so a line that grazes an edge or corner is clear. It stands for peeking round a corner, and for the odd object that just doesn't block.
- An object is never shrunk below half its size, so thin things like fences and tree trunks still block.
- Only shots, cover and the accuracy ring use the smaller box. Walking, placing and drawing use the full size.
- Settings, Cover tiers: 'Object hitbox smaller by'. 0 is the old rule.

The queued move shows its length

CHANGED 12 NOV 2026 New: the dashed line of a queued move shows its length in meters, and the Move bar says how the character moves.

- For example: '12.4 m, 3 AP, walks 12.4 m at 6 m per AP (AGI 5), slowed x1.25'. The log line says the same.

Doors

CHANGED 12 NOV 2026 Was: buildings had gaps in their walls and no doors. Now: every doorway the room maker draws has a door, and the DM can place doors.

- A shut door stops walking and blocks sight: the attack panel's Cover tile says "no sight" and the log says the shot was blind, through a shut door. Shots still go through it.
- Its cover is its material: a wooden door is concealment, an iron door soft cover, a steel door hard cover.
- An open door is no cover and stops nobody. Select a door on the map to open or shut it. A door with someone standing in its doorway starts open.
- Each building setting has its own doors (Settings: roomThemes, door and innerDoor): homes, stores and clinics wood throughout; offices iron outside and wood inside; factories and warehouses steel outside and iron inside; police stations steel outside.

Hazards act

CHANGED 12 NOV 2026 Was: hazards on the map were labels only. Now: they act on whoever ends a turn in them, or near them.

- Fire: Burned goes up one tier (to 5) for each turn ended in it.
- Radiation: +25 rads for each turn ended in it. Toxic gas: Poisoned goes up a tier. Acid pool: 5 damage.
- Radioactive barrel (new object, soft cover): +10 rads for ending a turn within 2 m of it.
- Rad lake (new object, open, can be walked into): +25 rads and 3 damage for each turn ended in it.
- Resistances still apply to the statuses. Every number is in Settings. (Live wires, mines, spike traps and water came later the same day: see Traps on the way and Water.)
- The barrel's 10 rads was asked for. The rad lake's, the radiation hazard's and the acid's numbers are guesses to start from.

General store and clinic

CHANGED 12 NOV 2026 New settings, with floor plans that make sense when you walk them.

- General store: the counter and register by the way in, shelves in rows with aisles down the shop floor, a storeroom of crates and barrels behind a door at the back. Outside: a gas pump, a car, a dumpster.
- Clinic: a waiting room with benches and a reception desk by the way in, a ward of beds head to the wall with curtains between, and exam rooms along the far end, each with its own door, an exam table and a medicine cabinet.

Traps on the way

CHANGED 12 NOV 2026 Was: hazards acted only on whoever ended a turn in them. Now: mines, live wires, spikes and traps also go off when a confirmed walk passes through them, or within their reach.

- The DM confirms the walk first; then whatever the line crosses goes off, in the order it's reached. A trap that stops the walk leaves the walker standing where it bit.

- Mines explode like a small grenade where they're set off, hurting everyone in the blast, not just whoever set them off: a minefield [5, 2] damage out to 2 m (each mine walked over or stood beside), a buried landmine [8, 4, 2] out to 2.5 m. Cover in the blast is damaged too. These start low on purpose.
- Hidden traps (bear trap, tripwire, buried landmine, dart plate, snare) are drawn faint and dashed on the DM's screen and not at all on the players'. Once one goes off it shows, and a one-time trap is drawn spent.
- A party member with any of these perks spots hidden traps, so the players see them: Minelayer, Booby-Trapper, Seabee.
- Automated turns walk around every hazard their fighter can see, but not around hidden traps nobody has found.

Hazard	When	What it does
Fire	end a turn in it	Burned +1
Radiation	end a turn in it	+25 rads
Toxic gas	end a turn in it	Poisoned +1
Acid pool	end a turn in it	5 damage
Live wires	end a turn within 1 m or walk through it	6 damage, Electrocuted +1
Minefield	end a turn within 1 m or walk through it	explodes: 5 / 2 damage by meter out to 2 m, to everyone in it
Spike trap	end a turn in it or walk through it	4 damage, Bleeding +1
Deep water		nobody can walk into it
Shallow water		walking through it covers 75% of the usual distance per AP
Bear trap (hidden)	end a turn in it or walk through it	4 damage, Injured Limb (Leg/Arm) +1 (left leg), Bleeding +1, goes off once
Tripwire (hidden)	walk through it	8 damage, Bleeding +1, goes off once
Buried landmine (hidden)	end a turn within 0.5 m or walk through it	explodes: 8 / 4 / 2 damage by meter out to 2.5 m, to everyone in it, goes off once
Dart plate (hidden)	end a turn in it or walk through it	2 damage, Poisoned +2, goes off once
Snare (hidden)	end a turn in it or walk through it	Disoriented +1, the walk stops there, no AP left this turn, goes off once

Every number is a starting guess, in Settings under hazardFx.

Water

CHANGED 12 NOV 2026 Was: deep water was a label. Now: water is on the map in blue and changes how you walk.

- Deep water (a lake, a pond, or deep water placed with +Hazard) can't be walked into. Shots still cross it.
- Shallow water and a rad lake slow you: walking through them covers 75% of the usual distance per AP, so that stretch costs a quarter more. The move readout says when water slowed a walk.
- The room maker puts a lake (deep water ringed by shallows) on big outdoor maps (6000 square meters or more) 75% of the time (35% in a desert), and a pond on small wooded maps 50% of the time, never where the party stands.
- Deep water is dark blue, shallow water a lighter, fainter blue; both are named on the map and in the Key.

Traps go down with +Trap

CHANGED 12 NOV 2026 Was: hidden traps were in the +Hazard list. Now: the DM places them with their own +Trap button, the same way as cover; +Hazard keeps the ones everyone can see.

- Bear trap: 4 damage, an injured left leg (tier 1) and Bleeding 1, once. It no longer stops the walk or takes the AP.
- Tripwire: 8 damage and Bleeding 1, once. Buried landmine, dart plate and snare are unchanged.

Water has a natural shape

CHANGED 13 NOV 2026 Was: lakes, ponds and pools were ovals or squares. Now: each has an outline of its own, an oblong, a kidney or a bay, and a new one every time one is made or placed.

- The outline is the water: deep water stops a walk only inside it, and shallow water or a rad lake slows only the stretch walked inside it.
- Generated lakes follow their shallows' shape. Deep water, shallow water and acid placed with +Hazard get one too.

Terrain

CHANGED 13 NOV 2026 Was: every map was the same dark green. Now: the ground shows what it is.

- Indoors by setting: wooden planks in homes, stores, saloons and churches; tile in police stations, clinics, hospitals, diners and subways; metal plates in a vault; rock in a cave; concrete anywhere else.
- Outdoors by setting, then map, then environment: grass in forests, woods, fields and farms; sand in a desert or canyon; dirt in camps, scrapyards and outposts; asphalt on city streets and roads; concrete in ruins and courtyards.
- A building on open ground lays its own floor inside its walls. Floors are only a picture: they change no rules. The choices are in Settings (terrain).

Resize anything

CHANGED 13 NOV 2026 Was: an object kept its catalog size. Now: select any object and drag its corner handle, or type its width and height in meters. Shift drags to the centimeter; each resize is one undo step.

Objects block by their real shape

CHANGED 13 NOV 2026 Was: every object blocked shots and sight as a square box, so a shot past the empty corner of a boulder's box counted as cover, and the hit-chance ring's shadows had stepped, blocky edges. Now: each object blocks by its own shape.

- Rocks (small rock, medium rock, boulder) block by the outline the map draws for them.
- Other round things (bushes, logs, stumps and the like) block as the ellipse inside their box. A tree blocks at its round trunk.
- Crates, walls, cars and other boxes stay boxes, turned with the object.
- The hit-chance ring's shadows start at each object's outline, and their sides are straight lines of sight from the shooter.
- Every shape is still trimmed a little at the edges, so a shot that only clips a corner goes through. Walking past things uses the same shapes.

13. Modifiers: The Stat Converter

Traits, skill perks, accessories, weapon mods, encumbrance and situations all act through one tab. It has one row per source and one column per stat. When a source applies to a character, its row is switched on, and the character's total for each column is added into their formulas.

Source	Rows	How it switches on
Trait	88	Automatically, when the trait's roll code is on the character. Variant rows, such as a good or bad phase, are set by hand.
Trait Evolution	69	Manual checkbox.
Skill Perk	54	Manual checkbox.
Accessory	128	Automatically, when the item is on the character's Inventory and marked Active.
Weapon Mod	93	Automatically, the same way.
Effect (encumbrance)	9	Automatically, from the Inventory weight percentages.
Situation	45	Automatically from the Combat Sheet's Time, Weather and Environment choice. Cover by checkbox.

Multipliers start at 1 and add: two −25% AP effects make −50%, not −43.75%.

What is actually connected

Only some columns reach a formula. This is the main reason many traits and perks work on paper only.

Status	Stat Converter columns
Live	All SPECIAL and skill columns; HP * and +; DT; AP + and *; Carry and Carry /; Initiative; Saving; Skill Points; Total Acc; R1-R10; Enemy Acc; Damage; Crit Chance; AP Cost +; Reload; Pen.
Not read by anything	Crit D; AP Cost /; Count; Fail Ch; Capacity + and *; Weight; Crit, Super, Limb, Body, Head multipliers; Super Crit Roll; Super Fail Roll; Enemy Fail Roll; Debuff Ch; Debuff Eff; Addict Ch; Chem Eff; Buy; Sell; Money Talks; and all the weapon-type columns (Hot Laser … Mine).

BUG BG-07 Weapon-type filters do nothing. A perk such as Pistolero sets Total Acc +5% and flags Revolver, Semi-Auto Pistol and Plinker. The flag is never read, so the bonus applies to every weapon the character uses. Character 4' Pipe Pistol shows the +5% from One-Handed, and that same +5% would reach any other weapon the character picked up.

BUG BG-08 Situations are partly cut off. Most total columns sum rows 6-447, but situations live on rows 448-492. Only SPECIAL, skills, HP, DT, AP and Carry (to 492) and the accuracy columns (to 501) include them. Situational changes to Carry /, Initiative, Saving, Damage, Crit, AP Cost, Reload and Pen would be silently ignored. No situation uses those today, so nothing is broken yet.

UNFINISHED UF-09 Only 16 of 487 rows are marked Done. 87 are marked Variable (conditional, can't be a fixed number). The Roadmap says Skill Perks need "testing and integration into relevant calculations".

BUG BG-09 Crit modifiers. Weapon slot 1's crit chance reads fixed rows (`'Stat Converter'!`BH2, BH3, BH4) instead of the name lookup the other columns use, so it only works while party order matches. **Player 4's formula (AS22) leaves the modifier out altogether**, so that character never gets crit bonuses from traits or perks.

13. Modifiers: The Stat Converter: changes

Changes since the bible was compiled, oldest first. Where this page and page 23 disagree, this page is current.

Effects as variables

CHANGED 8 NOV 2026 Was: effects written as text only. Now: items, statuses, perks, traits and armor store them as these variables, in their fx and use columns.

Variable	What it changes
S	Strength
P	Perception
E	Endurance
C	Charisma
I	Intelligence
A	Agility
L	Luck
hp	Max HP, flat
hpMul	Max HP, multiplier
hpPct	Max HP, percent
ap	Max AP, flat
apMul	Max AP, percent
dt	Damage Threshold, flat
dtPct	Damage Threshold, percent
pri	Initiative
save	Saving throw
carry	Carry weight, flat
carryMul	Carry weight, percent
pts	Skill points per level
acc	Hit chance
enemyAcc	Enemies' hit chance against you
dam	Damage dealt, percent
dmgTaken	Damage taken, percent
crit	Crit chance
apCost	AP cost of attacks
reload	AP cost of reloads
pen	Penetration
r1 to r10	Hit chance at that range band
heal	Healing received, percent
regen	HP gained each round
dot	HP lost each round
turns	How long it lasts
mvm	Walking speed, percent
immobile	Can't walk
xpMul	XP earned, percent
buy	Vendor buy price, percent

Variable	What it changes
sell	Vendor sell price, percent
resistMental	Mental status resistance (shown, DM decides)
resistPhysical	Physical status resistance (shown, DM decides)
critMult	Crit damage multiplier, added
superMult	Super crit multiplier, added
critDam	Extra damage on any crit, percent
headMult	Head shot multiplier, added
critToSuper	Crits count as super crits
superKill	Super crits kill outright
superRoll	Widens the super crit band
failRoll	Widens the jam band
enemyFail	Widens enemies' jam band (shown, DM decides)
critBleed	Crits also apply Bleeding at this tier
knockChance	Chance a hit knocks the target out
debuffCh	Chance to apply a status, percent
debuffEff	Strength of statuses you apply (shown, DM decides)
apCostMul	Multiplies a weapon's AP cost
reloadMul	Reload AP, percent
count	Burst count
jam	Jam chance
magAdd	Magazine size, flat
magPct	Magazine size, percent
damFlat	Flat damage on the second melee attack
targetFree	Aimed shots cost no extra AP
swapFree	Swapping weapons costs no AP
itemFree	Using items costs no AP
itemAP	AP cost of items
clearJamAdd	AP cost of clearing jams
moveAdd	Extra AP for every move
chemEff	Strength of chems, percent
chemDur	Duration of chems, percent
addict	Addiction chance, percent
endHeal	Heal this share of max HP after combat
killAP	Regain this share of AP on a kill
apOnHit	Gain this much AP when hit
enemyInit	Enemies' initiative
lightHalf	Items of 2 lb or less weigh half
traitScale	All trait effects, percent
setC	Sets Charisma to this
resist:Status	Lowers that status's tier when it lands on you
weaponSkill	Skill with weapons the rule names
healOut	Healing you give, percent

Variable	What it changes
accMul	Multiplies final hit chance
nightPen	Share of night penalties that still apply
critPerRange	Crit chance multiplied by range band
superIgnoreDT	Super crits ignore DT
critNoAmmo	Crits use no ammo
critKnock	Crits knock the target out
hitBleed	Hits apply Bleeding at this tier
critDisorient	Crits apply Disoriented at this tier
critLimb	Crits cripple a random limb
crippleTaken	Limb injuries on you are one tier worse
limbMult	Limb hit multiplier on you, added
speechCap	Highest your Speech can be
startAfraid	Afraid tier at the start of each fight
noEW	Can't use energy weapons
noItems	Can't use items in a fight
capsMul	Extra caps looted, percent
ammoWeight	Ammo weight, percent
capsNoWeight	Caps weigh nothing
counterAP	AP cost of counter items
drinkAP	AP cost of drinks
swapFreeMelee	Free swap to melee
swapFreePistol	Free swap to a pistol
saveMul	Saving throw odds, percent
lucky	A chosen last digit always crits
vengeful	Your next hit crits after you take a crit
inspire	Adds the Inspire action
auraEnemyAcc	Enemies' hit chance on allies close to you
debuffAdd	Status chance, added in percent
moveMaxM	Farthest you can walk in one move
ignoreTier	Ignores harmful statuses up to this tier
lunge	Melee can reach R2
BAR	Barter skill
EW	Energy Weapons skill
EXP	Explosives skill
SG	Small Guns skill
BG	Big Guns skill
LPK	Lockpick skill
MED	Medicine skill
MW	Melee Weapons skill
REP	Repair skill
SCI	Science skill
SNK	Sneak skill

Variable	What it changes
SPE	Speech skill
SUR	Survival skill

Rules with conditions

CHANGED 8 NOV 2026 Was: conditional effects written as text. Now: a condition turns a rule on for the shot in question: the weapon, the target's type, the range, the round, sneaking and so on.

Target types come from the enemy's name: robot, insect, ghoul, animal, human.

Level perk	Variables	When
Heritable	traitScale +0.25	always

Cards show modified numbers

CHANGED 9 NOV 2026 Was: cards showed the base SPECIAL and skills. Now: they show the numbers after every modifier.

A number that's up is highlighted and one that's down is red. Hovering shows the base. The Character window writes out every SPECIAL and skill in full, with its base beside it.

14. Environment and Situations

Every encounter sets a Time/Light, a Weather and an Environment. The Combat Sheet has one dropdown for each, which switches on the matching Stat Converter row for all players. The current default in the brief is **Daytime, Clear, Plains**.

Group	Name	Modifier in the sheet
Cover	Hard Cover	Enemy hit on you -25%
Time/Light	Daytime	—
Time/Light	Morning	—
Time/Light	Evening	—
Time/Light	Dusk	PER -3

Environment	Low Density Urban (Vegas Ruins)	—
Environment	Medium Density Urban (Freeside)	—
Environment	High Density Urban (Strip, DC)	—
Environment	Highway	—
Environment	Cave	—
Environment	Vault	—

UNFINISHED UF-10 37 of 45 situations have no modifier. Rain, fog, snow, sandstorm, The Cloud, alarms, altitude, all terrains and most lighting are names only. Roadmap Phase Two lists "Location Variance" as not started.

CONFLICT CF-07 **"Plains" does not exist.** The brief's default is Daytime - Clear - Plains. The environment list has no Plains. The sheet is currently set to **Grassland**, the closest match.

CONFLICT CF-08 **Darkness.** The Loop's example says darkness imparts −10 enemy chance to hit, and the brief repeats it. Stat Converter models darkness differently, as a PER penalty on *everyone* (Dusk −3, Midnight −5, Pitch Black −9). PER only affects range penalties and initiative. The −10 has no source. It looks like an OOC check result set by the DM, so this book treats it that way.

UNEXPLAINED UX-12 Thunderstorm gives +25 Sneak and Heatwave −50% AP (a harsh value worth a look). Desert gives −25% AP, even with no heat. Situation names like "Dense Forest (Santa Cruz)" and "Suburban (Irvine)" hint at real-world campaign locations.

Part III. Gameplay

How a session actually runs, step by step, built on the Rough Gameplay Loop tab.

15. The Gameplay Loop

This is the Rough Gameplay Loop tab, in full. Its **DM Must Check** column is what the DM has to get right on each step, and is the natural target for automation.

Step	What happens	DM must check	Example
Pre 1 ALERT! Encounter	The party has encountered a potentially hostile encounter. DM describes situation and clarifies if there is a chance to perform pre-combat actions.	Exact number of enemies, Ranges they are at, if human: loadout, clarify options for OOC rolls, apply setting modifiers	P1, P2, P3, and P4 run into 3 raiders in suburban neighborhood at night. 2 at R5, one at R6. P4 is an alcoholic and a Ghoul.
Pre 2 OOC Pre-Combat	The party is faced with opportnities to roll/check for alternate solutions in OOC. DM describes exact level of difficulty of rolls, performs them, then describes consequences from roll, 1 Check per player	Describe situation without "teeing" (fishing for specific check) or "railroading" (you cannot do x) (every check does something), must describe difficulty of roll after check is requested and before roll is performed	P1 performs science check at 10 difficulty and succeeds. Enemy is in darkness. P2 rolls for Repair and fails. P4 drinks a bottle of beer. P3 elects no OOC actions.
Pre 3 Check for Changes	Once the party has completed OOC Checks, DM describes new situation. DM clarifies additional OOC opportunities. DM Asks for final loadouts and prepare for combat.	Reaffirm exact number of enemies, Ranges they are at, if human: loadout, clarify changes made by OOC rolls, submit combat loadouts	Darkness imparts -10 enemy chance to hit. P2's weapon stays at 5 CON. P4 gains +1 STR and +1 CHA from Beer. All 4 party members submit combat loadout.
Pre S Pre-Combat Stealth Rolls	For Sneak: party can "stealth" perform turn (with AP etc.). Every action comes with a D20 roll (Sneak/5 - 5 for odds). If still concealed, can continue or stay hidden. Caught: initiative -10	Check players' sneak level and base combat stats, roll after each action/shot (not string or turn), check for bonuses/nerfs from items/perks/traits, note if remains concealed	P3 decides to use sneak roll. Spends 4 AP to fire rifle once, and rolls a successful sneak check. Then fires again for 4 AP, and fails his check. DM calculates stat changes from Sneak move
Pre 4 Roll for Initiative	Party rolls for initiative ([D20 Roll] + ((AGL+PER)/2)), Enemies are either given set initiative or must roll. Set up lineup for turns.	All players' SPECIAL, enemy rules for initiative, any perks which improve/reduce initiative, Double check math	Party and Enemies roll for initiative. P4 has "Made Peace" Trait (+3 Initiative). P3 has Sneak broken (-10 Initiative). Order is P4, P2, Raider 1, P1, Raider 2, Raider 3, P3
Com 1A Player Action	(Depending in initiative) Player submits AP to peform a combat action (Movement/Attacks/Items) or IC Skill roll (retreat/hide/etc.). Must submit AP tokens when confirming.	Which player on sheet is targeting which enemy, AP/shot for chosen weapon, number of shots/actions with given AP. Any changes to AP due to perks.	P4 has 10 AP. P4 elects to fire twice to the Raider at R5 with Burst Pistol using HP ammo for 3 AP. P4 turns in 6 AP tokens to confirm action.
Com 1R Player Rolls	Player performs action. Attacks roll two D-10 dice to calculate hit chance, skills roll D20, divisible for auto hits, movement is done. Success/failure is marked down before calculating stat result.	Chance to hit given weapon (including crit chance), changes to hit/crit chance given perks/traits, documents items used and degree of effect. Check if automatic and roll for bullets hit.	P4 has no perks which chance accuracy. P4 rolls for hit chance. Burst 1 Hits. Burst 2 Crits. P4 Rolls for # of bullets hit. Burst 1 hits twice, Burst 2 hits 3 times.
Com 1C Player Combat Result	Effects of players' actions are calculated (HP loss from combat, stat changes from item). If AP available, DM asks if player would like to make additional actions.	Damage calculation checking to confirm correct ammo and target stats, Changes to Skills, SPECIAL, HP from items; New Ranges of enemies, notes changes to hit chance from cover, applies status effect changes, ammo remaining in magazine	P4 has killed Raider 1 with attack. DM notes bullets lost from move and any changes to stats. P4 is asked for moves with remaining AP.
Com 2 Confirm End of Player Turn	If player has no more AP, or elects to end turn, confirm final placement and rotate combat roster	Check correct order of initiative, make note of any status effects inflicted or enemies killed	P4 fires one more burst and misses, then spends 1 AP to reload. DM then confirms P4's turn is over and removes Raider 1 from roster. P2 is asked for their move
Com 3A NPC Action	(Depending in initiative) DM Submits AP to peform a combat action (Movement/Attacks/Items) or IC Skill roll (retreat/hide/etc.). Must submit AP tokens when confirming. Moves submitted all at once	Which NPC is targeting whom (NPC/Player), AP/shot for chosen weapon, number of shots/actions with given AP.	Raider 2 Fires missile at P3 for 8 AP, using all available AP.

Step	What happens	DM must check	Example
Com 3R NPC Rolls	NPC performs action. Attacks roll two D-10 dice to calculate hit chance, simple difficulty roll for OOC, movement is done. Success/failure is marked down before calculating stat result	Chance to hit given weapon (including crit chance), changes to hit/crit chance on player given perks/traits, documents items used and degree of effect	DM rolls for NPC hit chance. Raider hits P3. DM checks for any changes to stats/status effects.
Com 3C NPC Combat Result	Effects of NPC's actions are calculated (HP loss from combat, stat changes from item).	Damage calculation checking to confirm correct ammo and target stats, Changes to Skills, SPECIAL, HP from items; New Ranges, notes changes to hit chance from cover, applies status effect changes, ammo remaining in magazine	DM calculated HP inflicted from NPC actions. P3 has been downed from NPC action. P2 has "Sensitive Hearing" and loses 4 PER from action.
Com 4 End Turn Rolls	Once entire roster performs turns, perform rolls for any checks (Split Personality, Saving Throw)	Check for downed players, check for special traits, if player leaves combat: describe new situation	P3 rolls a Saving Throw and fails. Raider 3 rolls a Flee check and succeeds.
Com 5 Post Turn Summary	Tally up all combat actions and describe all changes to friendly and enemy charachters, recheck any charachters killed/stunned/fled	Redescribe and clarify new ranges and situations, remove all killed enemies and make note on roster of any changes to initiative for next turn	There are no changes to range on either side. P1 gains +1 initiative for next turn, leaping ahead of P2 who loses 2 from Trait. Round is completed, tallied, and documented by DM. Next round begins with order confirmed.
Com 6 End of Combat Summary	When all enemies are dead/gone: calculate HP and add passive heal post combat, document changes to item and ammo count, Apply XP. Roll for addictions or other post combat	XP given by enemies total, and loot dropped. Calculate HP levels with passive heal, check for any relevant traits/perks, document items used, rounds elapsed. Roll for/apply addiction. Count off for round sensitive effects (chems, healing etc).	Another round is performed, and Raider 2 is killed. Raider 2 has 9mm Pistol, which P1 takes. Party HPs are read out with addition of passive heal. P2 used Jet in round 2 and rolls for addiction. P2 passes roll. Ammo and items removed from inventory. P4 loses 2 turns of beer effect.
Post 1 Post-Combat Preparation	The party has found a solution to the threat. You are now OOC. Describe new situation. Allow party to make OOC skill rolls (no limit), apply further items OOC, and manage inventory	Describe situation without "teeing" (fishing for specific check) or "railroading" (you cannot do x) (every check does something), document any changes to stats made in this phase, suggest reloads and inventory magement.	DM describes scene post-combat. P1 rolls a Medicine check to revive P3. P1's roll passes. P3 returns to the fight with "Shock" debuff. Party members take tally of items, heal themselves and eachother. Players free to edit inventory as long as submitted to DM.
Post 2 Finalize and Traverse	Once the party has completed all Post-Combat requests, ask for any further actions. Prompt either movement, waiting, or follow up encounter.	Confirm all inventory, statuses, stats when asked by party members. Prompt possible follow up actions and prepare sheet for next encounter.	DM traverses situation given the changes made previously. The party elects to set up camp for the night. The DM describes the sitation and applies passive healing to all members. P3's "shock" debuff is removed. P4's beer effect expires and goes into withdrawal.

Example names (P1, P2, P3, P4) are the sheet's own. Wording is transcribed from the sheet.

16. Pre-Combat

Pre-combat exists so a fight can be shaped, or avoided, before initiative. Its effects must carry into combat.

Step by step

1. **Alert (Pre 1).** The DM states exact enemy numbers and ranges, human loadouts, what OOC rolls might be possible, and setting modifiers.
2. **OOC checks (Pre 2).** Each player may make **one** check, use an item or pass. The DM names the difficulty once the check is requested. Results change the scene.
3. **Check for changes (Pre 3).** The DM re-states the new situation, and players submit final combat loadouts.
4. **Stealth (Pre S).** Optional, see below.
5. **Initiative (Pre 4).** Everyone rolls. The order is set.

Example of carry-over

Check	Result	Carries into combat as
Science at difficulty 10: success	Enemy is in darkness.	−10 enemy chance to hit.
Repair: failure	Weapon not improved.	P2's weapon stays at Condition 5.
Drinks a beer	Item effect.	+1 STR, +1 CHA, timer running.

Stealth (Pre S)

Instead of waiting for the fight, a player can act from hiding, performing a turn with AP as normal. **Each action** (each shot, not each turn) comes with a d20 stealth roll. While still concealed, they may continue or stay hidden. If caught, the character's initiative takes **−10**.

```
Sneak roll: D20 Roll (Sneak÷5 – 5 for odds)     quoted from the Loop tab
```

> **UNSURE US-13 The sneak formula is ambiguous.** "Sneak/5 − 5" at Sneak 50 gives 5, and gives 1 at Sneak 30. It could be a target to roll under, or a modifier. This book cannot tell which, and it does not match the standard skill-check formula. The Roadmap marks Sneaking as "Process in Gameplay Loop, Need to Review".

> **UNFINISHED UF-11 Sneak attack benefits have no base rule.** The Loop says "DM calculates stat changes from Sneak move". Sneak perks "increase Sneak Crit Bonus" and name multipliers like 2x and 3x, but the base bonus is defined nowhere. What sets the difficulty, and what enemies do once alerted, is also undefined.

Initiative (Pre 4)

```
Initiative = d20 + (AGL + PER) ÷ 2 + modifiers
```

- Order: highest first. Ties go to the higher base initiative (Combat Sheet!B15's sort).
- Enemies "are either given set initiative or must roll".
- Being caught sneaking is −10. Traits and statuses (Made Peace +3, Hope, High, Peacock "always first", Lethargic "always last") adjust it.
- Initiative can shift between rounds: "P1 gains +1 initiative for next turn, leaping ahead of P2".

DECIDED, SEE 29a

> **RESOLVED UF-12** No rule picks between set initiative and rolled initiative for enemies. The Loop only says "enemy rules for initiative". Grouping ("Raider 1, 2, 3" act separately in the example) is implied.

16. Pre-Combat: changes

Changes since the bible was compiled, oldest first. Where this page and page 29 disagree, this page is current.

Initiative

CHANGED 8 NOV 2026 Was: no rule picked between set and rolled initiative for enemies (UF-12). Now: everyone rolls. Resolves UF-12.

Initiative = d20 + (AGL + PER) / 2. Players type their roll or press the dice button. Enemy rolls are filled in, and the DM can change them. A sneak attack starts with a stealth phase: each action gets a d20 stealth roll, and anyone caught takes -10 initiative.

17. Combat Turn Structure

A player's turn (Com 1 and 2)

1. **Declare.** Pick an action. For an attack: which enemy, weapon, ammo, and how many shots with the AP on hand. Hand in the AP tokens.
2. **Roll.** Attacks roll 2d10. Skill rolls use d20. Movement just happens. Mark success or failure **before** working out results.
3. **Resolve.** Damage, item effects, new ranges, cover, statuses, ammo left in the magazine.
4. **Continue or end.** If AP is left, the DM asks about more actions. Otherwise the DM confirms final position and moves on.

An NPC's turn (Com 3)

The same as a player's turn, but the DM declares all of one NPC's moves at once, then rolls. Non-attack NPC actions use "simple difficulty rolls". NPCs can target other NPCs as well as players.

> **UNEXPLAINED UX-13** **NPC targeting has no rule**, which seems intentional. The DM chooses. Traits force some cases: Peacock ("all enemies target you first"), Blinded by Rage ("Mob: target all").

End of round (Com 4 and 5)

- **Com 4:** rolls for downed players (saving throw), special traits (Split Personalities), and enemy flee checks. If anyone leaves combat, describe the new situation.
- **Com 5:** tally all changes, re-check who is dead, stunned or fled, restate ranges, and update turn order for next round.

> **UNFINISHED UF-13** **Enemy flee checks have no rule** ("Raider 3 rolls a Flee check and succeeds"). No morale stat or threshold exists. Afraid mentions involuntary fleeing and Coward says "always pass flee", so player fleeing is also undefined.

Ending combat (Com 6)

When all enemies are dead or gone: compute HP and apply passive healing; update item and ammo counts; apply XP; check loot; roll addictions; count down round-based effects such as chems.

DECIDED, SEE 34a

> **RESOLVED UF-14** **Passive healing has no number.** The Loop says "add passive heal post combat" and again at camp, but no amount or formula exists. The brief does not cover it. Perks only imply it exists: Bounceback "regain 20% HP at end of combat".

> **UNSURE US-14** **Time units.** Effect timers are in turns in some places ("P4 loses 2 turns of beer effect") and unlabelled in others (Items Duration: 24, After Time: 12). A combat round is presumably one "turn", but how OOC time counts is unclear. Roadmap Phase Two lists "OoC Time" as not started.

Not in the formulas

> **UNEXPLAINED UX-14** The Combat Sheet has a Bloody Mess flag and a "Hit EN" counter, a Split flag and a UN Kill counter. These are per-player trait trackers placed in fixed slots, so they only work for the current party.

> **UNFINISHED UF-15** **Weapon Condition** sits on the sheet as a 1-10 value (usually 10) that worsens jam chance. Nothing makes it fall. The Weapon Repair Kit improves it "by Rep/20", and Jury Rigging repairs with similar weapons. No wear rate exists, and the brief's flat jam % leaves Condition with no role at all.

DECIDED, SEE 31a

RESOLVED UF-16 **Limb damage and crippling.** Injured Limb tiers exist, and traits talk about "cripple chance", "limbs cripple 2x quicker" and "double durability". No limb HP or cripple roll exists.

17. Combat Turn Structure: changes

Changes since the bible was compiled, oldest first. Where this page and pages 30-31 disagree, this page is current.

Taking a turn

CHANGED 8 NOV 2026 Now: the app runs the turn.

- The action column opens with who is acting, their AP and End turn.
- **Loadout:** your weapons, with AP cost, magazine and ammo carried.
- **Target:** click anyone on the map or in a list. Range and cover fill in from the map. Click a body part.
- **The aim line** is colored by the weapon's accuracy at that distance: red at its worst band, green at its best.
- **Roll:** type the two-dice roll or press the dice button. The math line is there to read aloud.
- The card of whoever's turn it is has a thick flashing border.

Injuries from crits

CHANGED 8 NOV 2026 Was: injured limb tiers existed, but nothing said when they happen (UF-16). Now: a crit on a body part adds a status. Resolves UF-16.

Part hit	Status	Tier
Head	Disoriented	1 on a crit, 2 on a super crit
Body	none	
Arm or leg	Injured Limb (Leg/Arm)	1 on a crit, 2 on a super crit

Crippled parts show on the Health tab's body map (chapter 27).

Rounds roll on

CHANGED 10 NOV 2026 Was: every round ended on a screen with a Start round button. Now: when the last turn ends, the next round starts by itself.

The end-of-round screen only stops play when someone is down and has a saving throw to roll.

A fight ends by itself

CHANGED 11 NOV 2026 Was: with one side down, rounds went on until someone pressed End. Now: at the end of a round, a side with nobody left ends the fight.

- No enemy standing: the after-action screen opens.
- Nobody in the party standing, allies included: the defeat screen opens.
- Mid-round, a large End the fight (or Defeat) button shows as soon as one side is out, for ending it right away.

Auto: the app can play an enemy's turn

CHANGED 12 NOV 2026 New. Optional: unless Auto is pressed, the DM plays the enemy as before.

- On an enemy's or ally's turn an Auto button sits next to End turn. It plans the turn and shows it: where they'll walk (a ghost at the end of a dashed line), who they'll shoot and the odds. Nothing has happened yet.
- Confirm (or Enter) plays it with real dice and ends the turn. Cancel (or Esc) drops it. The whole turn is one combat log line, with every roll a click away, and one Undo.
- The plan is the same for every enemy for now: if HP is below 40% use a healing item; at Bleeding 2 or worse use something for bleeding. Then pick the target and weapon with the best expected damage.
- If the odds are 25% or better, shoot from where they stand. Otherwise walk toward the weapon's best range band, keeping enough AP for a shot; if no shot is possible even then, spend the whole turn walking in.
- Reload an empty gun first if there's ammo and AP for it. Attack up to 3 times, never at under 10%, stopping if the target goes down.
- Settings, Enemies and inventory: the five Auto numbers. Dispositions (cowardly, reckless and so on) can be added later.

Automated turns think more

CHANGED 12 NOV 2026 Was: walk toward the weapon's best range, heal when badly hurt, shoot. Now: it also weighs these, by disposition.

- Running away (and leaving the fight at the map's edge), stepping out of a hazard it's standing in, and walking around hazards it can see.
- Clearing a jammed gun when it has nothing as good to fall back on.
- Which foe to go for: the best odds, the nearest, the weakest, the most hurt, the toughest, whoever hurt it last, or whoever is closest to its toughest ally.
- Where to stand: charge in, the weapon's best band, the farthest band it can still hit from, a spot behind cover, a spot round the side with a clearer line, or hold its ground.
- A grenade at two or more foes bunched together, never with a friend near the blast.
- Aiming for the head when that still hits often enough, how many attacks to make, and ducking back into cover with the AP left.
- Spots that score alike are picked with a little chance, so two fighters of the same disposition don't move in lockstep.

Automated turns don't stand still

CHANGED 12 NOV 2026 Was: when furniture or a wall blocked the straight line to its target, or it was already at the right range with no clear shot, an enemy could stand idle. Now it searches for a way.

- It looks at every spot it can reach (finer rings, and rings round the target itself), by one walk or two (round a wall or a row of crates), for the best place to fire from, the way its disposition likes it.
- With no shot from anywhere in reach, it closes in by the route that gets nearest its target, favoring spots with a clear line.
- A gun that's empty with nothing to load is set aside for another weapon. The plan says when a fighter simply has no AP.

Only the acting token takes clicks

CHANGED 13 NOV 2026 Was: when tokens were bunched up, a click meant for the fighter whose turn it was could land on a neighbor, so a move or action didn't happen. Now: in a fight only the token whose turn it is takes clicks, and it's drawn on top.

- While the attack panel is open, every token can be clicked again, to pick a target (an ally too).
- Hold Shift to grab any token, as the DM, to move someone out of turn.

18. Down, Defeat and Revival

Sources: the brief, plus the Loop and CS Worksheet scripts. The sheet only displays Dead/KO.

Going down

Player characters generally do not die. At 0 HP or below, a player goes **DBNO** and stays in the initiative list. Enemies at 0 HP die and are removed from the roster. The CS Worksheet script reads: "HP<1 > display 'dead' OR K/O > if KO display Saving throw odds > eliminate from initiative".

> **CONFLICT CF-09** CS Worksheet says a KO character is *eliminated* from initiative. The brief says to keep a DBNO state *in* initiative. The brief is treated as current. The trait Fear of Death and Cloud Poison's "Above this point you die" hint that real death exists somewhere.

Saving throw

Rolled at the end of every round for each downed character. The sheet computes a number per character:

```
Save = ROUNDDOWN((LCK × 0.1 + (Survival ÷ 2)% ÷ 2) × 20) − 1 + modifiers
Example: LCK 8, Survival 7: (0.8 + 0.0175) × 20 = 16.35 → 16 − 1 = 15
```

> **BUG BG-10 Cap** (known). In Player Sheets!AN2 and Enemies!AR2, a value above 20 becomes 19, while exactly 20 stays 20. So a stronger character gets a worse number. It should cap at 20.

> **CONFLICT CF-10 Revive penalty is missing from the formula.** Gen Info writes the save as ((LCK×10%) + (Survival÷2)% − (Times Revived×20%)) ÷ 2. The sheet's version has no Times Revived term, and its ÷2 is only on the Survival part. The brief says Times Revived is −20% each.

> **UNSURE US-15 Roll direction is not stated.** Since higher LCK gives a higher number, the only sensible reading is: roll a d20, and succeed **at or under** the number. The perks Saved by the Bell ("improves Saving throw by 1 roll") and Last Stand ("*2 odds") fit that, as does the formula's % origin.

> **UNFINISHED UF-17 What a saving throw does is undecided** (brief, and Roadmap: "What happens after saving throw"). Does success get you up, stabilise you, or hold off death? What does failure do? Does Times Revived ever reset, and does it have a floor? Both are open.

Revive

An ally can revive a downed character with a **Medicine check** as an action. A revived character gets the **Shock** status (Loop example: "P3 returns to the fight with 'Shock' debuff"; it's removed by resting). Traits and perks change this: Vanguard (50% revive, full turn), Golden Blood ("only revive with 80+ Medicine or Science"), Sedated Tier 5 ("always pass saving throw").

> **UNSURE US-16** The Loop's revive example happens post-combat, but it also says the character "returns to the fight". The brief calls revive an ally action, implying in combat too. HP on revival, difficulty, AP cost and Shock's tier are all unset. Shock's tiers range up to "functionally useless in combat".

Defeat

If everyone is down, or the DM calls it, the encounter is lost. The DM decides what the party loses, and inventories update. This choice stays manual. Consequences are story and materials, not character deaths.

DECIDED, SEE 33a

RESOLVED UF-18 **XP after a defeat is undecided** (brief). No defeat rule exists in the sheet at all.

18. Down, Defeat and Revival: changes

Changes since the bible was compiled, oldest first. Where this page and pages 32-33 disagree, this page is current.

Healing items and Revive

CHANGED 8 NOV 2026 Was: unclear whether healing items stand up a downed character. Now: they don't, except the Surgeon's Kit, whose text says it can.

Otherwise use Revive: 3 AP, back up at 1 HP with Shock 1. Each revive lowers that character's save by 4.

XP after a defeat

CHANGED 8 NOV 2026 Was: undecided (UF-18). Now: a defeat gives 0% of the XP. The DM can type a different number on the end screen. Resolves UF-18.

Down when the fight ends

CHANGED 10 NOV 2026 Was: a character who was down when the party won stayed down at 0 HP, and after a defeat everyone came back up at the revive HP. Now: it depends on who won.

- The party wins: anyone down gets back up on 50% of their max HP.
- The party loses: anyone down gets back up on 10% of their max HP, and never less than the revive HP.
- The DM can type a different heal on the end screen. Both shares are in Settings, under Downed and revive.

Saving throws are rolled high

CHANGED 12 NOV 2026 Was: roll at or under the save number on a d20. Now: roll the number or more; 20 is always best.

- The number to beat is 21 minus the old one, so the odds are the same: an old save of 15 (at or under) is now 6 or more.
- The sheet still stores the old number; the screens show the new one.

19. After the Fight

Post 1: Preparation

The party has solved the threat and is out of combat. **OOC skill rolls have no limit here**, unlike pre-combat. Players apply items, heal, revive and manage inventory, and may edit inventories freely as long as changes are submitted to the DM. The DM suggests reloads and inventory management.

Post 2: Finalize and Traverse

The DM confirms inventory, statuses and stats when asked, then prompts for movement, waiting or a follow-up encounter. Resting applies passive healing and clears some effects, and can start withdrawal when something expires.

Addiction and after-effects

An item can have an Addiction %, and rolling it comes at end of combat ("P2 used Jet in round 2 and rolls for addiction"). Items may have an After Effect with a trigger and time, and a Withdrawal with its own effect and time.

DECIDED, SEE 34a

RESOLVED US-17 The roll type for addiction is not stated; d100 fits a percent best. Most chems have no percent filled in. See Chapter 40.

UNFINISHED UF-19 Survival mechanics exist only as statuses (Hunger, Thirst, Fatigue) and food, drink and sleep items. Nothing says how often they tick, or what drives them. Traits and perks reference them, for example New Gen Synth's "50% reduced survival mechanics" and Roughin It.

19. After the Fight: changes

Changes since the bible was compiled, oldest first. Where this page and page 34 disagree, this page is current.

Healing, loot and addiction

CHANGED 8 NOV 2026 Was: passive healing had no number (UF-14), and the addiction roll wasn't named (US-17). Now: Resolves UF-14, US-17.

- Passive heal: 10% of max HP after a fight and on each Rest. Downed characters don't heal this way.
- Loot: each defeated enemy's gear is listed, with up to 2 extra consumables each. Tick what the party takes, give it all to one person, or add items by hand.
- Addiction: for each addictive item used in the fight, roll a d100. At or under the item's addiction chance, the character is addicted.
- XP is worked out for each player (chapter 21), and can be changed before it's given.

No resting in a fight

CHANGED 10 NOV 2026 Was: Rest could be pressed during a fight, which healed the party and refilled everyone's AP. Now: Rest is only offered between fights.

Survival and Luck decide loot

CHANGED 10 NOV 2026 Was: every item on a body was looted. Now: how much the party finds depends on its best looter.

- Looting score = Survival + 10 x Luck, from the best player still standing. Survival 100 with Luck 1 scores the same as Survival 10 with Luck 10.
- Weapons, the ammo loaded for them and worn armor always come off the body.
- Everything else, caps included, comes off in proportion to the score: all of it at 120 or more.
- Each body also gives extra finds: about 0.02 per score point, at most 6. They are mostly consumables and ammo for the party's guns, with some junk. A higher score finds better things and reaches a tier higher for every 100 points.
- Fists and natural attacks are no longer listed as loot. Settings > Looting.

A good loot roll finds a little more

CHANGED 12 NOV 2026 Was: the d20 loot roll on the after-action screen only showed a tier shift. Now: a good roll adds finds.

- Loot is still what the enemies carried (their weapons, ammo, armor, consumables and junk), scaled by the best looter's Survival and Luck.
- A loot roll of 17 or more adds one extra find to each body, 20 adds two. These finds are a tier better than the usual ones, and the list marks them 'good roll'.
- Settings, Enemies and inventory: the two roll numbers.

20. Handling NPCs

Source: the brief. These are DM procedures, with the sheet supplying the base data.

- **Template versus copy.** The Enemies tab holds templates. Each enemy in a fight is an independent, editable copy: rename it, change SPECIAL or skills (derived stats recalculate), change tier, reroll gear. The template never changes.
- **Loadout.** Enemies generate suitable non-unique weapons and loot for their tier.
- **Make Boss.** Randomised +10-30% to HP and damage, weapons up one tier, XP scaled to match. It stays editable afterward.
- **Named NPCs.** A recurring villain can be saved. Example: add three Raider Veterans, rename one the raider boss, and raise their stats.

DECIDED, SEE 35a

RESOLVED UF-20 **Human enemies have no gear.** All generic humans in the Enemies tab have blank weapons and armour, and the only populated rows are test rows and five named characters (four Powder Gangers and Sunny Smiles). The generation rule has to be written from scratch, and the sheet offers no way to judge it.

DECIDED, SEE 154a

RESOLVED BG-11 **"Non-unique" cannot be checked.** The Master List tab (GLT) has a Unique? column, but every row is False, including one-offs such as The Terrible Shotgun and Annabelle. The faction loot columns (Raider, NCR, Legion, BoS and others) are entirely empty.

UNSURE US-18 "Raider Veteran" in the brief's example is not in the Enemies tab. There is Raider, Strong Raider and a generic Veteran. "Strong" variants differ from the base in XP and individually typed stats, with no stated rule.

20. Handling NPCs: changes

Changes since the bible was compiled, oldest first. Where this page and page 35 disagree, this page is current.

Names and ranks

CHANGED 9 NOV 2026 Was: generic enemies were numbered, such as Raider 1. Now: each gets a name from its faction, such as Legion Recruit - Aquilius.

Military factions get ranks that fit the enemy's tier, so a low-tier trooper can be a private and a ranger never is. Higher tiers get nicknames or epithets. Gangs use raider-style nicknames. The name lists are tables in the enemy editor: edit them and press Refresh.

Faction	Style	Ranks by tier
NCR	full	T1: Pvt.; T2: Pvt., PFC; T3: PFC, Cpl.; T4: Sgt., Staff Sgt., Lt.; T5:
Caesar's Legion	latin	T4: , Decanus; T5:
Raiders	gang	-
Fiends	gang	-
Jackals	gang	-
Vipers	gang	-
Highwaymen	gang	-
City Muggers	gang	-
Powder Gangers	gang	-
Great Khans	gang	-
The Kings	gang	-
Rogue Scavengers	gang	-

Enemy skills

CHANGED 9 NOV 2026 Was: enemies had no skill numbers. Now: from their tier, SPECIAL and weapon.

- Each combat skill starts from what a typical weapon of that skill and tier needs (the 75th percentile requirement).
- Add 3 for each point the skill's two SPECIAL stats average above 5, then a random amount up to 7 either way.
- A skill for a weapon the enemy carries never falls short of that weapon's requirement. Skills for weapons they don't carry start from 60% instead.
- Skills stay between 0 and 100.

Creature attacks pierce

CHANGED 9 NOV 2026 Was: creature attacks had no Pen, so any armor cut them to the damage floor. Now: a creature's attacks have Pen 4 per tier (a tier 5 Deathclaw has 20).

Enemy toughness

CHANGED 9 NOV 2026 Was: enemy humans gained 6 HP a tier. Now: 5 a tier, so HP = 15 + END x 2 + (tier - 1) x 5.

Enemy gear

CHANGED 8 NOV 2026 Was: human enemies had no weapons or armor (UF-20). Now: gear is picked for the enemy's tier, plus up to 2 consumables. Unique weapons are never picked. Reroll on the enemy's card for a new set. Resolves UF-20.

Enemies carry real inventories

CHANGED 12 NOV 2026 Was: one magazine's worth of ammo and up to two random consumables. Now: a carried kit, like a player's.

- Each gun comes with 2 to 3 spare magazines, on hand. A gun that holds one or two rounds carries 10 loose.
- 60% carry a healing item of their tier or lower (sometimes two), and 40% something for bleeding. Both are on hand, so they can be used in a fight.

- Up to 2 other consumables and up to 2 kinds of junk (crafting materials) in the pack.
- All of it has weight, so it counts toward encumbrance, and all of it can be looted.
- More variety: the second weapon is a melee weapon most of the time, a sidearm (pistol or revolver) 25% of the time, and nothing 10% of the time. 30% carry a magazine of another load for their main gun, chems are kept on hand, and from tier 2 15% carry a grenade.
- Unique weapons and armor are never handed out to generated enemies.

Low-tier animal bosses are easier to hurt

CHANGED 12 NOV 2026 New: creatures at tier 1-3 that are bosses lose 30% of their DT (rounded down).

- Bosses are the named ones (an alpha, mother, bull, queen, king, leader, legendary...) and any creature the DM makes a boss. Robots don't count.
- Today that changes Coyote Den Mother (DT 5 to 3) and Coyote Pack Alpha (2 to 1); Bighorner Bull has no DT. Settings: the share and the highest tier.

Dispositions

CHANGED 12 NOV 2026 Was: every enemy played an automated turn the same way. Now: each enemy and ally rolls a disposition when the fight begins, and plays its automated turns by it.

- The roll is weighted by the gear it carries (its longest-reaching weapon: melee; close for shotguns, SMGs and pistols; mid for rifles; long for scoped rifles), so nobody is rolled into hanging back with a shotgun or sniping with a knife.
- Humans, creatures (animals, insects, feral ghouls) and robots each have their own list. Its icon shows beside its name on the enemy card from the initiative screen on; the DM can click the icon to change it.
- A Craven, for one, hangs back at the farthest range it can still hit from, takes potshots from cover, and runs once more than half its side is down or gone, unless its side was only two.

Disposition	For	How it fights
Craven	human	Hangs back at the farthest range it can still hit from and takes potshots from cover. Runs once more than half its side is down or gone, unless there were only two of them.
Reckless	human	Charges the nearest foe, never takes cover, spends every AP on attacks and never runs.
Marksman	human	Holds a spot at its weapon's best range behind cover and aims for the head when the odds are good.
Tactician	human	Moves cover to cover at its weapon's best range, fires on whoever it hits best, ducks back after shooting.
Flanker	human	Circles round to a spot with a clear line past its target's cover.
Bully	human	Picks on whoever has the least HP left.
Vulture	human	Goes for the most badly hurt foe to finish them, and runs when its own HP drops under a third.
Zealot	human	Fights to the death against the toughest foe in sight, and only heals when nearly dead.
Mercenary	human	Fights carefully from cover for the best odds, and quits the fight once its own HP is under 40%.
Hothead	human	Goes after whoever hurt it last, closing in to do it; until someone does, the nearest foe.
Drug-fueled rage	human	Takes a chem it carries at the start of the fight, then charges the nearest foe in a rage: every AP on attacks, never heals, never runs.
Bodyguard	human	Stays with its toughest ally and shoots whoever is closest to them.
Feral	creature	Charges the nearest thing that moves and never stops.
Pack hunter	creature	Gangs up with its pack on the most hurt foe.
Skittish	creature	Attacks the nearest foe, but bolts once it's under half HP or most of its side is down.
Territorial	creature	Defends its ground: attacks anything that comes within 15 m, and doesn't chase farther.
Protocol	robot	Advances steadily on the nearest threat and never retreats.
Sentry	robot	Holds position and fires on anything it can hit; moves only when nothing is in reach.

Factions shape dispositions

CHANGED 12 NOV 2026 Was: a disposition was rolled on gear alone. Now: the enemy's faction multiplies each disposition's chance too.

- The Legion is almost never Craven and often a Zealot; Fiends are often in a drug-fueled rage; scavengers and muggers run more; crime families hire mercenaries and bodyguards. A faction not on the list rolls on gear alone.
- New disposition, Drug-fueled rage: takes a chem it carries at the start of the fight (once), then charges the nearest foe, spends every AP on attacks, never heals and never runs. On its own it's rare; Fiends, Khans and raiders roll it far more.

Faction	More likely	Less likely
Caesar's Legion	Zealot x3, Reckless x1.6, Bodyguard x1.5	Drug-fueled rage x0.05, Craven x0.1, Mercenary x0.3, Vulture x0.5
NCR	Tactician x2, Bodyguard x1.5, Marksman x1.3	Drug-fueled rage x0.1, Reckless x0.5, Craven x0.6
Brotherhood of Steel	Tactician x2, Zealot x1.8, Marksman x1.3	Drug-fueled rage x0, Craven x0.15, Mercenary x0.3
Fiends	Drug-fueled rage x8, Reckless x2, Hothead x1.5	Tactician x0.3, Bodyguard x0.3
Great Khans	Drug-fueled rage x3, Hothead x2, Reckless x1.5	Craven x0.5
Raiders	Bully x2, Drug-fueled rage x2, Vulture x1.5, Craven x1.4	Tactician x0.4
Jackals	Bully x2, Vulture x1.8, Craven x1.5, Drug-fueled rage x1.5	Tactician x0.4
Vipers	Bully x1.8, Vulture x1.5, Flanker x1.5, Drug-fueled rage x1.5	Tactician x0.4
Powder Gangers	Bully x1.5, Craven x1.3, Reckless x1.2	Tactician x0.5
Highwaymen	Craven x2, Vulture x2, Mercenary x1.5	Zealot x0.3
City Muggers	Craven x2.2, Vulture x2, Bully x1.5	Zealot x0.2
Rogue Scavengers	Craven x2.5, Mercenary x2	Zealot x0.2, Reckless x0.4
Crime Families	Mercenary x2, Bodyguard x2, Bully x1.5	Zealot x0.4
Omertas	Mercenary x2, Bodyguard x2, Bully x1.5	Zealot x0.4
Chairmen	Bodyguard x2.2, Mercenary x1.8, Tactician x1.3	Zealot x0.4
Garrets	Mercenary x2, Bodyguard x1.5, Craven x1.5	-
White Glove Society	Bodyguard x2, Tactician x1.5, Marksman x1.3	Reckless x0.3
The Kings	Hothead x2, Bodyguard x1.8, Bully x1.3	-
Super Mutants	Reckless x2.5, Zealot x1.5, Bully x1.5	Craven x0.1, Tactician x0.4
Tribals	Flanker x1.8, Hothead x1.5, Zealot x1.3	Craven x0.6
Boomers	Zealot x2, Tactician x1.5	Craven x0.4
Van Graffs	Mercenary x2, Bully x1.5, Bodyguard x1.3	-
Crimson Caravan	Mercenary x2, Bodyguard x2, Craven x1.2	-
Goodsprings	Craven x1.5, Bodyguard x1.5	Drug-fueled rage x0.1, Reckless x0.5

21. Experience and Levelling

Earning XP

XP is logged per character as a running list on the XP Count tab, and each entry is multiplied by INT:

```
XP earned = Base × (1 + (INT − 5) × 0.05)
Example: Character 3,         INT 8, 10 XP check → 10 × 1.15 = 11.5
```

- Enemies list XP on the Enemies tab.
- Checks can award XP: the tab labels entries "CHECKS", with 15 and 10 XP logged so far.
- Fractional XP is kept and not rounded.

> **UNFINISHED UF-21** **Action XP tab:** four action labels (Lockpicking, Healing, Repair Broken Limb, Speech Check) with blank Type and blank XP Formula. The Roadmap says "Enemy XP done, Action XP WIP". The brief confirms it stays manual for now.

DECIDED, SEE 36a

> **RESOLVED US-19** **Who gets enemy XP?** Not stated: the killer, everyone in full, or an even split. Arrogance ("x2 XP per kill") hints at a killer-based award, and the Loop's "XP given by enemies total" hints at a pool. Some traits award XP in other ways (Child At Heart: 15%, Sociopath: +5% for killing humans).

Levels

```
XP for level N = 50 × N × (N − 1)        Level 2 = 100, Level 3 = 300, Level 30 = 43,500
```

Level	2	3	4	5	6	7	8	9	10	11
XP	100	300	600	1,000	1,500	2,100	2,800	3,600	4,500	5,500

Level	12	13	14	15	16	17	18	19	20	21
XP	6,600	7,800	9,100	10,500	12,000	13,600	15,300	17,100	19,000	21,000

Level	22	23	24	25	26	27	28	29	30	
XP	23,100	25,300	27,600	30,000	32,500	35,100	37,800	40,600	43,500	

What each level gives

- **Skill points:** 10 + INT÷2 (rounded down) + modifiers, every level. Spent points count double on tagged skills.
- **+1 Max HP** (the Level−1 term).
- **A Level Perk on every even level**, 2 through 30.
- **Skill Perks** when a skill crosses 60, 80 and 100. See Chapter 25.

Level-ups earned in combat wait until combat ends. The player chooses, and the DM records it.

DECIDED, SEE 38a

> **RESOLVED US-20** Whether a level 1 character spends skill points at creation is unclear. Point columns begin at the Level 2 row, and starting skills come only from SPECIAL. Tagging therefore has no effect at level 1.

> **UNSURE US-21** The sheet has one level-perk slot per even level to 30, but the Level Perks tab has rows only to level 28 + "MAX". Traits reference "Skill Points per turn" (Ascetic, Gifted), likely meaning per level.

21. Experience and Levelling: changes

Changes since the bible was compiled, oldest first. Where this page and page 36 disagree, this page is current.

Who gets enemy XP

CHANGED 8 NOV 2026 Was: not stated (US-19). Now: every player gets the full XP of every enemy killed. Resolves US-19.

Each player's XP is scaled by INT: XP x (1 + (INT - 5) x 0.05). Settings can switch the award to an even split or to the killer only.

Part IV. Characters

Building a character, and the four currently on the sheet.

22. Character Creation

Source: START HERE, Starting Loot and Traits tabs, plus the brief.

1. **Name.** Brief: also a background and a specialization.
2. **SPECIAL.** Distribute **40 points** among the seven attributes. The sheet shows the pool remaining and warns "OVER" past 40.
3. **Tag three skills** (Gen Info: "Tag 3 for x2"). A tag doubles every skill point spent on that skill, and also grants starting loot.
4. **Choose two traits.** Any two from the 100-entry list.
5. **Roll the third trait.** A roll of 000-099 picks it (the sheet's column is "Trait 3 Roll (Add 0)", as codes have leading zeros).
6. **Take starting loot** from the tag table below.
7. **Choose clothing and gear:** Head, Armor, Vanity, three Accessories and two weapon slots.
8. **Compute derived stats** (Chapter 6) with all modifiers.

Starting loot by tag

Tag	Loot
BAR	Caps x Barter level x2
E W	Pipe Flamer + 50 Flamer Fuel
EXP	Pipe Rocket Launcher + 10 Rockets
S G	Pipe Pistol + 32 .32 ACP Standard
B G	Pipe Shotgun + 16 20 Gauge Shells
LPK	5 Bobby Pins
MED	3 Healing Powder
M W	Pipe Wrench
REP	2 Adhesive + 1 Screws
SCI	2 Circuity + 1 Fiberoptics
SNK	Soft Shoes
SPE	Toothpaste & Toothbrush
SUR	Bandages + Snakebite Torinuquet

DECIDED, SEE 38a

RESOLVED UX-15 **Backgrounds and specializations** appear in the brief's setup but nowhere in the workbook. They have no list or effects.

UNEXPLAINED UX-16 **Barter's starting caps:** the table says "Caps x Barter level x2". Character 4, who tagged Barter, has Barter 10 and 20 caps on the sheet, which fits Barter × 2, but START HERE lists "10 Caps" for the same character. Caps are typed by hand, not computed.

BUG BG-12 START HERE!AF2 repeats the first tag's loot three times ("Pipe Shotgun + 16 20 Gauge Shells" ×3) rather than listing each tag's loot. It's a broken text join. Item spelling in the table also doesn't match the item lists ("Circuity", "Torinuquet").

DECIDED, SEE 38a

RESOLVED US-22 Whether a player may reroll the third trait is unstated. The trait Devout mentions a "VETO ROLL" that isn't otherwise defined. Traits that change creation (Gifted, Autistic's 3× tag, Obsessive Compulsive's 4th tag, Split Personalities' second SPECIAL) are noted in Chapter 24.

22. Character Creation: changes

Changes since the bible was compiled, oldest first. Where this page and page 38 disagree, this page is current.

Building a character

CHANGED 8 NOV 2026 Was: backgrounds had no list (UX-15), and it was unclear whether level 1 spends skill points (US-20) or may reroll the third trait (US-22). Now: five steps. Resolves UX-15, US-20, US-22.

- Name and archetype. The archetype sets the starting kit.
- SPECIAL: each starts at 5, with at most 40 points in total.
- Traits: one is rolled, with a single reroll, then you pick two.
- Three tag skills, which gain 2 per point spent. No other skill points at level 1.
- Review, then the character joins the party.

Archetypes

CHANGED 9 NOV 2026 Was: a short list with tag lines. Now: 40 archetypes, each with a plain description and a kit that can defend itself and is dressed.

Archetype	Who they are	Kit
Veteran Conscript	A discharged soldier. Good with a rifle.	Single Rifle, 12 x 5.56mm NATO - Junk, Field Hand Outfit, Bandage, Water (Purified)
Butcher	A meat cutter who knows anatomy and a blade.	Cleaver, Settler Outfit, 2 x Bighorner Steak, Leather
Technician	Keeps old machines running.	Ball Peen Hammer, Engineer Jumpsuit, Welding Goggles, 2 x Screws, Gear
Raider Deserter	A former raider who walked away from the gang.	Pipe Pistol, 12 x .32 ACP - Standard, Leather Jacket, Sack Hood, Jet
Caravan Guard	Hired muscle for trade caravans.	Pipe Shotgun, 20 x 20 Gauge - Junk, Caravaneer Outfit, Cowboy Hat, Water (Dirty)
Scavenger	Picks ruins clean for salvage.	Pipe Wrench, Settler Outfit, Light Satchel, 2 x Cloth, Steel
Field Medic	Patches people up with whatever is around.	Knife, Settler Outfit, Medical Mask, 2 x Bandage, Antiseptic Rub, Healing Powder
Prospector	Digs through the wastes for anything of value.	Knife, Prospector Outfit, Water (Dirty), Mutfruit
Tribal Hunter	Raised by a tribe. Hunts with a bow.	Makeshift Bow, 12 x Arrow - Junk, Tribal Garb, Healing Powder, Iguana on a Stick
Vault Runaway	Left a vault with almost nothing.	Switchblade, RobCo Jumpsuit, Nuka Cola, Rad-X
Ex-Convict	Recently out of prison.	Prison Shiv, Jailhouse Outfit, Tobacco Chew
Farmhand	Works other people's fields.	Pitchfork, Field Hand Outfit, 2 x Mutfruit, Broc Flower
Courier	Delivers mail through dangerous country.	.22 Pistol, 24 x .22 LR - Standard, Athletic Clothing, Water (Purified), 5 caps
Drifter	Never stays anywhere for long.	Lead Pipe, Leather Jacket, Beanie, Water (Dirty), Tobacco Chew
Bar Brawler	Fights for fun or for money.	Brass Knuckles, Pre-War Casualwear, Moonshine, Bandage
Desk Clerk	Pushed paper for people who no longer matter.	Dress Cane, Pre-War Businesswear, Eyeglasses, 5 x Pre War Money, Nuka Cola
Town Deputy	Keeps the peace in a town that can barely pay.	Police pistol, 18 x .357 Magnum - Junk, Settler Outfit, Cowboy Hat, Bandage
Chem Runner	Smuggles chems between towns.	Straight Razor, Pre-War Casualwear, Sunglasses, Jet, Numbing Salve
Miner	Spent years working underground.	Pickaxe, Settler Outfit, Mining Helmet, Miner's Chest Protection, Water (Dirty)
Wasteland Cook	Makes a meal out of anything.	Frying Pan, Settler Outfit, 2 x Iguana on a Stick, Water (Dirty)

Archetype	Who they are	Kit
Brahmin Herder	Drives cattle between settlements.	Machete, Field Hand Outfit, Cowboy Hat, Water (Dirty), Bighorner Steak
Gravedigger	Buries the dead for a living.	Shovel, Settler Outfit, Scarf, Tobacco Chew, Water (Dirty)
Mechanic	Fixes engines, generators and anything with parts.	Tire Iron, Repairman Jumpsuit, Black Gloves, Adhesive, 2 x Screws
Preacher	Carries faith out into the wasteland.	Flagpole, Pre-War Businesswear, 2 x Bandage, Water (Purified)
Gambler	Lives by luck and bluffing.	Silenced .22 pistol, 20 x .22 LR - Junk, Pre-War Casualwear, 10 x Pre War Money, Wasteland Tequila
Bartender	Runs a bar and handles the trouble in it.	Single Shotgun, 20 x 20 Gauge - Junk, Pre-War Casualwear, 2 x Moonshine, Beer - Gwinnett Ale
Lumberjack	Cuts timber for settlements.	Hatchet, Handyman Jumpsuit, Beanie, Water (Dirty), Leather
Dockworker	Hauls cargo on the river docks.	Pole Hook, Handyman Jumpsuit, Water (Dirty), Tobacco Chew
Trapper	Catches animals for fur and meat.	Spear, Leather Jacket, Cowboy Hat, 2 x Leather, Iguana on a Stick
Pit Fighter	Fought in arenas for caps.	Boxing Tape, Athletic Clothing, 2 x Bandage, Buffout
Pickpocket	Steals to get by.	Knife, Pre-War Casualwear, Black Gloves, 3 x Pre War Money, Nuka Cola
Hunter	Shoots game to feed the family.	Varmint rifle, 20 x .22 LR - Standard, Field Hand Outfit, Beanie, Iguana on a Stick, Leather
Scribe Dropout	Washed out of training with old tech.	Laser Musket, Engineer Jumpsuit, Eyeglasses, Circuitry, Mentats, 10 x Microfusion Cell
Street Kid	Grew up running through the ruins.	Baseball Bat, Athletic Clothing, Beanie, Nuka Cola, Pork N Beans
Settlement Militia	A part-time defender of a small town.	Pipe Rifle, 15 x .32 ACP - Junk, Settler Outfit, Baseball Helmet, Bandage
Bootlegger	Brews and sells moonshine.	Crowbar, Pre-War Casualwear, 3 x Moonshine, Molotov Cocktail
Powder Runaway	Escaped a prison gang that taught explosives.	Nail Board, Powder Gang Simple Outfit, Face Cover, 2 x Dynamite
Water Merchant	Sells clean water and guards it closely.	Classic 9mm Pistol, 20 x 9mm Parabellum - Standard, Leather Jacket, 3 x Water (Purified)
Herbalist	Knows which plants heal and which kill.	Sickle, Settler Outfit, 2 x Healing Powder, Broc Flower, Xander Root
Scrapper	Breaks wrecks down into useful parts.	Hammer, Handyman Jumpsuit, Welding Goggles, 2 x Steel, Screws

Kits carry more ammo

CHANGED 11 NOV 2026 Was: 3 to 10 rounds. Now: two or three magazines.

- The Scribe Dropout's Laser Musket is crank-charged and needs no ammo; the kit now carries 10 spare Microfusion Cells to trade or for a later energy weapon.
- Three magazines for small ones (4 to 8 rounds), two for large ones (10 rounds).
- A gun that holds one or two: 12 rounds or arrows, and 20 shells for a shotgun.

23. The Current Party

Live values from the sheet: base SPECIAL from START HERE, effective stats from Player Sheets. All are level 1.

Character	STR	PER	END	CHA	INT	AGL	LCK	HP	DT	AP	Carry	Init	Save	Pts
Character 1	4→**4**	6→**6**	2→**2**	2→**2**	8→**8**	10→**10**	8→**8**	19	0	18	137.5	8	15	14

Traits

Character	Slot	Trait	Benefit	Drawback
Character 1	1	070 **Sartorial Snob**	3+ AP	Cannot wear anything but light armor, cannot use whole body armors
Character 1	2	051 **Mute**	15+ Sneak, Special mute and ASL checks	Cannot initiate speech (unless knows ASL), -10 Speech
Character 1	3 (rolled)	079 **Split Personalities**	Roll for a second SPECIAL; Resistant to mental status effects and debuffs	All roll checks flip coin for which "personality"", must level up all non-combat skills for each personality
Character 2	1	069 **Sadist**	1+ AP for each successful hit	Dialogue nerfs, cannot avoid combat, cannot retreat
Character 2	2	049 **Masochist**	2+ AP for each successful enemy hit on you	Dialogue nerfs, cannot avoid combat, cannot retreat
Character 2	3 (rolled)	017 **Bloody Mess**	Bloody mess roll after critical hits below 25% enemy HP	All items on target are lost if exploded
Character 3	1	037 **God-Gifted**	Improved rolls from romance/seduction, people who like you LIKE you	Chances for meeting scorned lovers, seething dickcels, and puritans
Character 3	2	088 **Underworld Nationalist**	Gain crit chance +5% per human killed per encounter	You hate all non ghouls
Character 3	3 (rolled)	067 **Pyromaniac**	2+ AP, 25% Fire Weapons Damage, -5 enemy DT with fire weapons	-1 CHA, -1 Initiative when craving the flame, fire addiction
Character 4	1	060 **One-Handed**	25%+ AP, +1 AGI, +5 One Handed Chance to hit, non-dominant arm cannot be crippled	Cannot Use two armed weapons, -1 STR, +1 reload cost, +2 AP for revolvers
Character 4	2	043 **Improviser**	2+ initiative, 10%+ damage and AP first turn	Sneak -10, targeted shot cost +1 AP, chance to hit -10% after first

Character	Slot	Trait	Benefit	Drawback
Character 4	3 (rolled)	001 **Glowing One**	Heal from Radiation, +8 DT, +1 END, feral ghouls friendly	Constantly emit radiation which must be contained for interraction, -5 CHA

Equipment and inventory

Character	Carried	Total / capacity	Active
Character 1	1 × Pre-War Businesswear, 1 × Pipe Shotgun, 1 × Basic Fighting, 20 × 20 Gauge - Buckshot, 2 × Adhesive (stowed), 1 × Screws (stowed)	12.6 / 137.5 lb	12.3 lb
Character 2	1 × Tribal Garb, 1 × Pipe Wrench, 1 × Basic Fighting, 2 × Healing Powder, 2 × Bandage	12.4 / 337.5 lb	12.4 lb
Character 3	1 × Engineer Jumpsuit, 1 × Pipe Flamer, 1 × Basic Fighting, 50 × Flamer Fuel, 1 × Repairman Jumpsuit, 2 × Circuitry (stowed), 1 × Fiberoptics (stowed), 1 × .32 Pistol (stowed), 20 × .32 ACP - Junk (stowed)	33.0 / 231.25 lb	28.0 lb
Character 4	20 × Money (stowed), 1 × Pipe Pistol, 1 × Basic Fighting	8.0 / 106.25 lb	8.0 lb

Weapon loadouts on the Combat Sheet: Character 1: Pipe Shotgun + Basic Fighting. Character 2: Pipe Wrench + Basic Fighting. Character 3: Pipe Flamer + Basic Fighting. Character 4: Pipe Pistol + Basic Fighting.

> **UNEXPLAINED UX-17** Inventory and traits disagree in places. Character 1's sheet shows 20 buckshot where Starting Loot says 16. Character 2's tags include Medicine and Survival, and their inventory has Healing Powder and Bandage in smaller counts than the table lists. These are probably mid-campaign changes or errors, and can't be told apart.

Part V. Traits and Perks

What makes a character different, and how that changes as they grow.

24. Traits

How traits work

- Every character has **three**: two chosen and one rolled from 000-099.
- A trait is a bargain: each has a **Benefit** and a **Drawback**.
- Most traits have an **Evolution** (roll code 100-199), reached by meeting its condition. It has a new name and bonus, the reward for leaning into the trait.
- Many also have a **Repression** (roll code 200-299), a different outcome from going against the trait. It is the "Fail" path: Ghoul's fail is "Be a self hating ghoul", leading to Uncle Ghoul.
- Traits fall into categories: Personality (29), Affliction (21), Physical (16), Ideology (15), Charachter (7), Ability (7), FINAL 5 (5).

> **UNFINISHED UF-22** **Evolution conditions are mostly missing.** 95 of 100 traits have a blank Trigger column. 12 have no Fail condition. The Fail column is sometimes clearly the way into Repression, and sometimes looks like it may be a condition for Evolution, as the two are not labelled. Trait cards below print both as written.

> **UNFINISHED UF-23** Evolutions with no name: Phineas Gage Syndrome, Traumatic Childhood, Tribal, Urbanite, Vengeful, Petulant Snob. Named evolutions with no bonus: Nightkin, Paranoid, Wembanyama, Whore, Lethargic, Peacock. Repressions: 62 named, of which 57 have no bonus and 54 have no description. 38 traits have no Repression.

> **UNEXPLAINED UX-18** Traits refer to systems that do not exist yet: **Karma** (Cannibal, Child-Killer, The Masquerade), **Mental and Physical Status Resistance**, **VETO ROLL** (Devout), **Mood Rolls** (Bipolar, Erratic Mood Swings), **Super Far roll**, **Formal rating**, quests such as Storied Past and Vision Quest, and implants (Synths' "implant fail chance"). Roadmap Phase Two lists "Internalizations/mutations" and "NPC Interacting" as not started.

> **BUG BG-13** **Names don't all line up.** The Stat Converter switches a trait on by looking its name up in Traits, so a name mismatch turns it off. "Got Out of Dodge" (Stat Converter) differs in capitalisation only (fine for the lookup), but variant rows such as "Bipolar (Good Phase)", "Whore (Laid)" and "The Masquerade (Day)" never match automatically and must be set by hand. 28 traits have no Stat Converter row under their exact name, and 42 evolutions have none at all.

Each card below: roll code, name and category; flavour; benefit and drawback; evolution and repression; then the numeric modifiers the Stat Converter holds, marked [Done] where the sheet's Done box is ticked. Text is the sheet's own.

000 Ghoul Charachter

You are a ghoul, cool

Benefit: Heal from Radiation, +1 END, feral ghouls neutral, can turn into glowing one

Drawback: Ghoul bigotry, -3 CHA, -1 AGI

Evolution 100: Made Peace. *You have finally made peace with who you are, gain newfound clarity* Bonus: 1+ AGI, +3 Initiative **Trigger:** Overcome act of extreme ghoul prejudice **Fail:** Be a self hating ghoul

Sheet modifiers: none

091 Weaboo Ideology

While you were partying I was studying the blade

Benefit: 20+ Melee with east asian bladed weapons

Drawback: -15 to all other weapon skill

Evolution 191: Expat. *You live the larp fulltime* Bonus: 10+% Crit Chance with Asian bladed weapons and Japanese Guns **Fail:** Work for wage at all

Repression 291: —

Sheet modifiers: Evolution: Crit chance +10%; Note: Weapon Match

092 Wembanyama Physical

You are tall but skinny

Benefit: 1 AGI and PER, Tallness has its perks...

Drawback: x2 Limb Cripple Chance, -1 STR, cannot wear power armor

Evolution 192: How's the Weather?. *You've learned to manage your height's drawbacks by tailored clothing and figured out why you hurt easier* Bonus: — **Fail:** Both legs crippled

Repression 292: Embiid Bonus: —

Sheet modifiers: STR -1, PER +1, AGL +1; Note: x2 Limb Cripple Chance

093 Whore Personality

You are consumed with an insatiable lust...

Benefit: 20+ Speech with romance options, +2 LCK and +2 AGI post coitus (x turns)

Evolution 193: Focused Lust. *Your lusty nature is impossible to reverse, but you've learned how to manage the impulse and reputation* Bonus: — **Fail:** Do not have sex for an extended period of time, past the debuff kick in

Drawback: -2 PER and -2 INT 10 after 10 combat encounters without sex, double crit fail on romance rolls, whore reputation

Repression 293: Touch Starved Bonus: —

Sheet modifiers: Whore (Laid): AGL +2, LCK +2, SPE +20 | Whore (Not Laid): PER -2, INT -2, SPE +20

094 Yin-Yang Ability

Perfectly balanced, as all things should be

Benefit: *2 super crit chance

Evolution 194: Dao of Pow. *Your love of balance has imparted further clarity* Bonus: 1+ Super Crit Roll **Fail:** Reach very good or very bad karma

Drawback: *2 crit fail chance roll

Repression 294: —

Sheet modifiers: Super roll +2, Super fail roll +2 | Evolution: Super roll +1

095 Golden Blood FINAL 5

You have an extraordinarily rare blood type, making healing much harder

Benefit: Donating blood x10 Caps, your drawn blood +50% healing on others, normal on u, no blood draw debuffs

Evolution 195: Universal Donor. *Your golden blood has numerous unique healing effects* Bonus: Golden Blood acts as Fixer, can no longer get poisoned **Fail:** Reach bleed level 5

Drawback: -75% healing from all other sources, cannot saving throw, only revive with 80+ Medicine or Science

Repression 295: —

Sheet modifiers: none

096 Lethargic FINAL 5

You are slow to start and tend to fade into the background

Benefit: 2 + AP and 5+ chance to hit every turn after first, Sneak +5, enemy chance to hit -5

Evolution 196: Ultrapatient. *Lethargy to some is patience to others* Bonus: —

Drawback: Always Last in initiative, -4 AP at first round, item use AP +1, cannot be chosen for rolls unless all else fails, lose 5 Speech every time you fail

Repression 296: —

Sheet modifiers: none

097 Peacock FINAL 5

You are the shining star of the wasteland, and your enemies sure do know it

Benefit: 2+ CHA, Always go first for initiative, celebrity status among NPCs, +5 Speech when speech check passsed

Evolution 197: Golden God Bonus: —

Drawback: All enemies target you first, cannot escape combat, egomaniacal demeanor, Sneak permanently at 0

Repression 297: —

Sheet modifiers: none

098 Petulant Snob FINAL 5

You are steeped in the arts and culture, and needn't defrade yourself with labor

Benefit: 3+ INT; x2 evade, sneak, and flee; better starting loot with valuable artifacts, +15 Speech

Evolution 198: —

Drawback: Cannot roll for + skill cap at 50 for: Medicine, Repair, Survival, Melee and Big Guns; +1 movement AP cost

Repression 298: —

Sheet modifiers: none

099 Fear of Death FINAL 5

You have the most primal, deep fear of them all.

Benefit: 2+ CHA and INT, and +20 chance to hit, when above 90% health, +15 Medicine

Evolution 199: Now is Not The Time for Fear. *Fear is the mind killer* Bonus: No longer have chance to hit debuff, every level of Afraid increases damage by 10% **Fail:** Fail a saving throw

Drawback: HP lost from full is reduced from chance to hit, seeing ally downed Level 5 Afraid, auto use healing item at turn start

Repression 299: —

Sheet modifiers: Evolution: Damage +10%; Note: Per Afraid level

24. Traits: changes

Changes since the bible was compiled, oldest first. Where this page and pages 42-59 disagree, this page is current.

Traits that didn't do what they said

CHANGED 12 NOV 2026 Was: some traits applied different numbers from their text. Now they match.

- Blissful Ignorance: enemies get -15% to hit you (it was +15%).
- Honest to a Fault: +10 Speech (it gave +10 Sneak).
- Coward: the -5 to every SPECIAL in combat now applies.
- Fear of Death: +2 CHA, +2 INT and +15 Medicine always; the +20% hit chance only above 90% health (it was 50%, and Medicine was missing).
- Lethargic: +5 Sneak, enemies -5% to hit you, always last in initiative, and -4 AP on the first round, as written.
- Cyborg halves the chance an implant fails. IDF Soldier gets +10% Damage and +5 DT in riot gear.
- Still DM-run: Redpilled's damage against the opposite sex (the app doesn't know anyone's sex), and the quest and story traits.

Prayer

CHANGED 12 NOV 2026 New: an action for characters with Strict Religious Rites (or its evolved form, Devout).

- Pray spends all the AP left this turn and gives the Prayer status (+1 Luck, +1 END, +5% to hit) for 3 rounds. It also lifts Damnation.
- Only characters with the trait see the button. The length is a guess, since the trait doesn't say; it's in Settings (prayer.rounds).

25. Skill Perks

Each skill has a perk tree. Perks unlock as the skill passes thresholds: **Proficiency above 60, Expertise above 80, Mastery above 100.** Each skill has two Proficiency branches, each with Expertise perks, each with Mastery perks below it.

> **UNSURE US-23** **How many perks you get is not stated.** Is one perk per threshold allowed, or the whole tree? The trait Autistic ("can choose two master perks") and evolution Well Rounded ("can pick second mastery in tag skills") imply normally only one Mastery. Money Talks refers to "a mastery in another category". The brief says the player chooses, and the DM adds it on the level-up screen.

> **UNFINISHED UF-24** The tab's foot says "Delete/strikethru any of these that dont work (Cuz progression balance". Roadmap: "Mostly finished, needs testing and integration". Blank effects or parenthetical placeholders such as "(Rifle Style)" mark unwritten perks and are shaded below. Lived Experience has no Expertise or Mastery perks. Hand-style melee and some entries have missing names.

> **UNEXPLAINED UX-19** A note beside Paralyzing Palm reads "?", and one beside Deep Cover reads "Add other branch for wildlife". Survival's tree is almost empty. Sneak perks refer to a base "Sneak Crit Bonus" that isn't defined.

Skill	Rank	Perk	Effect (sheet's wording)	Stat Converter
Barter	Proficiency	**Aspiring Producer**	Sell price increased by 10%	Sell +10%
Barter	Expertise	**Fixer**	Can sell stolen goods with no discount	
Barter	Mastery	**Hazard Pay**	Access to smuggling networks and investment in illegal businesses which pay out items relevant	
Barter	Mastery	**Wet Worker**	Receive unique mercenary/contractor jobs and higher payouts for criminal jobs	
Barter	Expertise	**Entrepaneur**	Can start businesses in towns. Specialize in spedific skill. Can set up courier networks givng profits (roll for profits.)	
Barter	Mastery	**Capitalist**	Always pass pro-owner speech checks, can buy businesses, your couriers pay you more sell	
Barter	Mastery	**Free Trade**	Stolen/looted goods no longer have a discount sell	
Barter	Proficiency	**Proud Consumer**	Buy price reduced by 10%	Buy +10%
Barter	Expertise	**Trader**	Access to requisition forms with certain shops: can order bulk and surplus items and ammo in large supply from certain vendors

Sneak	Mastery	**Ocean's 100**	Can smuggle master level concealed weapons into secured locations	
Sneak	Mastery	**Stuck it up Your Ass**	Can smuggle holdout weapons into ultra-secure locations	
Sneak	Expertise	**Camoflauge**	Lowers enemy chance to hit, can roll to disappear	Enemy hit on you -10%; Note: Roll to disappear
Sneak	Mastery	**Plain Sight**	Lowered chance of detection in general sneaking	
Sneak	Mastery	**Deep Cover**	Low chance to be detected in disguise	
Speech	Proficiency	**Manipulation**	Speech checks towards manipulation are +5% easier	
Speech	Expertise	**Deception**	Speech checks towards lies are +10% easier	
Speech	Mastery	**Silver Tongue**	Even the most outlandish lies have a chance to work on even the smartest NPCs	
Speech	Mastery	**Pants On Fire!**	NPCs no longer react negatively if caught in a lie	
Speech	Expertise	**Suave**	Speech checks towards NPCs attracted to you are +10% easier	
Speech	Mastery	**Bisexual Legend**	Can make sentient NPCs of any gender attracted to you regardless of gender or sexuality	
Speech	Mastery	**Charmer**	Greatly improve chance to seduce NPCs attracted to you	
Speech	Proficiency	**Mediation**	Speech checks towards peaceful resolutions are +5% easier	
Speech	Expertise	**Leadership**	Spend 5 AP in combat to give a rousing speech (one chosen S.P.E.C.I.A.L for all party members +1 until end of combat or downed)	
Speech	Mastery	**Vanguard**	50% chance to revive a downed party member once per member per combat (full turn)	
Speech	Mastery	**Lead by Example**	Party members may tag an additional skill from your tagged skills	
Speech	Expertise	**Body Language Reader**	Immediately tell if any NPC means you harm	
Speech	Mastery	**Noir Detective**	50% to discover if any given piece of dialogue is the whole truth or not	
Speech	Mastery	**Diplomat**	A peaceful solution can be reached to almost any encounter with sentient NPCs	
Survival	Proficiency	**Lived Experience**	Better looting	
Survival	Proficiency	**Practical Skills**	Better counters and items	
Survival	Expertise	**Items**	(improves items)	
Survival	Mastery	**Safe Use**	Reduced addiction chance	
Survival	Mastery	**Sinner**	Boost tobacco alcohol and caffeine	
Survival	Expertise	**Counters**	(improves counters_	
Survival	Mastery	**Built Different**	Counter and deflect physical status effects	
Survival	Mastery	**Strong Constitution**	Counter and detect mental status effects	

25. Skill Perks: changes

Changes since the bible was compiled, oldest first. Where this page and pages 60-66 disagree, this page is current.

Skill perks branch

CHANGED 12 NOV 2026 Was: every skill perk opened when the skill passed its rank. Now: each skill's perks form a tree. A Proficiency perk leads to its own Expertise perks, and those to their own Mastery perks, and a perk below the first rank needs the one it branches from.

- The branches come from the workbook's layout: each row holds a Proficiency, an Expertise and a Mastery cell, and a blank cell means the one above. So Repair splits into Mechanic (Jumpsuit Johnny, Torbjorn, then their Mastery perks) and Technician (Weaponsmith and its Mastery perks).
- The skill tree is drawn as a real tree, with buttons along the top to show one skill at a time. Each perk shows its effect in short.
- To check: the branches read from the workbook for every skill.

26. Level Perks

A character gains one Level Perk at every even level. Perks are grouped by level, and some require a skill score or SPECIAL. Each level offers General perks, skill-dependent perks (the requirement climbs by 10 per tier) and, at levels 10 and 12, SPECIAL-gated perks.

> **UNFINISHED UF-25** **131 of 234 perk slots are empty.** Blank slots by level: L6: 2, L8: 13, L10: 15, L12: 13, L14: 11, L16: 9, L18: 18, L20: 15, L22: 15, L24: 5, L26: 5, L28: 5, LMAX: 5. The Roadmap has Level Perks at Concept only. The sheet's levels run to 30, while this tab stops at 28 and "MAX". Only named perks are listed below.

> **BUG BG-14** **Duplicate perk names.** Used twice in Level Perks with different effects: Opportune Strike, Last Stand, Unstoppable Force. Also used in both Level Perks and Skill Perks: Chemist, Computer Whiz, Hot Potato, Infiltrator, Sticky Fingers. Anything looked up by exact name, as the sheet does, will find only the first one.

> **UNEXPLAINED UX-20** The Roll column is blank for every perk, so it is unclear whether perks were once rolled. Mysterious Stranger is a DM-rolled ally with no stat block.

Lvl	Group	Perk	Effect	Requires
2	General	**Reactive Instinct**	Improves AP by 1 when health is below 20%	—
2	General	**Emergency Means**	Improves DT by 1 when health is below 20%	—
2	General	**Deep Pockets**	Improves active inventory by 5%	—
2	General	**Saved by the Bell**	Improves Saving throw by 1 roll	—
2	General	**Better Targets**	Improves PEN by 1	—
4	General	**Durability**	Permanently Gain 1 DT	—
4	General	**Hardbody**	Increases physical status eff. resistance by 1	—
4	General	**Acclimation**	Increases phychological status eff. resistance by 1	—
4	General	**Heritable**	Increased all effects (positive/negative) of every trait by 25%	—
4	General	**Bookworm**	Increases Skill Gained from books by 1, magazines by 5	—
4	Skill Dependent	**Bargin Bin Hunter**	Improves buy prices by 5%	10 Barter
4	Skill Dependent	**Elementary**	Improves elemental chance rolls for Energy Weapons by 1	10 Energy Weapons
4	Skill Dependent	**Shrapnel**	Critical Hits can induce bleeding	10 Explosives
4	Skill Dependent	**Quickdraw**	Improves SG chance to hit at R1 by 20 on the first turn	10 Small Guns
4	Skill Dependent	**Hunker Down**	Increases accuracy with Big Guns by 5 when in cover	10 Big Guns
4	Skill Dependent	**Sticky Fingers**	Can roll to steal objects in world	10 Lockpick
4	Skill Dependent	**Safe Treatment**	Increases effectiveness of Antiseptic Rub by +10%	10 Medicine
4	Skill Dependent	**Backup Plan**	Increases secondary attack damage by 1	10 Melee Weapons
4	Skill Dependent	**Pipe Weaponsmith**	Can craft pipe weapons	10 Repair
4	Skill Dependent	**Field Remedy**	Can craft a Numbing Salve	10 Science
4	Skill Dependent	**Forgettable Face**	NPCs will treat you neutrally more often	10 Sneak
4	Skill Dependent	**Trustworthy**	Critical success on speech checks yield the entire party (XP of check) x 2 and auto pass on their next Speech check with NPC	10 Speech
4	Skill Dependent	**One Man's Trash...**	Improves odds of looting Crafting Materials +5%	10 Survival
6	General	**Mysterious Stranger**	DM rolls secret d20, in that amount of turns mysterious stranger appears and super crits with .44. Then rolls again to reset timer. Stranger targets top initiative enemy	—
6	General	**Intense Training**	Gain 1 SPECIAL of Choice	—
6	General	**Ready Up**	Improves PRI by 1	—

12	7+7 SPECIAL	**Dual Reflex**	4+ base Intiative	7+ PER 7+ AGL
12	7+7 SPECIAL	**Instinct**	-2 Initiative for enemies, random encounters start at longer ranges	7+ PER 7+ LCK
12	7+7 SPECIAL	**Master Lover**	Sleeping with charachtewrs may yeild for favorable results	7+ END 7+ CHA
12	7+7 SPECIAL	**Biological Optimization**	Boost Healling from Mecidal devices (pre war healing and chems)	7+ END 7+ INT
12	7+7 SPECIAL	**Neo**	Automatic attacks against you have a -15 Chance to Hit	7+ END 7+ AGL
12	7+7 SPECIAL	**Last Stand**	Gain a turn to fight before Saving Throw, *2 odds on Saving Throw	7+ END 7+ LCK
12	7+7 SPECIAL	**Leader of Men**	Spend 2 AP to "inspire" party, boosting party chance by +10 to hit for next turn	7+ CHA 7+ INT
12	7+7 SPECIAL	**Pack Animals**	Party gains -10 Enemy Chance to Hit when within 1 range of you	7+ CHA 7+ AGL
12	7+7 SPECIAL	**Sowwy**	Can roll (CHA+LCK/20) to "undo" Speech failures	7+ CHA 7+ LCK
12	7+7 SPECIAL	**CQB**	No chance to hit penalties and +2 initiative in urban/indoor environmenr	7+ INT 7+ AGL
12	7+7 SPECIAL	**Opportune Strike**	Can Bank a Critical Hit Roll, can convert a hit to crit, or crit to super crit	7+ INT 7+ LCK
12	7+7 SPECIAL	**Fat Roll**	Can roll (AGI+LCK/20) to fat roll away from an explosive	7+ AGL 7+ LCK
12	Skill Dependent	**Super Slam**	15% chance to knockdown a target while using an Unarmed or one-handed Melee Weapon; 30% chance while using a two-handed Melee Weapon	50 Energy Weapons
12	Skill Dependent	**Light Touch**	5% Critical Chance and enemies suffer -25% Critical Chance while you wear Light armor	50 Repair
12	Skill Dependent	**Robotics Expert**	25%+ damage to robots	50 Science
12	Skill Dependent	**Devil in a New Dress**	Much higher likelihood to pass with faction armor	50 Sneak
12	Skill Dependent	**Old World Gourmet**	25% addiction resistance	50 Survival
14	Skill Dependent	**Concentrated Fire**	5% increased hit chance for subsequent hits	60 Energy Weapons
14	Skill Dependent	**Concentrated Gunfire**	5% increased hit chance for subsequent hits	60 Small Guns
14	Skill Dependent	**Concentrated Heavy Fire**	5% increased hit chance for subsequent hits	60 Big Guns
14	Skill Dependent	**Chemist**	100% increased duration for chem effects	60 Medicine
14	Skill Dependent	**In Shining Armor**	5+ DT against Energy Weapons while wearing reflective armor, 2+ DT against Energy Weapons while wearing reflective eyewear, Enemy Crit fails reflect back	60 Science
14	Skill Dependent	**Mr. Sandman**	Silently kill any sleeping person	60 Sneak
14	Skill Dependent	**Them's Good Eatin'**	Living creatures have a 50% chance of having Thin Red Paste or Blood Sausage when killed	60 Survival
16	General	**Grim Reaper's Sprint**	Gain 25% AP back after each kill	—
16	Skill Dependent	**Pack Rat**	Items with a weight of two or less weigh half as much	70 Barter
16	Skill Dependent	**Meltdown**	Enemies Killed have a chance to Explode into a corona, which can chain to other enemies	70 Energy Weapons
16	Skill Dependent	**Hit The Deck**	12+ DT against Explosives	70 Explosives
16	Skill Dependent	**Infiltrator**	Gives you a second attempt at a lock that you previously broke while trying to force it.	70 Lockpick
16	Skill Dependent	**Living Anatomy**	5%+ Damage against Humans and Ghouls	70 Medicine

Lvl	Group	Perk	Effect	Requires
16	Skill Dependent	**Hand Loader**	Twice as likely to recover ammunition cases	70 Repair
16	Skill Dependent	**Computer Whiz**	Another attempt to hack any locked computer	70 Science
16	Skill Dependent	**The Professional**	20%+ Sneak Attack Critical damage with all pistols and all SMGs	70 Sneak
16	Skill Dependent	**Tribal Wisdom**	-50% Limb Damage from Animals, Mutated Animals, and Mutated Insects, +25% Poison Resistance	70 Survival
20	Skill Dependent	**Kurkulator**	-1AP penalty for targeted headshot at R4+ with scoped weapons	90 Small Guns
20	Skill Dependent	**Unstoppable Force**	25%+ Damage against enemy melee attackers	90 Melee Weapons
20	Skill Dependent	**Nuka Chemist**	Unlock special Nuka-Cola recipes at the workbench	90 Science
22	Skill Dependent	**Hot Potato**	When using explosives at R1 instantly jump two hexes out of the way	100 Explosives
22	Skill Dependent	**Center Mass**	15%+ damage when targeting the torso	100 Small Guns
22	Skill Dependent	**Roughin It**	Can sleep anywhere with no debuffs	100 Survival

Part VI. Status Effects

Everything that can happen to a body or a mind.

27. Status Effects

Effects have up to five escalating **tiers**. **M** marks mental effects and **P** physical (X and S are one-offs). Many come in positive and negative pairs, shown by the Paired column, such as Afraid and Calm. Effects come from four kinds of source: inflicted by events, item effects, damage rolls and traits. Counters name what removes them.

UNFINISHED UF-26 Effects with no tiers at all: Hologram Glare, Undignified (Lack of Pride), Sociable, Strengthened, Knocked Out, Flesh Craving, Gambler's High, Gambler's Slump, Clairvoyance, Shell Shocked, Fire Craving, Psychosis, Got Away With Lie, Flagelate, Mania, Hangover, Fixer, System Flushed, Immunity. **Marked WIP:** Drunk, Loose, Spun Out, Stimulated, Roid Rage, Roided, Narcotized, Painless, Blinded by Rage, Rage, Tranquilized, Sedated. The Roadmap says "Many Done, flesh out item based effects".

UNFINISHED UF-27 How statuses get applied is undefined. Durations are blank except where written into a tier. There is no chance-to-inflict rule, even though weapons list effects (Energy Weapons' Status Effect column; melee's Damage Over Time and DOT Chance/Lvl, the latter blank on nearly all rows). Perk Elementary "improves elemental chance rolls". The Combat Sheet has no status tracking at all: these are all applied by the DM.

UNEXPLAINED UX-21 Status resistance. "Physical Eff Resist" and "Mental Eff Resist" appear in tiers and perks (Hardbody, Acclimation) with no definition, and the Stat Converter's Debuff Ch and Debuff Eff columns aren't read by any formula. Cloud Poison's note "Above this point you die" isn't explained.

UNSURE US-24 Shock has five tiers, up to "functionally useless", yet the revive rule just says "revived characters get Shock". Its tier may tie to Times Revived.

Name	M/P	Tone	Source	Paired	Description	Tier 1	Tier 2	Tier 3	Tier 4	Tier 5	Counters	Notes

27. Status Effects: changes

Changes since the bible was compiled, oldest first. Where this page and pages 72-75 disagree, this page is current.

Statuses as variables

CHANGED 8 NOV 2026 Was: status effects written as text. Now: each tier sets variables (chapter 13).

Status	Tone	Variables by tier
Afraid	Negative	acc -0.1 | acc -0.2 | acc -0.3 | acc -0.4 | acc -0.5
Calm	Positive	crit +0.05 | crit +0.1 | crit +0.15 | crit +0.2 | crit +0.25
Hopeless	Negative	pri -1, resistMental -1 | pri -2, resistMental -2 | pri -3, resistMental -3 | pri -4, resistMental -4 | pri -5, resistMental -5
Hope	Positive	pri +1, crit +0.02, resistMental +1 | pri +2, crit +0.04, resistMental +2 | pri +3, crit +0.06, resistMental +3 | pri +4, crit +0.08, resistMental +4 | pri +5, crit +0.1, resistMental +5
Hunger	Negative	dt -1 | dt -2 | dt -3 | dt -5, hp -3 | dt -8, hp -10
Well Fed	Positive	dam +0.01, hp +1 | dam +0.02, hp +2 | dam +0.03, hp +3 | dam +0.05, hp +5 | dam +0.1, hp +10
Thirst	Negative	ap -1 | ap -2 | ap -3 | ap -5, P -1 | ap -8, P -2
Hydrated	Positive	ap +1 | ap +2 | ap +3 | ap +4, E +1 | ap +5, E +2
Irradiated	Negative	S -1, P -1, E -1, C -1, I -1, A -1, L -1 | S -2, P -2, E -2, C -2, I -2, A -2, L -2 | S -3, P -3, E -3, C -3, I -3, A -3, L -3 | S -4, P -4, E -4, C -4, I -4, A -4, L -4 | S -5, P -5, E -5, C -5, I -5, A -5, L -5
Iradiated (Ghoul)	Positive	regen +2 | regen +4 | regen +6 | regen +8 | regen +10
Disoriented	Negative	acc -0.5
Focused	Positive	acc +0.1
Damnation	Negative	I -1, C -1, L -1, acc -0.1
Prayer	Positive	L +1, E +1, acc +0.05
Horny	Negative	P -2, I -2
Got Some	Positive	L +2, A +2
Drunk	Negative	I -1 | I -2 | I -3 | I -4 | C -2, I -5
Loose	Positive	S +1, C +1 | S +2, C +2 | S +3, C +3 | S +4, C +1, L +1 | S +5, L +2

Craving Satisfaction	Positive	E +1, dam +0.05
Failed Surgery	Negative	S -1, E -1, A -1

Body map

CHANGED 9 NOV 2026 New.

The Health tab shows a box body: head, arms, body and legs. A part with an injury reads CRIPPLED. The character's statuses are listed beside it.

Knives cause Bleeding

CHANGED 11 NOV 2026 New.

- A crit with a knife (any weapon named knife, switchblade, shiv, dagger or razor) gives Bleeding 1; a super crit gives Bleeding 5, the worst.
- Bleeding never goes down this way: a weaker bleed on someone already bleeding worse leaves the worse one.
- Settings, Cover tiers: both tiers can be changed.

Bleeding slows down by itself

CHANGED 12 NOV 2026 Was: Bleeding lasted until treated, and enemies never treat it, so any bleed on an enemy was permanent. Now: it drops a tier each round.

- At the end of each round Bleeding goes down one tier: Bleeding 5 becomes 4, then 3, then 2, then 1. Bleeding 1 lasts 5 more rounds and then stops.
- So the most a bleed can do untreated is 10 + 6 + 4 + 2 + 5 x 1 = 27 damage (from Bleeding 5), not a slow death.
- Treatment still lowers it at once (Bandage, Military Bandage and the like), and a new wound that bleeds worse than the current one raises it again.
- Settings, Cover tiers: 'Bleeding drops one tier each round' (off is the old rule) and how long Bleeding 1 lasts.

Vague statuses get numbers

CHANGED 12 NOV 2026 Was: Blinded by Rage, FEV Infection and Craving Satisfaction were words only. Now they have numbers.

- Blinded by Rage, tier 1-5: +10% Damage and -10% Hit Chance per tier, lasting as many turns as its tier. The DM still decides who the character attacks.
- FEV Infection: Exposure (tiers 1-2) +1 STR, -1 INT (tier 2 also -1 CHA); Infection (3-4) +2 STR, -2 INT, -1/-2 CHA, +10/+15 Max HP; Transformation (5) +3 STR, -3 INT, -3 CHA, +20 Max HP, and the DM gives the Super Mutant trait.
- Craving Satisfaction: heals 10 HP and removes Hunger and Flesh Craving when it lands, then +1 END and +5% Damage for 3 turns.
- Spun Out's 'bleed resist' now counts: Bleeding lands that many tiers higher. Electrocuted's 'x2 Damage to Robots/PA' now counts on robots and anyone in power armor.

Failed Surgery

CHANGED 12 NOV 2026 New status: -1 STR, -1 END, -1 AGI after a failed implant surgery. No time limit: a doctor (250 caps) or a Doctor's Bag used on yourself removes it.

Rads

CHANGED 12 NOV 2026 Was: Irradiated was a status the DM set by hand. Now: each character has a rad counter from 0 to 1200, on the party card.

- Every 200 rads is one tier of Irradiated: 200 is tier 1 (Contact Radiation), 1000 is tier 5 (Walking Isotope). The bar on the card is cut at each tier.
- Rads come from hazards at the end of a turn, or the DM types the number on the card. When the count crosses a line the Irradiated tier follows, up or down.
- RadAway and anything else that lowers Irradiated by N tiers also takes off N x 200 rads.
- Changing the Irradiated status by hand doesn't change the count.
- At the cap the count simply stops; nothing more happens there unless the DM rules it.

Part VII. Items and Economy

Weight, money, crafting and looting, then every item in the game.

28. Inventory and Encumbrance

Every item has a weight. The Inventory tab holds up to 100 lines per character: six clothing slots, money, two weapons and their ammo, then free rows. Each line has a checkbox for **Active**.

Two limits

Limit	Capacity	Measures	Penalty
Total	Carry Weight	Everything carried	AP
Active	25% of Carry Weight	Only lines marked Active	AP

Tiers

Active weight	Tier	AP	Total weight	Tier	AP
100%+	Encumbered I	−10%	100%+	Overencumbered I	−25%
125%+	Encumbered II	−20%	120%+	Overencumbered II	−50%
150%+	Encumbered III	−30%	140%+	Overencumbered III	−75%
175%+	Encumbered IV	−40%	150%+	Immobilized	−100%
200%+	Encumbered V	−50%			

Source: Inventory!H2:J2. The AP multipliers are on the Stat Converter's Effect rows and switch on automatically. Multipliers add.

BUG BG-15 **Active capacity disagrees with itself.** The total line uses 25% of carry (H2), and every item line's percentage uses 15% (H3 onward). The Encumbered tiers read H2, so 25% is what actually applies. Also, the Stat Converter tests strictly above 100%, while the display says 100% and up, so exactly 100% shows a penalty it does not apply.

DECIDED, SEE 154a

RESOLVED US-25 **What Active means** isn't written. It is presumably gear on hand and reachable during combat, versus stowed in a pack. The Checklist lists "Player Active Inventory", the Action AP tab has an unpriced "Open Inventory", and Deep Pockets "improves active inventory by 5%". The natural question is what stowed items cost to reach.

UNEXPLAINED UX-22 **Armour type percentages.** Armour types are labelled Light (20%), Clothing (20%), Medium (15%), Heavy (10%), Power (5%), with nothing reading them. They look like an active inventory share by armour class, which would also explain the stray 15% and 25% in the bug above. This is a guess.

Weight notes

- Money weighs 0.001 lb per cap.
- Ammo tabs list weight per round and rounds per pound.
- Stat Converter's Weight column is not read. Traits and perks that change item weight are not automated (Pack Rat, Bullet Hose, Mule).

UNFINISHED UF-28 Many items have no weight: 224 of 289 armour pieces, 183 of 246 items, 82 of 111 Big Guns, 68 of 90 Energy Weapons and 53 of 74 Explosives. They all count as 0 lb today.

28. Inventory and Encumbrance: changes

Changes since the bible was compiled, oldest first. Where this page and page 77 disagree, this page is current.

More can be carried before it slows you down

CHANGED 11 NOV 2026 Was: the active weight limit was 25% of Carry. Now: 65%.

- Worn armor, held weapons and everything ticked Active count toward it. At STR 6 the limit goes from 53 lb to 138 lb.
- Why: tier 4-5 body armor alone (35-45 lb) put players at Encumbered III-V, losing 30-50% of their AP, while enemies in the same armor lost nothing. The balance test had tier-5 players winning 0% of duels against tier-5 humans.
- Settings, Enemies and inventory: 'Active inventory share of Carry'.

Enemies are slowed by their load too

CHANGED 12 NOV 2026 Was: encumbrance applied to players only. Now: enemy humans pay it the same way.

- An enemy's worn armor, held weapons and on-hand inventory count toward its active limit (65% of its Carry), and everything toward its total, exactly as for a player.
- Creatures don't carry gear and are not affected.
- Settings, Enemies and inventory: 'Enemy humans are slowed by their load'.

29. Money and Barter

The currency is caps. Each item's Value column is its price. The GLT master list calls this "Cap (100 B)", meaning the price at Barter 100. Each character's price factors are:

```
Buy factor  = 100 ÷ Barter          Sell factor = Barter ÷ 100
Barter 7:   buy at ×14.29, sell at ×0.07
Barter 50:  buy at ×2,     sell at ×0.5
Barter 100: buy at ×1,     sell at ×1
```

UNSURE US-26 The factors are computed but nothing uses them. The Roadmap has Barter/Caps at Concept only. As written, a starting character pays about 14× list price and sells for 7%, which looks extreme: a 50-cap gun costs over 700 caps. Check whether that's intended.

UNFINISHED UF-29 No shop, haggling, or stolen-goods rules exist, though Barter perks depend on them. Stat Converter's Buy, Sell and Money Talks columns aren't read. Many Values are blank. Enemies' loot lists Caps only.

UNEXPLAINED UX-23 Non-cap currencies exist as materials with no rule: Pre War Money, NCR Dogtag, BoS Holotag, Enclave Holotag. The trait New Vegas Legend mentions casino chips.

29. Money and Barter: changes

Changes since the bible was compiled, oldest first. Where this page and page 78 disagree, this page is current.

Vendor prices

CHANGED 8 NOV 2026 Was: Stat Converter columns with no shop rules. Now:

A vendor has a tier and a barter level (10, 25, 35, 50, 60, 75, 85, 100). Buy price = value x the higher of 1 and vendor barter / your Barter. Sell price = value x the lower of 1 and your Barter / vendor barter. A vendor at 100 matches the sheet's formula. Prices marked ~ are placeholders, because the workbook has no value for ammo and most consumables.

Stock grows with tier

CHANGED 9 NOV 2026 Was: about the same stock at every tier. Now: higher tiers carry far more consumables and ammo, but still only a few guns and armor.

Guns and armor come from the vendor's tier and the one below. Consumables, ammo and materials can be anything up to the vendor's tier. Never unique weapons.

Kind	Lines at T1	Lines at T6	Quantity per tier
Weapons	4	6	-
Armor	3	5	-
Accessories	2	4	-
Consumables	6	18	+50%, medicine +90%
Ammo	for the guns stocked	for the guns stocked	by kind, see Ammo follows the guns
Materials	3	8	+50%

Ammo follows the guns

CHANGED 9 NOV 2026 Was: random ammo of any caliber. Now: a vendor carries ammo only for the guns on their shelf, and mostly the common loads.

Guns are picked so calibers vary: each gun already on the shelf in a caliber makes another one 35% as likely, so two 9mm guns can happen but aren't the norm. For each caliber on the shelf, the vendor stocks its loads up to their tier, by kind (chapter 37):

Kind	Rounds per line at T1	At T3	At T6
Junk	40	20	0
Standard	30	50	80
Improved	10	20	35
Special	4	12	24
Best	2	4	7

Each amount varies by 25% either way. Junk thins out and is gone by tier 5. Better vendors carry more lines of improved and special loads, and from tier 2 sometimes a few rounds of the caliber's best.

Unique weapons stay out of shops, gear and loot

CHANGED 10 NOV 2026 Was: only weapons with no Value on the Small Guns and Melee tabs were treated as unique. Now: 140 named one-offs are flagged unique too.

- A unique weapon never appears on a vendor's shelf, in an enemy's generated gear or in found loot. An enemy whose sheet names a unique weapon still carries it.
- Named means a proper name or an odd, specific name, such as Lucky, Ratslayer, That Gun, Big Boomer or Mjolnir. Generic descriptors stay ordinary even with brackets, such as Service 9mm Pistol (Beretta). Homemade weapons stay ordinary.

- The list is uniques in rules.js, so the DM can add or remove names.

30. Crafting and Home Base

The Crafting Recipes tab holds 295 recipes: 175 Ammo, 93 Mod, 26 Weapon, 1 Junk. Each names a station, an optional required skill or perk, and up to five materials with counts. Stations: **Reloading Station** (175), **Weapon Station** (93), **Workbench** (27).

Access to crafting

Unlocks	Perk or skill
Hand load ammo, Proficiency-tier weapon mods	Technician (Repair)
Expert-tier mods and Homemade weapons	Weaponsmith (Repair)
Mastery-level mods; Master-level ammo	Engraver; Precise Pouring (Repair)
Pipe weapons	Pipe Weaponsmith (Level Perk, 10 Repair)
Junk ammo	Junk Rounds (Level Perk, 40 Repair)
Chems; better chems; stimpaks	Chemist; Heisenberg; Pharma Exec (Medicine)
Expert crafting recipes	Master Inventor (Science)
Breaking down weapons into parts	Breakdown (Level Perk, 20 Repair)

> **UNFINISHED UF-30** **No crafting procedure exists.** Nothing says whether crafting needs a skill roll, how long it takes, or where stations are found. 177 recipes (all ammo and more) have no skill requirement, and 295 have no Level Req. 4 have no ingredients: Long Barrel, Shredder Barrels, Grenade Rifle Long Barrel, Added Rocket. Many list materials but no counts. The Roadmap says "most recipes accounted for".

> **BUG BG-16** "Nitrogen" is a craftable with no matching item. The energy ammo is called Nitrogen Tank in Materials and Nitrogen on the weapon.

Home Base

Each character has a stash on the Home Base tab: up to 100 lines, capacity **1,000 lb** fixed, weight only. It is currently empty.

> **UNFINISHED UF-31** Home Base has no rules beyond capacity: no location, no upgrades, no access rules, no shared party stash. The brief defers it to a later stage.

31. Looting

Looting is unfinished. The Roadmap gives the only current procedure: **"PRESENT: Roll d20, Consult table to right."** The table shifts the average tier of loot found:

d20	1	2-3	4-17	18-19	20
Average tier shift	−1	−0.5	0	+0.5	+1

- Enemies list a Caps range. Mobs have none.
- Combat Sheet Loop: "loot dropped" is a Com 6 check. Items can be taken from the fallen ("Raider 2 has 9mm Pistol, which P1 takes").
- Traits and perks adjust looting: Bloody Mess ("all items on target are lost if exploded"), Caphound, Scrounger, One Man's Trash, Them's Good Eatin'.
- Roadmap questions: "Survival roll for animal butcher", "Each player rolls Survival roll for loot?".

> **UNFINISHED UF-32** **Looting Calculator tab:** a statement of intent only ("a way to generate a bunch of random loot, eventually able to input type and location"), with variables Level and Enemy Faction and nothing else. GLT's faction loot columns (Pre-War, Raider, Hospital, NCR, Legion, BoS, Enclave, Mutant and others) are entirely blank. The Roadmap has Looting at Concept. The brief keeps it manual.

> **BUG BG-17** **Enemy caps became dates.** Ranges such as "5-15" and "10-20" auto-converted to calendar dates (May 15, Oct 20) in the Enemies tab. This book reads them back as ranges. Strong Legion Recruit's 50-100 also looks like a copy error beside Legion Recruit's 15-30. The Enemies Items column is empty on every row.

32. Small Guns

Tagged to the Small Guns skill. Damage and Pen come from the ammo. Stats by tier are nearly complete. How to read: T tier · Mag magazine · Rld reload AP · AP attack AP · Cnt bullets per burst · Crit and Jam in % · STR and Skl requirements · R1-R10 base hit % by range · Lb weight · Cap value. Amber rows are missing stats.

UNFINISHED UF-33 Fully statted by tier: T1: 22/22; T2: 26/26; T3: 27/30; T4: 28/28; T5: 27/27; T6: 25/25. Missing: Homemade Marksman Rifle, Homemade Stealth Pistol, Homemade Rifle. Holdout flags (concealable) are in the sheet too, with H-75 and H-100 tied to the perks Ocean's 100 and Stuck it up Your Ass.

BUG BG-18 Some Small Guns' ammo names have no match on the Ammo tab: ".308 Win" (21 guns; the Ammo tab has ".308 WIN", which still matches because lookups ignore case), ".45-70 Govt", "Nails" (Ammo tab: Nail), "Special". Five weapon names have a trailing space: Silenced .22 pistol, .357 Magnum revolver, Pedersen Device, Mysterious Magnum, and AER14 prototype in Energy Weapons.

T	Weapon	Type	Ammo	Auto	Mag	Rld	AP	Cnt	Crit	Jam	STR	Skl	R1	R2	R3	R4	R5	R6	R7	R8	R9	R10	Lb	Cap

33. Big Guns

Big Guns skill: heavy weapons, shotguns, anti-materiel rifles, heavy pistols, bows and crossbows. How to read: T tier · Mag magazine · Rld reload AP · AP attack AP · Cnt bullets per burst · Crit and Jam in % · STR and Skl requirements · R1-R10 base hit % by range · Lb weight · Cap value. Amber rows are missing stats.

UNFINISHED UF-34 Roadmap: "Tier 1-2 IP". Fully statted by tier: T1: 12/12; T2: 16/17; T3: 0/23; T4: 0/21; T5: 0/19; T6: 0/19. Everything from Tier 3 up is a name and class only.

BUG BG-19 Ammo name mismatches: ".50 Cal Ball" (Ammo tab: .50 Ball), "Railway Spikes" (Ammo tab: Railway Spike). The combat sheet checks these strings to tell if ammo fits. Also on the Roadmap: "MAKE MORE B-P, and P-B Weapons" and "Cap grenades at r6".

34. Energy Weapons

Energy Weapons skill. Unlike guns, the weapon holds its own Damage and Pen, and uses cells rather than loads. Many apply a status effect on hit. Groups: Laser (Hot, Fast), Plasma (Hot, Fast), Electromagnetic (Electric, Magnetic), Elemental (Fueled, Powered).

> **UNFINISHED UF-35** Roadmap: "1-2 CHECK". Fully statted by tier: T1: 11/11; T2: 11/11; T3: 2/19; T4: 2/17; T5: 2/18; T6: 1/14.

> **BUG BG-20** "Fast Plama" is misspelled on 10 weapons, and the Stat Converter column says Fast Plasma. Ammo codes (MFC, EC, ECP, Fuel, Nitrogen) don't match Materials' full names (Microfusion Cell, Energy Cell, Electron Charge Pack, Flamer Fuel, Nitrogen Tank), or the Ammo tab, except 2mm EC. The starting loot says "Flamer Fuel". "Acid", "Crank", "Alien Cell" and "Rocket + 50 ECP" have no item at all.

/Sh = ammo per shot. Other columns as for Small Guns.

35. Explosives

Explosives skill: grenades, mines and traps, launchers and missiles. Damage and Pen are on the weapon. Radius is blast size, and Fuze is in turns.

> **BUG BG-21 All 74 explosives have no type code in the master list.** GLT's TC Code formula looks explosives up in column D (Value) rather than E (name), so TC comes back blank. The Combat Sheet routes each weapon by this code, so its skill, hit and damage lookups don't reach the explosive branch.

> **UNFINISHED UF-36** Roadmap: "(CHECK) 1-2 done". Damage filled by tier: T1: 11/11; T2: 10/10; T3: 5/21; T4: 7/14; T5: 5/9; T6: 6/9. There are no rules for blast radius, damage falloff, friendly fire, fuze delay, mine placement, or blowback. Thrown weapons should use the STR rule, but the formula's thrown branch is missing (see melee bug). Ammo mismatches: 40mm G, 25mm G (Ammo tab: 40mm Shell, 25mm Shell), Guided Missile, Mini-Nuke, Flare and Cannonball have no ammo rows.

> **CONFLICT CF-11** Launchers use two damage sources. The formula reads Damage and PEN off the weapon. The Ammo tab also holds 25 Explosive Projectile loads with their own damage and Pen (Rocket, Missile, 25mm, 40mm), which the explosive branch ignores. Dynamite and Flare also share the same "Fire on direct hit" text, which looks copy-pasted.

35. Explosives: changes

Changes since the bible was compiled, oldest first. Where this page and pages 92-94 disagree, this page is current.

Frag Grenade

CHANGED 9 NOV 2026 New: the first throwable.

Distance from the blast	Damage
up to 1 m	12 DMG
up to 2 m	8 DMG
up to 3 m	4 DMG
up to 4 m	2 DMG
up to 5 m	1 DMG
past 5 m	0

1 AP. 0.5 lb. Thrown up to 30 m. It hits everyone in the radius, the party included, and ignores DT and cover. One grenade is used per throw. How to throw is in chapter 11.

Shrapnel causes Bleeding

CHANGED 11 NOV 2026 New.

- Someone hurt by a Frag Grenade and still standing bleeds: Bleeding 5 in the innermost meter, one tier less for each meter out, never under 1.
- Resistance to Bleeding (Cut Gloves and the like) lowers it as usual.

36. Melee Weapons and Natural Attacks

Melee Weapons skill. Each weapon has a primary and usually a secondary attack, chosen with the Combat Sheet's </> toggle. Type names the pair: B-P is Bludgeon then Pierce, S-P is Slash then Pierce, and so on. Hand weapons are worn. Damage comes from the attack. Hit% is 45 almost everywhere. DOT lists a status and chance.

UNFINISHED UF-37 Roadmap: "Rebalancing". Damage filled by tier: T1: 20/20; T2: 24/24; T3: 28/33; T4: 27/27; T5: 6/20; T6: 0/15. Tier 5 and 6 are mostly names. STR requirement is blank on 137 of 139 player weapons. DOT Chance is blank on 211 of 217 rows. Basic Fighting is in the player-weapon list as the default second slot.

Natural attacks

Tier 0 rows give mobs their attacks. Each mob's Weapon field names one of these. They appear with each mob in Chapter 43 too.

37. Ammunition

A gun's damage and Pen come from its loaded ammo type. Each row is a caliber plus a load. The designer's balance is a tradeoff: Hollow Point is more damage and less Pen, AP the reverse.

UNFINISHED UF-38 Blank damage or Pen: .44 Magnum - Mysterious, 2mm EC - Junk, 2mm EC - Standard, 20 Gauge - Magnum Buck, 20 Gauge - 3/0 Magnum, Bolt - Tripwire Backed.

UNEXPLAINED UX-24 Text damage "AxB" (pellets × damage, presumably): .22 LR - Rat Shot, .357 Magnum - Snakeshot, 20 Gauge - Junk, 20 Gauge - 00 Buckshot, 20 Gauge - Birdshot, 20 Gauge - Dragons Breath, 20 Gauge - BOLO, 12 Gauge - Junk, 12 Gauge - Buckshot, 12 Gauge - 00 Buckshot, 12 Gauge - Magnum Buck, 12 Gauge - Magnum 00 Buck, 12 Gauge - Dragon's Breath, 12 Gauge - BOLO, 4 Gauge - Junk, 4 Gauge - Buckshot, 4 Gauge - 00 Buckshot, 4 Gauge - Dragon's Breath, Missile - Canister Shot, Rocket - Canister Shot, 25mm Shell - Dragon's Breath. See Chapter 9. The **D/2 and P/2** columns (half damage, half Pen) feed nothing. The Note column uses "acc/2", "anti-robot", "X5 to robots, PA" and "Knocks down on crit", and no formula reads them. Ammo's Cap column is blank.

BUG BG-22 Inconsistent names: calibers "5.56mm" and "5.56mm NATO" both exist. The load "Dragon's Breath" and "Dragons Breath" both exist, and "Hollow" sits beside "Hollow Point", "HP" beside them, ",+P+" has a stray comma, "AP" and "Armor Piercing" both exist.

37. Ammunition: changes

Changes since the bible was compiled, oldest first. Where this page and pages 101-105 disagree, this page is current.

Ammo kinds, prices and scarcity

CHANGED 9 NOV 2026 Was: every load priced the same, with no sense of rarity. Now: ammo is about scarcity and progression.

You start on junk and standard rounds because they're cheap and plentiful. Better ammo costs more and vendors stock less of it. Each load falls into a kind:

Kind	Loads	Price x
Junk	Junk, Salvaged	0.5
Standard	Standard, Basic, Musket Ball	1
Improved	Surplus, Hand Load, Mil-Spec, Match, +P', +P+, Proof Load, Olympic Quality: a bit better, and pricier or made by hand	1.5
Special	everything else: hollow points, AP, slugs, buckshot and so on	2
Best	the caliber's top special load	3

Ammo has no value in the workbook, so a round costs 1 cap x its tier x its kind's multiplier. The "5.56mm - API" load was filed under a caliber no gun uses; it is now 5.56mm NATO - API.

Ammo comes from inventory

CHANGED 8 NOV 2026 Was: the DM tracked rounds by hand. Now: shots take rounds from the shooter's inventory, enemies included. No rounds, no shot.

38. Weapon Mods

Mods change a weapon, one per location. Locations: Receiver, Barrel, Sight, Impact, Underbarrel, Magazine, Grip, Stock, Frame, Muzzle, Trigger. They are crafted at a Weapon Station with Repair or Science (or Survival). Mastery marks Mastery-level mods. Effects act through the Stat Converter.

> **UNFINISHED UF-39** Effect blank on: Alloy Frame, Muzzle Break, Recon Scope, Short Range Scope, Adjustable Stock, Marksman's Stock, Pistol Added Stock, Recoil Compensating Stock, Short Stock. Tier blank on 83 of 93. Weight, value and required skill level are almost entirely blank. Nothing says how many mods a weapon can hold or how a mod attaches. Most of the Stat Converter's mod effects depend on Variable columns the sheet doesn't apply. Mods are never tied to a specific weapon: a mod marked Active in a character's inventory applies to whatever they fire.

T	Mod	Skill	Mast.	Group	Location	Effect	Applies to	Stat Converter

39. Armor, Clothing and Accessories

A character wears up to six things: **Head**, **Armor**, **Vanity** and three **Accessories**. DT comes from all but Vanity (Chapter 6). Formal is a rating used in social and trait checks. Whole Body and Whole Head pieces fill more than one slot. Power armour has its own Location.

> **UNFINISHED UF-40** Roadmap: "Head options for 2-6, finish and add more accessories". Weight blank on 224 of 289. Value blank on 285. 54 accessories have no buff, nerf or mechanic. Many accessories are themed by weapon type in their name, such as "Spirit of Juba Keffiyeh (DMR)", with effects not written. Armour buffs in text are not automatic.

> **UNEXPLAINED UX-25** Tier 666 rows are outside the normal scale (test or special). Power armor's use rules (training, power, frame) don't exist, even though traits like Bad Leg ("effects removed with Power Armor") rely on it. Faction armor's effect is only in Ghost and Devil in a New Dress.

39. Armor, Clothing and Accessories: changes

Changes since the bible was compiled, oldest first. Where this page and pages 109-117 disagree, this page is current.

Implants

CHANGED 12 NOV 2026 New: nine implants (the New Vegas set): one for each S.P.E.C.I.A.L. stat (+1, 4000 caps), Sub-Dermal Armor (+4 DT, 8000) and Monocyte Breeder (1 HP back each round of a fight, 12000).

- Every character has 4 implant slots. Perks, traits and events can add more ('+1 implant slot'; the DM also has an Extra slots box). They're in Health, at the bottom.
- By a doctor: the chance is 60% + 4% per END + 2% per Luck. Paid only if it works.
- By yourself: needs Medicine 85 to try. The chance is 40% + 4% per END + 2% per Luck + 1% per Medicine point over 85. The implant item is used only if it works.
- Each implant already in makes the next 5% harder. The chance stays between 5% and 95%. Example: END 5, Luck 5 at a doctor: 90% for the first, 85% for the second.
- A failure costs nothing (caps or the implant back) but gives Failed Surgery: -1 STR, END and AGI until a doctor fixes it (250 caps) or you use a Doctor's Bag on yourself.
- Implants are items too, so a vendor can stock them and they can be found. Settings has every number.

40. Consumables and Tools

Items are grouped by category. Using one costs its AP. Effects can stack if Stackable. After Effect fires on its trigger (for example "3 uses") after a time. Addiction % is the chance per use, leading to the Withdrawal.

UNFINISHED UF-41 Roadmap: "Healing Items sort of done". **59 of 246 items have no effect**, including most drinks: Atomic Cocktail, Battle Brew, Green Lady Absinthe, New World Wine, Nukashine, Old Possum, Rum & Nuka, Scotch, Sierra Madre Martini, Vodka, Wasteland Tequila, Whiskey, Ant Nectar, Ant Queen Pheremones, Cannabis (Loud), Fire Ant Nectar, Molly, Quaalude, and 41 more. Status effects for chems are marked WIP. Literature's skill gains: Bookworm mentions books and magazines, but the amounts vary.

BUG BG-23 **Duplicate item names** in Items, which the sheet looks up by exact name, so the second copy is unreachable: Mentats, Party Time Mentats, Antivenom, Burn Balm, Firey Purgative, Hemostatic Injector, Military Bandage, Snakebite Tourniquet, Radaway, Splint.

UNSURE US-27 Duration and After Time have no unit. Beer shows 24 and 12. Hours fits a day, turns fits the Loop's example. The Tier columns beside Initial Effect, After Effect and Withdrawal are mostly blank, and presumably mean the status tier applied.

40. Consumables and Tools: changes

Changes since the bible was compiled, oldest first. Where this page and pages 118-126 disagree, this page is current.

Placeholders

CHANGED 8 NOV 2026 Was: empty-slot markers such as (NO HEADGEAR) were listed like items. Now: they aren't items and never drop.

What drugs, drinks and food apply

CHANGED 8 NOV 2026 Was: effects written as text. Now: each applies a status.

If the workbook gives an item numbers, it keeps those exact numbers under the status. If its text was blank, it uses the status tier's numbers. Rest ends them, and a hangover or comedown can follow.

Item	Status	Numbers	Afterward
Atomic Cocktail	Loose 1, Drunk 1	status numbers	Hangover
Battle Brew	Loose 1, Drunk 1	status numbers	Hangover
Beer - 714 Beer	Loose 1, Drunk 1	S +1, C +1, I -1	Hangover
Beer - Blackwater Brew Beer	Loose 1, Drunk 1	S +1, C +1, I -1	Hangover

42. Crafting Recipes

Every recipe. Count is shown after a × where the sheet gives one. Amber rows have no ingredients.

Weapon (26)

Crafted item	Station	Requires	Materials	Notes
Homemade Marksman Rifle	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Stealth Pistol	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Rifle	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade SMG	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Bow	Workbench	Weaponsmith	Fiberglass, Cloth, Leather	
Homemade X-Bow	Workbench	Weaponsmith	Steel, Cloth, Screws, Springs	
Homemade Gatling Gun	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs, Wood	
Homemade Double Barrel	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade LMG	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Sidearm	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Skullcrusher	Workbench	Weaponsmith	Steel, Weapon Parts, Gear, Springs	
Homemade Thunderstorm	Workbench	Weaponsmith	Fiberglass, Weapon Parts, Circuitry, Aluminum, Gold	
Homemade Wildfire	Workbench	Weaponsmith	Steel, Weapon Parts, Oil, Screws, Asbestos	
Homemeade Kaleidoscope	Workbench	Weaponsmith	Fiberglass, Weapon Parts, Fiberoptics, Circuitry, Silver	
Homemade Plasma Shotgun	Workbench	Weaponsmith	Fiberglass, Weapon Parts, Circuitry, Gold, Silver	
Homemade Grenade	Workbench	Weaponsmith	Steel, Weapon Parts, Explosive Component, Gunpowder	
Homemade Grenade Launcher	Workbench	Weaponsmith	Steel, Weapon Parts, Circuitry, Gear	
Homemade IED	Workbench	Weaponsmith	Steel, Weapon Parts, Explosive Component, Circuitry, Gunpowder	
Homemade Sentry Launcher	Workbench	Weaponsmith	Steel, Weapon Parts, Circuitry, Plastic	
Homemade Firestarter	Workbench	Weaponsmith	Steel, Weapon Parts, Circuitry, Rubber	
Homemade Bartek Bludgeon	Workbench	Weaponsmith	Wood, Acid	
Homemade Hook Hands	Workbench	Weaponsmith	Steel, Rubber, Adhesive	
Homemade Spiral Hook	Workbench	Weaponsmith	Steel, Rubber, Gear, Circuitry	
Homemade Sabre	Workbench	Weaponsmith	Steel, Wood, Leather	
Homemade Sword	Workbench	Weaponsmith	Steel, Wood, Leather	
Railway Rifle	Workbench	—	Steel, Gear, Weapon Parts, Hydraulics	

Mod (93)

Crafted item	Station	Requires	Materials	Notes
Long Barrel	Weapon Station	Science	—	
Snub Barrel	Weapon Station	Science	Adhesive ×1, Glass ×2, Plastic ×4, Screws ×3, Silver ×2	
Heavy Revolver Match Barrel	Weapon Station	Science	Glass ×2, Circuitry ×2, Fiberoptics ×2, Adhesive ×3	
Shotgun Long Tube	Weapon Station	Repair	Steel ×4, Screws ×2, Adhesive ×2	
Shredder Barrels	Weapon Station	Repair	—	
Beam Splitter	Weapon Station	Repair	Circuitry ×2, Aluminum ×1, Fiberoptics ×1	
Focus Optics	Weapon Station	Repair	Steel ×3, Screws ×3, Adhesive ×1	
Plasma Projectile Accelerator	Weapon Station	Science	Aluminum ×2, Circuitry ×3, Screws ×2	

Crafted item	Station	Requires	Materials	Notes
Plasma Splitter	Weapon Station	Science	Aluminum ×2, Circuitry ×4, Screws ×2	
Alpha Strike Barrel	Weapon Station	Repair	Aluminum ×3, Adhesive ×3, Springs ×1, Screws ×2	
Grenade Rifle Long Barrel	Weapon Station	Repair	—	
HD Component	Weapon Station	Repair	Steel ×1, Screws ×1	
Zeroing	Weapon Station	Repair	Fiberoptics ×1, Circuitry ×1	
Carbon Fiber Parts	Weapon Station	Repair	Aluminum ×2, Steel ×2, Adhesive ×1	
Alloy Frame	Weapon Station	Repair	Adhesive ×1, Fiberglass ×3	
Weapon Camouflaging (Desert)	Weapon Station	Survival	Broc Flower ×3, Cloth ×2, Adhesive ×1	
Weapon Camouflaging (Woodland)	Weapon Station	Survival	Wood ×2, Cloth ×2, Adhesive ×1	
Fist Hi-Cap Valves	Weapon Station	Repair	Rubber ×1, Screws ×2	
Sword Balanced Grip	Weapon Station	Repair	Rubber ×3, Adhesive ×2	
California Compliant Grip	Weapon Station	Science	Steel ×3, Adhesive ×3, Springs ×5	
Comfort Grip	Weapon Station	Repair	Adhesive ×2, Rubber ×4, Screws ×2	
Sharpshooter's Grip	Weapon Station	Repair	Gold ×1, Rubber ×3, Adhesive ×2, Wood ×1	
Sweetheart Grip Inlay	Weapon Station	Repair	Rubber ×2, Wood ×2, Adhesive	
Taped Grip	Weapon Station	Repair	Adhesive ×1, Rubber ×3	
Added Rocket	Weapon Station	Science	—	
Blades	Weapon Station	Repair	Steel ×1	
Carbide Teeth	Weapon Station	Repair	Steel ×3, Aluminum ×2, Screws ×2, Adhesive ×1	
Concussion Pack	Weapon Station	Science	Steel ×2, Circuitry ×2, Springs ×4, Rubber ×4	
Electric Coil	Weapon Station	Science	Drained EC ×5, Circuitry ×2, Steel ×1, Adhesive ×1	
Heated Coil	Weapon Station	Science	Drained Flamer Fuel ×5, Circuitry ×2, Steel ×1	
Nuclear Coil	Weapon Station	Science	Nuclear Material ×1, Circuitry ×5, Steel ×1	
Ported Chambers	Weapon Station	Repair	Steel ×1	
Serrated Blade	Weapon Station	Repair	Steel ×3	
Spikes	Weapon Station	Repair	Steel ×1	
Sword Authentic Blade	Weapon Station	Repair	Steel ×2	
Drum Magazine	Weapon Station	Repair	Steel ×5	
Extended Magazine	Weapon Station	Science	Drained Flamer Fuel ×3, Adhesive ×2	
Optimum Quick Mags	Weapon Station	Repair	Aluminum ×3, Springs ×2	
Quick Eject Magazine	Weapon Station	Repair	Steel ×4, Springs ×3	
Speed Mags	Weapon Station	Repair	Aluminum ×5, Springs ×2	
Expanded Tanks	Weapon Station	Repair	Aluminum ×4, Springs ×2	
Launcher Expanded Drum	Weapon Station	Repair	Steel ×2, Screws ×1	
Revolver Extra Shot	Weapon Station	Repair	Aluminum ×2, Adhesive ×1, Rubber	
Muzzle Break	Weapon Station	Repair	Steel ×1, Screws ×2	
Recoil Compensator	Weapon Station	Repair	Steel ×2, Screws ×1	
Silencer	Weapon Station	Repair	Steel ×2, Screws ×1	
Shotgun Choke	Weapon Station	Repair	Aluminum ×3, Adhesive ×3, Rubber ×2	
Automatic Receiver	Weapon Station	Science	Circuitry ×3, Fiberoptics ×3	
Heavy Weapon Dampened Subframe	Weapon Station	Repair	Aluminum ×6, Springs ×3, Steel ×2	
Advanvced Calibration	Weapon Station	Repair	Steel ×4, Screws ×2, Springs ×2	
EC Recycler	Weapon Station	Repair	Aluminum ×3, Springs ×2	
ECW Recycler	Weapon Station	Repair	Steel ×2, Springs ×3, Screws ×4	

Crafted item	Station	Requires	Materials	Notes
Gamma Wave Tuner	Weapon Station	Science	Drained EC ×5, Nuclear Material ×1, Aluminum ×3	
Laser Auto Conversion	Weapon Station	Science	Drained ECP ×5, Nuclear Material ×1, Aluminum ×3	
MFC Recycler	Weapon Station	Science	Nuclear Material ×3, Fiberoptics ×2, Circuitry ×2	
Grenade MG High-Speed Kit	Weapon Station	Repair	Steel ×3, Springs ×2, Screws ×2	
Grenade Rifle Upgraded Internals	Weapon Station	Repair	Steel ×1, Adhesive ×2, Aluminum ×2	
Red Glare Auto Launcher	Weapon Station	Repair	Steel ×1, Rubber ×3, Springs ×3, Screws ×2	
AMR Custom Bolt	Weapon Station	Science	Fiberoptics ×2, Circuitry ×2, Aluminum ×1, Screws ×2	
Carbine Light Bolt	Weapon Station	Repair	Aluminum ×3, Rubber ×3, Springs ×2	
Custom Action	Weapon Station	Science	Drained MFC ×2, Circuitry ×3, Nuclear Material ×1, Aluminum ×1	
LMG Upgraded Internals	Weapon Station	Repair	Oil ×4, Adhesive ×2, Steel ×3	
Rapid Fire Receiver	Weapon Station	Science	Steel ×5, Springs ×4, Circuitry ×3, Screws	
Upgraded Springs	Weapon Station	Repair	Springs ×2, Steel ×1, Adhesive ×1	
Glow Sights (Tritium)	Weapon Station	Repair	Aluminum ×1, Screws ×1, Fiberoptics ×1	
Hybrid Sight	Weapon Station	Repair	Glass ×4, Aluminum ×2, Steel ×1	
Long Range Scope	Weapon Station	Repair	Glass ×4, Aluminum ×3, Fiberoptics ×5	
Medium Range Scope	Weapon Station	Repair	Glass ×3, Aluminum ×4	
Night Vision Scope	Weapon Station	Science	Fiberoptics ×6, Circuitry ×4, Screws ×3, Adhesive ×3, Glass ×5	
Pipe Screw Scope	Weapon Station	Repair	Aluminum ×3, Screws ×4, Adhesive ×2	
Recon Scope	Weapon Station	Science	Glass ×3, Fiberoptics ×6	
Red Dot Scope	Weapon Station	Repair	Glass ×2, Fiberoptics ×2, Screws ×4	
Reflex Sight	Weapon Station	Repair	Glass ×1, Fiberoptics ×3, Screws ×4	
Short Range Scope	Weapon Station	Repair	Glass ×3, Fiberoptics ×2	
Thermal Scope	Weapon Station	Science	Fiberoptics ×8, Circuitry ×6, Glass ×5, Rubber ×3, Adhesive ×4	
Variable Range Scope	Weapon Station	Repair	Aluminum ×5, Glass ×5, Screws ×3, Adhesive ×2	
Adjustable Stock	Weapon Station	Repair	Aluminum, Rubber, Screws, Springs	
Marksman's Stock	Weapon Station	Repair	Wood, Aluminum, Adhesive, Screws	
Pistol Added Stock	Weapon Station	Repair	Springs, Screws, Aluminum, Rubber	
Recoil Compensating Stock	Weapon Station	Repair	Wood, Adhesive, Screws	
Short Stock	Weapon Station	Repair	Rubber, Aluminum, Adhesive	
Hair Trigger	Weapon Station	Repair	Aluminum, Springs	
Targeting Computer Guidance System	Weapon Station	Repair	Aluminum ×2, Springs	
Double Tap Trigger	Weapon Station	Science	Aluminum ×2, Circuitry ×5, Fiberoptics ×3, Adhesive ×6	
Bayonet	Weapon Station	Repair	Steel ×1, Rubber ×2, Adhesive ×2	
Bipod	Weapon Station	Repair	Steel, Screws, Adhesive	
Laser Attachment	Weapon Station	Repair	Aluminum, Circuitry, Glass, Screws	
Strobe Light	Weapon Station	Science	Fiberoptics, Circuitry, Aluminum, Adhesive, Screws	
Underbarrel Flamer	Weapon Station	Repair	Drained Flamer Fuel ×1, Steel ×4, Springs, Adhesive	
Underbarrel Grenade Launcher (v1)	Weapon Station	Repair	Aluminum ×3, Rubber ×2, Springs ×3	
Underbarrel Grenade Launcher (v2)	Weapon Station	Repair	Steel ×4, Rubber ×2, Springs ×3	
Underbarrel Shotgun	Weapon Station	Repair	Steel ×3, Springs ×2, Screws ×4, Rubber ×3	
Underbarrel Taser	Weapon Station	Science	Aluminum ×1, Rubber ×3, Circuitry ×2, Screws ×3	

Junk (1)

Crafted item	Station	Requires	Materials	Notes
Explosive Component	Workbench	—	Oil, Circuitry, Gunpowder	

Ammo (175)

Crafted item	Station	Requires	Materials	Notes
.22 LR - Junk	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.22 LR - Standard	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.22 LR - Hollow Point	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.22 LR - Hand Load	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.22 LR - Rat Shot	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.22 LR - Explosive	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol, Explosive Component	
.22 LR - DU-HE	Reloading Station	—	Case .22 LR, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - Junk	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - Standard	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - Hollow Point	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - Hand Load	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - VelociMax	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
.32 ACP - Cloud Shot	Reloading Station	—	Case .32 ACP, Lead, Powder, Pistol, Primer, Small Pistol	
9mm Parabellum - Junk	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - Standard	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - Hollow Point	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - +P'	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - Hand Load	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - R.I.P. Rounds	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
9mm Parabellum - 7n31	Reloading Station	—	Case 9mm Parabellum, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - Junk	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - Standard	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - Hollow Point	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - +P'	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - Hand Load	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol	
10mm Auto - HE	Reloading Station	—	Case 10mm Auto, Lead, Powder, Pistol, Primer, Standard Pistol, Explosive Component	
.45 ACP - Junk	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - Standard	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - Hollow Point	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - +P'	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - Hand Load	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - HCI	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.45 ACP - Petaled Sabot	Reloading Station	—	Case .45 ACP, Lead, Powder, Pistol, Primer, Standard Pistol	
.357 Magnum - Junk	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.357 Magnum - Standard	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.357 Magnum - Hollow Point	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.357 Magnum - SWC	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	

Crafted item	Station	Requires	Materials	Notes
.357 Magnum - Hand Load	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.357 Magnum - Snakeshot	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.357 Magnum - Raptor	Reloading Station	—	Case .357 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Junk	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Standard	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Hollow Point	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - SWC	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Hand Load	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Carbide Tipped	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.44 Magnum - Mysterious	Reloading Station	—	Case .44 Magnum, Lead, Powder, Pistol, Primer, Heavy Pistol	
.45-70 GOVT - Junk	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
.45-70 GOVT - Standard	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
.45-70 GOVT - Hollow Point	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
.45-70 GOVT - SWC	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
.45-70 GOVT - Hand Load	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
.45-70 GOVT - Proof Load	Reloading Station	—	Case .45-70 GOVT, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - Junk	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - Standard	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - Hollow Point	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - AP	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - Hand Load	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol	
12.7mm HPM - HE	Reloading Station	—	Case 12.7mm HPM, Lead, Powder, Rifle, Primer, Heavy Pistol, Explosive Component	
5mm NATO - Junk	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - Standard	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - Hollow Point	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - Armor Piercing	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - Surplus	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - ,+P+	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5mm NATO - Pulse	Reloading Station	—	Case 5mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm NATO - Junk	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm NATO - Standard	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm NATO - Hollow Point	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm NATO - AP	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm NATO - Surplus	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
5.56mm - API	Reloading Station	—	Case 5.56mm NATO, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - Junk	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - Standard	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - Surplus	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - Hollow Point	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - AP	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.308 WIN - M993	Reloading Station	—	Case .308 WIN, Lead, Powder, Rifle, Primer, Standard Rifle	
.277 Fury - Junk	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	
.277 Fury - Standard	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	
.277 Fury - Hollow	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	

Crafted item	Station	Requires	Materials	Notes
.277 Fury - AP	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	
.277 Fury - Match	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	
.277 Fury - SLAP	Reloading Station	—	Case .277 Fury, Lead, Powder, Rifle, Primer, Standard Rifle	
.338 Lapua Magnum - Junk	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.338 Lapua Magnum - Standard	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.338 Lapua Magnum - HP	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.338 Lapua Magnum - AP	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.338 Lapua Magnum - Match	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.338 Lapua Magnum - DU	Reloading Station	—	Case .338 Lapua Magnum, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 Ball - Musket Ball	Reloading Station	—	Lead	
.50 Ball - Minnie Ball	Reloading Station	—	Lead	
.50 BMG - Junk	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 BMG - Standard	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 BMG - Hollow Point	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 BMG - AP	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 BMG - Match	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle	
.50 BMG - MK 211	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle, Explosive Component	
.50 BMG - HE	Reloading Station	—	Case .50 BMG, Lead, Powder, Rifle, Primer, Heavy Rifle, Explosive Component	
2mm EC - Junk	Reloading Station	—	Steel	
2mm EC - Standard	Reloading Station	—	Steel	
20 Gauge - Junk	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - Buckshot	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - 00 Buckshot	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - Birdshot	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - Slug	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - Dragons Breath	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - HE Slug	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun, Explosive Component	
20 Gauge - BOLO	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - Magnum Buck	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
20 Gauge - 3/0 Magnum	Reloading Station	—	Case 20 Gauge, Lead, Powder, Rifle, Primer, Shotgun	
12 Gauge - Junk	Reloading Station	—	Case 12 Gauge, Lead, Powder, Shotgun, Primer, Shotgun	
12 Gauge - Buckshot	Reloading Station	—	Case 12 Gauge, Lead, Powder, Shotgun, Primer, Shotgun	
12 Gauge - 00 Buckshot	Reloading Station	—	Case 12 Gauge, Lead, Powder, Shotgun, Primer, Shotgun	
12 Gauge - Magnum Buck	Reloading Station	—	Case 12 Gauge, Lead, Powder, Shotgun, Primer, Shotgun

Flamer Fuel	Reloading Station	—	Drained Flamer Fuel, Oil	
Nitrogen	Reloading Station	—	Drained Nitrogen Tank, Acid	

Part VIII. Enemies

Who the party fights.

43. Enemies

The Enemies tab has 134 templates: 48 humans, 79 mobs and 7 test rows. **Humans** have full SPECIAL and skills, and derived stats come from formula, like players. **Mobs** have hand-set HP, DT, AP and initiative, a PER and LCK, and a natural attack from Chapter 36. Tiers run 1-6.

UNFINISHED UF-42 Roadmap: Human Enemies "Flesh out campaign specific". Non-human stats marked CHECK. Blank: Assaultron stats and XP; Displaced Resident; XP on the first named Goodsprings and Powder Gang characters. Faction is filled on only 5 rows. Notes and Items are empty on all rows. No mob has a Saving value.

BUG BG-24 Broken links: enemy weapon "Assaultron Arm" doesn't exist, and armor "Prison Body Armor" doesn't exist (the item is Prison Guard Body Armor). Testy Tessie's DT shows #N/A as a result. "Agamemnon" uses "Hailberd" and "Counting (Kirk)": hand-picked for a test.

UNEXPLAINED UX-26 XP values show an apparent ceiling at 50: everything from Deathclaw Baby (T3) to Legendary Deathclaw (T6, 300 HP) gives 50 XP, which looks like a placeholder. Supermutants are typed Human. "Strong PA Recruit" sits beside PA Initiate, a likely naming slip. Some stats are odd: Giant Rat Pup has more HP than Giant Rat; Radscorpion Queen has DT 0; Civilian Eyebot has more HP than Military Eyebot.

Amber: no weapon set.

Human skills

> **UNFINISHED UF-43** Generic human templates only fill in their weapon skills (Energy Weapons, Small Guns, Big Guns, Melee). Every other skill is blank, which breaks any check against an NPC's Speech, Sneak or Survival. It also means their saving throw is computed from Survival 0.

Test rows

(NO ENEMY), (middle opp.), (min opp.), (max opp.), EVIL TEST, Agamemnon and Testy Tessie are creator-tagged TEST and used for the sheet's own balance checks. Tier 666 Wild Boar is a joke or test mob, and also the name of a trait repression.

43. Enemies: changes

Changes since the bible was compiled, oldest first. Where this page and pages 139-144 disagree, this page is current.

Enemies by faction

CHANGED 8 NOV 2026 Was: one list. Now: every enemy has a faction, and creatures and anyone non-specific are Unaligned. People's HP, AP and DT come from their SPECIAL and tier. Creatures have fixed numbers.

Boomers (1)

Name	Tier	XP	Caps	Weapons
Boomer Spotter	3	20	25-40	Battle rifle, Knife

Brotherhood of Steel (6)

Name	Tier	XP	Caps	Weapons
PA Initiate	3	30	25-40	generated by tier
Strong PA Recruit	3	35	25-40	generated by tier
PA Knight	4	40	30-55	generated by tier
Strong PA Knight	4	45	30-55	generated by tier
PA Paladin	5	50	50-100	generated by tier
Strong PA Paladin	5	55	50-100	generated by tier

Caesar's Legion (8)

Name	Tier	XP	Caps	Weapons
Legion Recruit	2	10	15-30	generated by tier
Strong Legion Recruit	2	15	50-100	generated by tier
Legion Soldier	3	20	25-40	generated by tier
Strong Legion Soldier	3	25	25-40	generated by tier
Legion Veteran	4	30	30-55	generated by tier
Strong Legion Veteran	4	35	30-55	generated by tier
Legion Frumentarus	5	40	50-100	generated by tier
Strong Legion Frumentarus	5	45	50-100	generated by tier

Chairmen (3)

Name	Tier	XP	Caps	Weapons
Chairman Greeter	2	10	15-30	9mm Auto Pistol (Glock), Knife
Chairman Hitman	3	20	25-40	Burst Pistol, Switchblade
Chairman Boss	4	35	30-55	Silenced Mercenary Rifle, Rebar Club

City Muggers (5)

Name	Tier	XP	Caps	Weapons
Back-Alley Mugger	1	5	0-10	Straight Razor, .32 Pistol
City Mugger	1	5	0-10	Switchblade, Basic Fighting
Pickpocket Crew Lookout	1	5	0-10	Knife, Basic Fighting
Street Tough	2	10	15-30	Lead Pipe, Brass Knuckles
Corner Boss	3	25	25-40	Burst Pistol, Police Baton

Crime Families (4)

Name	Tier	XP	Caps	Weapons
Gangster	2	10	15-30	generated by tier
Strong Gangster	2	15	15-30	generated by tier
Mobster	3	20	25-40	generated by tier
Strong Mobster	3	25	25-40	generated by tier

Crimson Caravan (1)

Name	Tier	XP	Caps	Weapons
Crimson Caravan Guard	2	10	15-30	Lever Action Rifle, Knife

Fiends (9)

Name	Tier	XP	Caps	Weapons
Fiend Junkie	2	10	10-20	Lead Pipe, Pipe Pistol
Fiend Stoner	2	10	10-20	9mm Auto Pistol (Glock), Tire Iron
Fiend	3	20	20-50	generated by tier
Fiend Chem Cook	3	20	20-50	Compact 10mm SMG (Uzi), Knife
Fiend Enforcer	3	20	20-50	Battle rifle, War Club
Fiend Psycho	3	20	20-50	Sledgehammer, Basic Fighting
Fiend Pyro	3	20	20-50	Pipe Flamer, Lead Pipe
Strong Fiend	3	25	20-50	generated by tier
Fiend Warlord	4	35	30-55	Handmade Rifle (AK47), Mace

Garrets (2)

Name	Tier	XP	Caps	Weapons
Garret Bouncer	2	10	15-30	Baseball Bat, .45 Auto pistol
Garret Enforcer	3	20	25-40	Burst Pistol, Pool Cue

Goodsprings (2)

Name	Tier	XP	Caps	Weapons
Displaced Resident	1		-	generated by tier
Sunny Smiles	1		-	Varmint rifle, Basic Fighting

Great Khans (3)

Name	Tier	XP	Caps	Weapons
Great Khan Raider	2	10	10-20	Pipe Shotgun, Baseball Bat
Great Khan Armorer	3	20	25-40	Battle rifle, Sledgehammer
Great Khan Warlord	4	35	30-55	Brush gun, War Hammer

Highwaymen (5)

Name	Tier	XP	Caps	Weapons
Highwayman Lookout	1	5	5-15	Varmint rifle, Knife
Highwayman Bandit	2	10	10-20	RSC SMG, Tire Iron
Highwayman Toll Collector	2	10	10-20	Shovel, .45 Auto pistol
Highwayman Sharpshooter	3	20	25-40	Marksman carbine, Knife
Highwayman Captain	4	35	30-55	Trail carbine, Mace

Jackals (5)

Name	Tier	XP	Caps	Weapons
Jackal Gang Member	1	5	5-15	Pipe Rifle, Prison Shiv
Jackal Hanger-On	1	5	5-15	Hatchet, Basic Fighting
Jackal Pup	1	5	5-15	Pipe Pistol, Knife
Jackal Dog Handler	2	10	10-20	Baseball Bat, Basic Fighting
Jackal Pack Leader	2	15	10-20	.357 Magnum revolver, Lead Pipe

NCR (8)

Name	Tier	XP	Caps	Weapons
Recruit	2	10	15-30	generated by tier
Strong Recruit	2	15	15-30	generated by tier
Soldier	3	20	25-40	generated by tier
Strong Soldier	3	25	25-40	generated by tier
Strong Veteran	4	35	30-55	generated by tier
Veteran	4	30	30-55	generated by tier
Ranger	5	40	50-100	generated by tier
Strong Ranger	5	45	50-100	generated by tier

Omertas (3)

Name	Tier	XP	Caps	Weapons
Omerta Thug	2	10	15-30	.45 Auto pistol, Police Baton
Omerta Button Man	3	20	25-40	Compact 10mm SMG (Uzi), Knife
Omerta Capo	4	35	30-55	Silenced Mercenary Rifle, Rebar Club

Powder Gangers (4)

Name	Tier	XP	Caps	Weapons
Powder Ganger 1	1		-	Police pistol, Basic Fighting
Powder Ganger 2	1		-	Pipe Pistol, Dynamite
Powder Ganger Ringleader	1		-	Police pistol, Single Shotgun
Powder Ganger Sharpshooter	1		-	Pipe Bolt Action Rifle, Hatchet

Raiders (2)

Name	Tier	XP	Caps	Weapons
Raider	2	10	10-20	generated by tier
Strong Raider	2	15	10-20	generated by tier

Rogue Scavengers (5)

Name	Tier	XP	Caps	Weapons
Rogue Scavenger	1	5	5-15	Pipe Rifle, Pipe Wrench
Scav Picker	1	5	5-15	Knife, Pipe Pistol
Scav Salvager	2	10	15-30	10mm Carbine, Crowbar
Scav Tinkerer	2	10	15-30	Taser, Hammer
Scav Crew Boss	3	25	25-40	Marksman carbine, Shovel

Super Mutants (4)

Name	Tier	XP	Caps	Weapons
Strong Supermutant	4	45	50-100	generated by tier
Supermutant	4	40	50-100	generated by tier
Strong Supermutant Lieutenant	5	55	75-200	generated by tier
Supermutant Lieutenant	5	50	75-200	generated by tier

The Kings (2)

Name	Tier	XP	Caps	Weapons
King Greaser	2	10	15-30	.357 Magnum revolver, Switchblade
King Lieutenant	3	25	25-40	Police Carbine (M1Carbine), Tire Iron

Tribals (2)

Name	Tier	XP	Caps	Weapons
Strong Tribal	2	15	0-10	generated by tier
Tribal	2	10	0-10	generated by tier

Van Graffs (1)

Name	Tier	XP	Caps	Weapons
Van Graff Thug	4	30	30-55	Radium Rifle, Mace

Vipers (5)

Name	Tier	XP	Caps	Weapons
Viper Cutthroat	1	5	5-15	Switchblade, Pipe Pistol
Viper Gunslinger	2	10	10-20	Lever Action Rifle, Knife
Viper Road Warrior	2	10	10-20	Tire Iron, Pipe Shotgun
Viper Snake Handler	2	10	10-20	Straight Razor, Basic Fighting
Viper Gang Leader	3	25	25-40	Cowboy repeater, War Club

White Glove Society (2)

Name	Tier	XP	Caps	Weapons
White Glove Attendant	2	10	15-30	Silenced .22 pistol, Knife
White Glove Butcher	3	20	25-40	Cleaver, Burst Pistol

Radscorpion Queen	6	50	-	Radscorpion Queen
Wild Boar	666		-	Wild Boar

The Factions window

CHANGED 12 NOV 2026 New: a Factions button on the right-hand rail.

- One tab per faction. Every campaign starts with the New Vegas factions and their leaders (NCR, Caesar's Legion, Brotherhood of Steel, Mr. House, Great Khans, Powder Gangers, Fiends, Boomers, Omertas, Chairmen, White Glove Society, The Kings, Followers of the Apocalypse, Van Graffs, Crimson Caravan). Tabs can be added and deleted.
- Each faction has its standing toward the party (Vilified, Hated, Disliked, Neutral, Accepted, Liked, Idolized) and how many of its members the party has killed. The count goes up by itself when an enemy of that faction dies in a fight, and the DM can type it.
- Its hierarchy is an org chart of boxes: + Leader, then + Under on anyone for a co-leader, underbosses and so on. Every title and name can be typed over; X removes a box and everyone under it; Dead marks someone dead.

- A new faction has a naming theme: military organization, political system, raider gang, organized criminal group, tribe, humanitarian, religious order, merchant company or Legion. Generate hierarchy fills the chart with that theme's ranks and fresh names (a faction with its own name style, like the NCR or the Legion, uses it). Undo brings back what was there.

Part IX. Open Items

What still needs a decision, every flag in one place, and what the designers have planned.

44. Decisions Needed

These are the items that block a complete game, in rough priority. Each could be settled in a sentence or two. The first group comes straight from the brief, and the rest were found while writing this book.

Flagged as undecided in the brief

1. **Saving throws.** What happens on success or failure? Does Times Revived (−20% each) ever reset, or have a floor? (Chapter 18)
2. **XP after a defeat.** (Chapter 18)
3. **Luck and crits.** Weapon crit % straight, or scaled by Luck as the sheet does it? (Chapter 9)
4. **Buckshot.** The Gen Info row is blank, and pellet ammo is text. Also confirm burst hit counts. (Chapter 9)
5. **Looting and Action XP/AP.** Stay manual for now.

New questions from this review

1. **Jam chance.** Weapon % straight, or scaled by Luck and Condition as in the sheet? If the former, Condition has no job. (Chapter 9)
2. **What does a jam do?** Is AP lost, and what does clearing it cost? (Chapter 9)
3. **Cover.** Three conflicting versions: −15, −25, or five tiers. (Chapter 12)
4. **Darkness.** −10 to enemy hit, or a PER penalty on everyone? (Chapter 14)
5. **Passive healing.** How much, and when? (Chapter 17)
6. **Who earns enemy XP?** Killer, party split, or everyone in full? (Chapter 21)
7. **Skill check difficulty scale,** plus how "+10% easier" perks convert. (Chapter 7)
8. **Sneak roll formula,** and the base sneak attack bonus. (Chapter 16)
9. **Untargeted shots.** Default to Body? Why would Body cost +1 AP when targeted? (Chapter 9)
10. **Movement.** Hex by hex, or by range band at the printed AP costs? (Chapter 12)
11. **Melee STR penalty size.** Fixing the known bug at its written strength can produce a penalty over 100%. (Chapter 8)
12. **Skill perks.** One per threshold, or the whole tree? (Chapter 25)
13. **Barter prices.** Is ×14 at Barter 7 intended? (Chapter 29)
14. **Active inventory.** What it means, and whether armour class sets its size. (Chapter 28)
15. **Status infliction.** Chance, duration and resistance. (Chapter 27)
16. **Weapon generation for enemies.** Which weapons fit which tier and faction, and which are unique? (Chapter 20)

45. Open Items Register

Every flag in this book, with a link to where it appears. Count: 43 unfinished, 26 unexplained, 27 unsure, 11 conflict, 25 bug.

ID	Kind	Page	Item
US-01	Unsure	5	The brief names the file `Fallout_Spreadsheet.xlsx`, but the only workbook in the folder is `Fallout Spreadsheet(4).xlsx`. This book assumes they are the same file.
UX-01	Unexplained	7	The checklist includes a **Deck of Cards** for gambling, but no gambling rules exist anywhere in the workbook. Traits such as Gambling Addict and New Vegas Legend depend on them.
US-02	Unsure	7	The checklist calls for AP tokens, and the Gameplay Loop has players hand them in. The brief plans to track AP in the app instead. This book describes the token version because that is what the sheet documents, but the rule is the same either way.
UX-02	Unexplained	10	Gen Info lists effects with no mechanic behind them: Perception "Random Encounter, More Visual Info"; Endurance "Survival Mechanics, Fatigue, Mental Health"; Agility "Evade Chance"; Charisma "Companions"; Luck "Gambling, Luck Checks". No evade or companion system exists in the workbook.
US-03	Unsure	10	No maximum SPECIAL is enforced. The nominal cap of 10 is inferred from the test enemy "(max opp.)" and from level perks that require "9+" and "10+". Traits can push a value above 10.
UX-03	Unexplained	11	Gen Info gives Small Guns as "up to .308" and Big Guns as "above .308 and heavy guns". The weapon tabs mostly follow this, but Big Guns also holds bows, crossbows and heavy pistols. The rule for which tab a new weapon goes on is not written down.
UX-04	Unexplained	11	Several traits refer to skills that are not on the sheet: **Unarmed** (One Punch Man: "Unarmed 75"), **Shotguns** (Country Boy/Girl: "10+ shotguns") and **Hand** (Urbanite: "10+ Hand"). Unarmed attacks use the Melee Weapons skill in the formulas.
CF-01	Conflict	12	**AP.** Gen Info says 5 + (AGL÷2). The sheet computes 5 + AGL, and that is what produces every current character's AP. This book treats the formula as correct and the Gen Info text as stale.
CF-02	Conflict	12	**DT slots.** The player formula adds Head, Armor and Accessories 1-3 but not Vanity. The enemy formula (Enemies!AN2) adds Head, Armor and Vanity, and enemies have no accessory slots. If Vanity clothing is worth DT, players lose it and enemies keep it.
UX-05	Unexplained	12	Gen Info keeps an old carry formula beside the new one: "was: 120 LB + (END x 10)". The new one is used. Its printed form, 25 + ((STR+(END/2)/2) * 25), matches the sheet.
US-04	Resolved 13a	13	The formula produces targets of 21+ and of 1 or below at the extremes. This book assumes natural 20 and natural 1 settle those cases, as in the table above. The same reading means the best possible check is 95% and the worst 5%.
UF-01	Resolved 13a	13	No difficulty scale is written down. The Loop's example uses "10 difficulty", but starting skills are around 5-35 and the examples in the brief use 80. A table of what an easy, hard and impossible target looks like is needed for consistent rulings.
UX-06	Unexplained	13	Some perks express checks as percentages, such as "Speech checks towards lies are +10% easier" and "Lockpick success chance +10%". The d20 formula has no percentage step. The conversion is undefined. The nearest reading is 10 points of skill, which is 2 on the die.
UX-07	Unexplained	13	Several perks use their own roll formulas: Sicilia Con Furore (Melee÷100), Looksmaxxing (STR+CHA out of 20), Sowwy and Fat Roll (two SPECIAL÷20). These are percentage or roll-under rolls, a different form from the standard check.
BG-01	Resolved 154a	14	**Melee STR penalty never applies** (known). In Combat Sheet!I24, the outer IF returns 0 for melee before the inner melee branch can run. The brief says to apply the penalty. Melee's penalty at 5% × Req per point is much harsher than the gun version. Check this for balance before fixing: a STR 5 character using a STR 8 weapon would lose 120%.
BG-02	Resolved 15a	14	**Overskill** (known, and broader than described). The term IF(skill>100, skill÷100, 1) is meant to reward high skill, but it does not do so consistently. At **R1 and R6** it multiplies only the PER and STR penalties, making them worse. At the **other eight ranges** the brackets wrap the whole sum, so it multiplies base + skill + penalties: good when the sum is positive, worse when negative. The brief says high skill should not make penalties worse.
BG-03	Resolved 15a	14	**95% cap is not applied.** No formula in Combat Sheet row 24 or 32 limits the result, so a sum over 100% yields a negative miss threshold. The cap exists only as text in Gen Info and in the brief.

ID	Kind	Page	Item
BG-04	Bug	15	**Circular cell.** Combat Sheet!K6 tests itself: =if(K6>100,"NO ROLL",...). It presumably should test the computed value. The "NO ROLL" state only works by accident of iterative calculation. The intended rule is clear: below 0% hit chance, the shot cannot be attempted.
BG-05	Bug	15	**Melee secondary Hit% is ignored.** Formula reads Pr. Hit% for both attacks, so the Se. Hit% column does nothing. Current data hides this because the filled values are all 0.45, but 83 rows have it blank.
CF-03	Resolved 154a	15	**PER and STR penalties.** CS Worksheet's design notes say −10% per PER point and −5% per STR point, and include a step "4. INT (?)". Gen Info says Accuracy is "Base Weapon acc (corresponding skill/2)". The live formula uses 5% for PER, the scaled STR penalty above, no INT, and (skill−req)÷2. This book follows the live formula.
UF-02	Unfinished	15	Roadmap note: "Rebalance Chance to Hit with new DC" (assigned to Lead 2,not marked done), alongside "Melee Damage, Pen, Hit". Expect these numbers to change.
UX-08	Unexplained	15	Enemy attackers only read the player target's **Enemy Acc** column. Player attackers read only their own accuracy. So nothing in the sheet reduces a player's hit chance against a target in cover or darkness, even though the Loop's example says "darkness imparts −10 enemy chance to hit" and enemies can presumably take cover.
CF-04	Resolved 154a	16	**Crit chance.** Brief: crit is the weapon's % straight. Sheet: crit is scaled by LCK÷5 and by the hit chance itself, so a low-odds shot almost never crits. Gen Info says Luck drives crit. The brief lists "how much Luck affects crits" as undecided, so this needs a decision.
CF-05	Resolved 154a	16	**Jam chance.** Brief: the weapon's % straight. Sheet: scaled by 10÷LCK and raised by poor Condition. At LCK 2 a 10% weapon fails on anything up to 49. CS Worksheet's note uses 2 × (10 − Condition), while the live formula uses 1 ×.
UF-03	Resolved 18a	16	**What a jam does is not written anywhere.** Nothing says if the shot is lost, whether the AP is spent, or what clearing it costs. The one clue is a Stat Converter flag: "-1 Unjam Cost". Melee weapons also have a Fail % with no meaning given. Perks also refer to "Critical Fails hit YOU" and "Enemy Crit fails reflect back".
US-05	Resolved 154a	16	**Fractional bands.** Sheet thresholds such as 82.5 land between die faces. The brief's examples use whole numbers, but no rounding rule is given when a modifier produces a fractional hit chance. Rounding hit chance down before building bands is a conservative default.
UX-09	Resolved 154a	17	Stat Converter has columns for **Super Crit Roll**, **Super Fail Roll** and **Enemy Fail Roll**, and traits refer to "+1 Super Crit roll" and a "Super Fail". No formula reads them, and a Super Fail band is defined nowhere.
US-06	Resolved 18a	17	**Ammo use.** The sheet's Magazine cell just shows capacity and never counts down, so the DM tracks rounds by hand. It presumably costs Count rounds per burst, hit or miss. Energy weapons have a separate Ammo Per Shot column, and Spray N' Pray's evolution says "criticals no longer consume ammo".
US-07	Resolved 18a	17	**Confirm how burst hit counts work.** The brief asks for this too. There are two descriptions. Gen Info: "D100 for hit chance, divisible dice for # of hits", which fits the band-splitting above. The Loop's example: "P4 rolls for # of bullets hit", which reads like a separate roll. Also unclear: with a crit, does every bullet connect, and are they all crits? The brief's rule puts crits above the hit band, which changes the size of the band being divided.
US-08	Resolved 18a	17	**Damage per burst.** The Combat Sheet has one Final Dmg cell and one HP Lost cell. Whether DT applies per bullet is implied by the per-bullet calculation but not stated. It matters a lot, because Pen against DT is the main defence against bursts. The Ammo tab also has unused D/2 and P/2 columns (half damage, half Pen), which may have been a burst rule.
UF-04	Resolved 18a	17	**The Buckshot Mechanic row in Gen Info is blank.** Pellet loads have a damage value written as text: 12 Gauge Buckshot "2x10", 20 Gauge Birdshot "0.25x20", .22 Rat Shot "3x2". Text damage cannot pass through the damage formula, so the cell falls back to blank on these loads. Meanwhile 20 Gauge Buckshot is numeric (8). One Small Gun's note also says "Shoots 2 projectiles for one shot (one calc)".
US-09	Resolved 18a	17	No rule says what happens to an untargeted shot. The Combat Sheet's location cell defaults to Body, so an untargeted shot is presumably a Body hit at normal AP, yet targeted Body costs +1 AP for the same multiplier. The perk Seen It Coming ("no cost for targeted body or headshot") confirms the surcharge on Body exists. Roadmap Phase Two lists "Targeted Limbs" and "Location Variance" as not started. A hit-penalty for called shots is also undefined: nothing in the formula changes with location.
UF-05	Unfinished	17	Roadmap ideas not yet rules: "Snap shot (roughly 1.5) for high roll" (the perk Spec Ops mentions a "cost to snapshoot"), "Some sort of Piercing shot with AMR/GAUSS", and the Suppression perk idea.
UX-10	Resolved 154a	19	Stat Converter holds **Crit D**, **Crit Mult**, **Super Crit Mult**, and **Limb, Body and Head Mult** columns, and many perks use them (for example Plinkster's 4x crit). None is read by the damage formula, so those effects exist on paper only. The Damage modifier and Pen modifier are live.
BG-06	Bug	19	Minor: on weapon slot 2, Combat Sheet!K35 tests R17="02" (slot 1's weapon) where it should test R25. It is harmless, because both branches do the same thing.
UF-06	Unfinished	19	Roadmap: "(REBALANCING) Buff DT and Pen on par with projectiles" for melee. CS Worksheet also has a separate "16b. MW Damage" step and note that melee is meant to have a "STR damage calc". The live formula has no STR scaling on melee damage. Gen Info also says STR governs "Melee Weapons, Unarmed".

ID	Kind	Page	Item
UF-07	Resolved 21a	21	The **Action AP** tab holds only two row labels (Open Inventory, Hand Item) and no costs. The brief confirms it is unfinished. Whether opening inventory costs AP matters: the "Active" inventory system and the Thick-Skin trait ("cannot access inventory in combat") both assume it means something.
US-10	Resolved 21a	21	AP refresh is never stated. The sheet's AP Spent cell is cleared by hand. It is assumed that AP fully refills at the start of a combatant's turn and cannot be saved. Status effects like Thirst or Fatigue reduce AP, and several traits grant conditional AP "next turn".
US-11	Unsure	21	CS Worksheet lists "heal" and "use item" as separate moves, and Wield or Unjam have no cost. The trait Bad Leg and the Splint both mention extra AP for moving, which implies movement has a per-move cost the rule below does not fully settle.
US-12	Resolved 21a	22	**Reading the AP rows.** They have no label. Row 2 looks cumulative and row 3 looks like the cost of each step. Taken as movement, walking from R1 out to R10 costs 15 AP, and bands further out cost more. That is this book's reading, but CS Worksheet only lists "move in" and "move out", and one Stat Converter note says "Player Chooses Range in CS (costs 1AP)". Hex-grid movement and band movement also do not obviously fit together.
UX-11	Resolved 22a	22	**Hex scale.** A hex distance of N maps straight to column R(N), but the columns span PB to 150m. So hexes are not a fixed size, which looks like a deliberate abstraction. It is not explained. Distance beyond 10 has no column. Distance 0 (same hex) finds no column, and only melee works.
CF-06	Resolved 154a	22	**Three versions of cover.** (1) Gen Info: 2 AP, −15. (2) The Combat Sheet's per-player COVER checkbox feeds Stat Converter's "Hard Cover" row, which gives −25% Enemy Acc. (3) The Status Effects tab has a Cover row with five named tiers (open, concealment, soft cover, hard cover, impenetrable) and no numbers. Perks like Unstoppable Force also mention destroying concealment. Which one rules?
UF-08	Resolved 22a	22	Nothing says when cover ends, or if moving breaks it. Roadmap Phase Two lists "Env. Interacting" as not started. The Torbjorn perk builds cover, and Hunker Down gives a bonus "when in cover".
BG-07	Bug	23	**Weapon-type filters do nothing.** A perk such as Pistolero sets Total Acc +5% and flags Revolver, Semi-Auto Pistol and Plinker. The flag is never read, so the bonus applies to every weapon the character uses. Character 4' Pipe Pistol shows the +5% from One-Handed, and that same +5% would reach any other weapon the character picked up.
BG-08	Bug	23	**Situations are partly cut off.** Most total columns sum rows 6-447, but situations live on rows 448-492. Only SPECIAL, skills, HP, DT, AP and Carry (to 492) and the accuracy columns (to 501) include them. Situational changes to Carry /, Initiative, Saving, Damage, Crit, AP Cost, Reload and Pen would be silently ignored. No situation uses those today, so nothing is broken yet.
UF-09	Unfinished	23	Only 16 of 487 rows are marked Done. 87 are marked Variable (conditional, can't be a fixed number). The Roadmap says Skill Perks need "testing and integration into relevant calculations".
BG-09	Bug	23	**Crit modifiers.** Weapon slot 1's crit chance reads fixed rows (`'Stat Converter'!`BH2, BH3, BH4) instead of the name lookup the other columns use, so it only works while party order matches. **Player 4's formula (AS22) leaves the modifier out altogether**, so that character never gets crit bonuses from traits or perks.
UF-10	Unfinished	25	37 of 45 situations have no modifier. Rain, fog, snow, sandstorm, The Cloud, alarms, altitude, all terrains and most lighting are names only. Roadmap Phase Two lists "Location Variance" as not started.
CF-07	Conflict	25	**"Plains" does not exist.** The brief's default is Daytime - Clear - Plains. The environment list has no Plains. The sheet is currently set to **Grassland**, the closest match.
CF-08	Conflict	25	**Darkness.** The Loop's example says darkness imparts −10 enemy chance to hit, and the brief repeats it. Stat Converter models darkness differently, as a PER penalty on *everyone* (Dusk −3, Midnight −5, Pitch Black −9). PER only affects range penalties and initiative. The −10 has no source. It looks like an OOC check result set by the DM, so this book treats it that way.
UX-12	Unexplained	25	Thunderstorm gives +25 Sneak and Heatwave −50% AP (a harsh value worth a look). Desert gives −25% AP, even with no heat. Situation names like "Dense Forest (Santa Cruz)" and "Suburban (Irvine)" hint at real-world campaign locations.
US-13	Unsure	29	**The sneak formula is ambiguous.** "Sneak/5 − 5" at Sneak 50 gives 5, and gives 1 at Sneak 30. It could be a target to roll under, or a modifier. This book cannot tell which, and it does not match the standard skill-check formula. The Roadmap marks Sneaking as "Process in Gameplay Loop, Need to Review".
UF-11	Unfinished	29	**Sneak attack benefits have no base rule.** The Loop says "DM calculates stat changes from Sneak move". Sneak perks "increase Sneak Crit Bonus" and name multipliers like 2x and 3x, but the base bonus is defined nowhere. What sets the difficulty, and what enemies do once alerted, is also undefined.
UF-12	Resolved 29a	29	No rule picks between set initiative and rolled initiative for enemies. The Loop only says "enemy rules for initiative". Grouping ("Raider 1, 2, 3" act separately in the example) is implied.

ID	Kind	Page	Item
UX-13	Unexplained	30	**NPC targeting has no rule**, which seems intentional. The DM chooses. Traits force some cases: Peacock ("all enemies target you first"), Blinded by Rage ("Mob: target all").
UF-13	Unfinished	30	**Enemy flee checks have no rule** ("Raider 3 rolls a Flee check and succeeds"). No morale stat or threshold exists. Afraid mentions involuntary fleeing and Coward says "always pass flee", so player fleeing is also undefined.
UF-14	Resolved 34a	30	**Passive healing has no number.** The Loop says "add passive heal post combat" and again at camp, but no amount or formula exists. The brief does not cover it. Perks only imply it exists: Bounceback "regain 20% HP at end of combat".
US-14	Unsure	30	**Time units.** Effect timers are in turns in some places ("P4 loses 2 turns of beer effect") and unlabelled in others (Items Duration: 24, After Time: 12). A combat round is presumably one "turn", but how OOC time counts is unclear. Roadmap Phase Two lists "OoC Time" as not started.
UX-14	Unexplained	30	The Combat Sheet has a Bloody Mess flag and a "Hit EN" counter, a Split flag and a UN Kill counter. These are per-player trait trackers placed in fixed slots, so they only work for the current party.
UF-15	Unfinished	30	**Weapon Condition** sits on the sheet as a 1-10 value (usually 10) that worsens jam chance. Nothing makes it fall. The Weapon Repair Kit improves it "by Rep/20", and Jury Rigging repairs with similar weapons. No wear rate exists, and the brief's flat jam % leaves Condition with no role at all.
UF-16	Resolved 31a	30	**Limb damage and crippling.** Injured Limb tiers exist, and traits talk about "cripple chance", "limbs cripple 2x quicker" and "double durability". No limb HP or cripple roll exists.
CF-09	Conflict	32	CS Worksheet says a KO character is *eliminated* from initiative. The brief says to keep a DBNO state *in* initiative. The brief is treated as current. The trait Fear of Death and Cloud Poison's "Above this point you die" hint that real death exists somewhere.
BG-10	Bug	32	**Cap** (known). In Player Sheets!AN2 and Enemies!AR2, a value above 20 becomes 19, while exactly 20 stays 20. So a stronger character gets a worse number. It should cap at 20.
CF-10	Conflict	32	**Revive penalty is missing from the formula.** Gen Info writes the save as ((LCK×10%) + (Survival÷2)% − (Times Revived×20%)) ÷ 2. The sheet's version has no Times Revived term, and its ÷2 is only on the Survival part. The brief says Times Revived is −20% each.
US-15	Unsure	32	**Roll direction is not stated.** Since higher LCK gives a higher number, the only sensible reading is: roll a d20, and succeed **at or under** the number. The perks Saved by the Bell ("improves Saving throw by 1 roll") and Last Stand ("*2 odds") fit that, as does the formula's % origin.
UF-17	Unfinished	32	**What a saving throw does is undecided** (brief, and Roadmap: "What happens after saving throw"). Does success get you up, stabilise you, or hold off death? What does failure do? Does Times Revived ever reset, and does it have a floor? Both are open.
US-16	Unsure	32	The Loop's revive example happens post-combat, but it also says the character "returns to the fight". The brief calls revive an ally action, implying in combat too. HP on revival, difficulty, AP cost and Shock's tier are all unset. Shock's tiers range up to "functionally useless in combat".
UF-18	Resolved 33a	33	**XP after a defeat is undecided** (brief). No defeat rule exists in the sheet at all.
US-17	Resolved 34a	34	The roll type for addiction is not stated; d100 fits a percent best. Most chems have no percent filled in. See Chapter 40.
UF-19	Unfinished	34	Survival mechanics exist only as statuses (Hunger, Thirst, Fatigue) and food, drink and sleep items. Nothing says how often they tick, or what drives them. Traits and perks reference them, for example New Gen Synth's "50% reduced survival mechanics" and Roughin It.
UF-20	Resolved 35a	35	**Human enemies have no gear.** All generic humans in the Enemies tab have blank weapons and armour, and the only populated rows are test rows and five named characters (four Powder Gangers and Sunny Smiles). The generation rule has to be written from scratch, and the sheet offers no way to judge it.
BG-11	Resolved 154a	35	**"Non-unique" cannot be checked.** The Master List tab (GLT) has a Unique? column, but every row is False, including one-offs such as The Terrible Shotgun and Annabelle. The faction loot columns (Raider, NCR, Legion, BoS and others) are entirely empty.
US-18	Unsure	35	"Raider Veteran" in the brief's example is not in the Enemies tab. There is Raider, Strong Raider and a generic Veteran. "Strong" variants differ from the base in XP and individually typed stats, with no stated rule.
UF-21	Unfinished	36	**Action XP tab:** four action labels (Lockpicking, Healing, Repair Broken Limb, Speech Check) with blank Type and blank XP Formula. The Roadmap says "Enemy XP done, Action XP WIP". The brief confirms it stays manual for now.
US-19	Resolved 36a	36	**Who gets enemy XP?** Not stated: the killer, everyone in full, or an even split. Arrogance ("x2 XP per kill") hints at a killer-based award, and the Loop's "XP given by enemies total" hints at a pool. Some traits award XP in other ways (Child At Heart: 15%, Sociopath: +5% for killing humans).

ID	Kind	Page	Item
US-20	Resolved 38a	36	Whether a level 1 character spends skill points at creation is unclear. Point columns begin at the Level 2 row, and starting skills come only from SPECIAL. Tagging therefore has no effect at level 1.
US-21	Unsure	36	The sheet has one level-perk slot per even level to 30, but the Level Perks tab has rows only to level 28 + "MAX". Traits reference "Skill Points per turn" (Ascetic, Gifted), likely meaning per level.
UX-15	Resolved 38a	38	**Backgrounds and specializations** appear in the brief's setup but nowhere in the workbook. They have no list or effects.
UX-16	Unexplained	38	**Barter's starting caps:** the table says "Caps x Barter level x2". Character 4, who tagged Barter, has Barter 10 and 20 caps on the sheet, which fits Barter × 2, but START HERE lists "10 Caps" for the same character. Caps are typed by hand, not computed.
BG-12	Bug	38	START HERE!AF2 repeats the first tag's loot three times ("Pipe Shotgun + 16 20 Gauge Shells" ×3) rather than listing each tag's loot. It's a broken text join. Item spelling in the table also doesn't match the item lists ("Circuity", "Torinuquet").
US-22	Resolved 38a	38	Whether a player may reroll the third trait is unstated. The trait Devout mentions a "VETO ROLL" that isn't otherwise defined. Traits that change creation (Gifted, Autistic's 3× tag, Obsessive Compulsive's 4th tag, Split Personalities' second SPECIAL) are noted in Chapter 24.
UX-17	Unexplained	40	Inventory and traits disagree in places. Character 1's sheet shows 20 buckshot where Starting Loot says 16. Character 2's tags include Medicine and Survival, and their inventory has Healing Powder and Bandage in smaller counts than the table lists. These are probably mid-campaign changes or errors, and can't be told apart.
UF-22	Unfinished	42	**Evolution conditions are mostly missing.** 95 of 100 traits have a blank Trigger column. 12 have no Fail condition. The Fail column is sometimes clearly the way into Repression, and sometimes looks like it may be a condition for Evolution, as the two are not labelled. Trait cards below print both as written.
UF-23	Unfinished	42	Evolutions with no name: Phineas Gage Syndrome, Traumatic Childhood, Tribal, Urbanite, Vengeful, Petulant Snob. Named evolutions with no bonus: Nightkin, Paranoid, Wembanyama, Whore, Lethargic, Peacock. Repressions: 62 named, of which 57 have no bonus and 54 have no description. 38 traits have no Repression.
UX-18	Unexplained	42	Traits refer to systems that do not exist yet: **Karma** (Cannibal, Child-Killer, The Masquerade), **Mental and Physical Status Resistance**, **VETO ROLL** (Devout), **Mood Rolls** (Bipolar, Erratic Mood Swings), **Super Far roll**, **Formal rating**, quests such as Storied Past and Vision Quest, and implants (Synths' "implant fail chance"). Roadmap Phase Two lists "Internalizations/mutations" and "NPC Interacting" as not started.
BG-13	Bug	42	**Names don't all line up.** The Stat Converter switches a trait on by looking its name up in Traits, so a name mismatch turns it off. "Got Out of Dodge" (Stat Converter) differs in capitalisation only (fine for the lookup), but variant rows such as "Bipolar (Good Phase)", "Whore (Laid)" and "The Masquerade (Day)" never match automatically and must be set by hand. 28 traits have no Stat Converter row under their exact name, and 42 evolutions have none at all.
US-23	Unsure	60	**How many perks you get is not stated.** Is one perk per threshold allowed, or the whole tree? The trait Autistic ("can choose two master perks") and evolution Well Rounded ("can pick second mastery in tag skills") imply normally only one Mastery. Money Talks refers to "a mastery in another category". The brief says the player chooses, and the DM adds it on the level-up screen.
UF-24	Unfinished	60	The tab's foot says "Delete/strikethru any of these that dont work (Cuz progression balance". Roadmap: "Mostly finished, needs testing and integration". Blank effects or parenthetical placeholders such as "(Rifle Style)" mark unwritten perks and are shaded below. Lived Experience has no Expertise or Mastery perks. Hand-style melee and some entries have missing names.
UX-19	Unexplained	60	A note beside Paralyzing Palm reads "?", and one beside Deep Cover reads "Add other branch for wildlife". Survival's tree is almost empty. Sneak perks refer to a base "Sneak Crit Bonus" that isn't defined.
UF-25	Unfinished	67	**131 of 234 perk slots are empty.** Blank slots by level: L6: 2, L8: 13, L10: 15, L12: 13, L14: 11, L16: 9, L18: 18, L20: 15, L22: 15, L24: 5, L26: 5, L28: 5, LMAX: 5. The Roadmap has Level Perks at Concept only. The sheet's levels run to 30, while this tab stops at 28 and "MAX". Only named perks are listed below.
BG-14	Bug	67	**Duplicate perk names.** Used twice in Level Perks with different effects: Opportune Strike, Last Stand, Unstoppable Force. Also used in both Level Perks and Skill Perks: Chemist, Computer Whiz, Hot Potato, Infiltrator, Sticky Fingers. Anything looked up by exact name, as the sheet does, will find only the first one.
UX-20	Unexplained	67	The Roll column is blank for every perk, so it is unclear whether perks were once rolled. Mysterious Stranger is a DM-rolled ally with no stat block.
UF-26	Unfinished	72	**Effects with no tiers at all:** Hologram Glare, Undignified (Lack of Pride), Sociable, Strengthened, Knocked Out, Flesh Craving, Gambler's High, Gambler's Slump, Clairvoyance, Shell Shocked, Fire Craving, Psychosis, Got Away With Lie, Flagelate, Mania, Hangover, Fixer, System Flushed, Immunity. **Marked WIP:** Drunk, Loose, Spun Out, Stimulated, Roid Rage, Roided, Narcotized, Painless, Blinded by Rage, Rage, Tranquilized, Sedated. The Roadmap says "Many Done, flesh out item based effects".

ID	Kind	Page	Item
UF-27	Unfinished	72	**How statuses get applied is undefined.** Durations are blank except where written into a tier. There is no chance-to-inflict rule, even though weapons list effects (Energy Weapons' Status Effect column; melee's Damage Over Time and DOT Chance/Lvl, the latter blank on nearly all rows). Perk Elementary "improves elemental chance rolls". The Combat Sheet has no status tracking at all: these are all applied by the DM.
UX-21	Unexplained	72	**Status resistance.** "Physical Eff Resist" and "Mental Eff Resist" appear in tiers and perks (Hardbody, Acclimation) with no definition, and the Stat Converter's Debuff Ch and Debuff Eff columns aren't read by any formula. Cloud Poison's note "Above this point you die" isn't explained.
US-24	Unsure	72	**Shock** has five tiers, up to "functionally useless", yet the revive rule just says "revived characters get Shock". Its tier may tie to Times Revived.
BG-15	Bug	77	**Active capacity disagrees with itself.** The total line uses 25% of carry (H2), and every item line's percentage uses 15% (H3 onward). The Encumbered tiers read H2, so 25% is what actually applies. Also, the Stat Converter tests strictly above 100%, while the display says 100% and up, so exactly 100% shows a penalty it does not apply.
US-25	Resolved 154a	77	**What Active means** isn't written. It is presumably gear on hand and reachable during combat, versus stowed in a pack. The Checklist lists "Player Active Inventory", the Action AP tab has an unpriced "Open Inventory", and Deep Pockets "improves active inventory by 5%". The natural question is what stowed items cost to reach.
UX-22	Unexplained	77	**Armour type percentages.** Armour types are labelled Light (20%), Clothing (20%), Medium (15%), Heavy (10%), Power (5%), with nothing reading them. They look like an active inventory share by armour class, which would also explain the stray 15% and 25% in the bug above. This is a guess.
UF-28	Unfinished	77	Many items have no weight: 224 of 289 armour pieces, 183 of 246 items, 82 of 111 Big Guns, 68 of 90 Energy Weapons and 53 of 74 Explosives. They all count as 0 lb today.
US-26	Unsure	78	The factors are computed but nothing uses them. The Roadmap has Barter/Caps at Concept only. As written, a starting character pays about 14× list price and sells for 7%, which looks extreme: a 50-cap gun costs over 700 caps. Check whether that's intended.
UF-29	Unfinished	78	No shop, haggling, or stolen-goods rules exist, though Barter perks depend on them. Stat Converter's Buy, Sell and Money Talks columns aren't read. Many Values are blank. Enemies' loot lists Caps only.
UX-23	Unexplained	78	Non-cap currencies exist as materials with no rule: Pre War Money, NCR Dogtag, BoS Holotag, Enclave Holotag. The trait New Vegas Legend mentions casino chips.
UF-30	Unfinished	79	**No crafting procedure exists.** Nothing says whether crafting needs a skill roll, how long it takes, or where stations are found. 177 recipes (all ammo and more) have no skill requirement, and 295 have no Level Req. 4 have no ingredients: Long Barrel, Shredder Barrels, Grenade Rifle Long Barrel, Added Rocket. Many list materials but no counts. The Roadmap says "most recipes accounted for".
BG-16	Bug	79	"Nitrogen" is a craftable with no matching item. The energy ammo is called Nitrogen Tank in Materials and Nitrogen on the weapon.
UF-31	Unfinished	79	Home Base has no rules beyond capacity: no location, no upgrades, no access rules, no shared party stash. The brief defers it to a later stage.
UF-32	Unfinished	80	**Looting Calculator tab:** a statement of intent only ("a way to generate a bunch of random loot, eventually able to input type and location"), with variables Level and Enemy Faction and nothing else. GLT's faction loot columns (Pre-War, Raider, Hospital, NCR, Legion, BoS, Enclave, Mutant and others) are entirely blank. The Roadmap has Looting at Concept. The brief keeps it manual.
BG-17	Bug	80	**Enemy caps became dates.** Ranges such as "5-15" and "10-20" auto-converted to calendar dates (May 15, Oct 20) in the Enemies tab. This book reads them back as ranges. Strong Legion Recruit's 50-100 also looks like a copy error beside Legion Recruit's 15-30. The Enemies Items column is empty on every row.
UF-33	Unfinished	81	Fully statted by tier: T1: 22/22; T2: 26/26; T3: 27/30; T4: 28/28; T5: 27/27; T6: 25/25. Missing: Homemade Marksman Rifle, Homemade Stealth Pistol, Homemade Rifle. Holdout flags (concealable) are in the sheet too, with H-75 and H-100 tied to the perks Ocean's 100 and Stuck it up Your Ass.
BG-18	Bug	81	Some Small Guns' ammo names have no match on the Ammo tab: ".308 Win" (21 guns; the Ammo tab has ".308 WIN", which still matches because lookups ignore case), ".45-70 Govt", "Nails" (Ammo tab: Nail), "Special". Five weapon names have a trailing space: Silenced .22 pistol, .357 Magnum revolver, Pedersen Device, Mysterious Magnum, and AER14 prototype in Energy Weapons.
UF-34	Unfinished	86	Roadmap: "Tier 1-2 IP". Fully statted by tier: T1: 12/12; T2: 16/17; T3: 0/23; T4: 0/21; T5: 0/19; T6: 0/19. Everything from Tier 3 up is a name and class only.
BG-19	Bug	86	Ammo name mismatches: ".50 Cal Ball" (Ammo tab: .50 Ball), "Railway Spikes" (Ammo tab: Railway Spike). The combat sheet checks these strings to tell if ammo fits. Also on the Roadmap: "MAKE MORE B-P, and P-B Weapons" and "Cap grenades at r6".
UF-35	Unfinished	89	Roadmap: "1-2 CHECK". Fully statted by tier: T1: 11/11; T2: 11/11; T3: 2/19; T4: 2/17; T5: 2/18; T6: 1/14.

ID	Kind	Page	Item
BG-20	Bug	89	"Fast Plama" is misspelled on 10 weapons, and the Stat Converter column says Fast Plasma. Ammo codes (MFC, EC, ECP, Fuel, Nitrogen) don't match Materials' full names (Microfusion Cell, Energy Cell, Electron Charge Pack, Flamer Fuel, Nitrogen Tank), or the Ammo tab, except 2mm EC. The starting loot says "Flamer Fuel". "Acid", "Crank", "Alien Cell" and "Rocket + 50 ECP" have no item at all.
BG-21	Bug	92	**All 74 explosives have no type code in the master list.** GLT's TC Code formula looks explosives up in column D (Value) rather than E (name), so TC comes back blank. The Combat Sheet routes each weapon by this code, so its skill, hit and damage lookups don't reach the explosive branch.
UF-36	Unfinished	92	Roadmap: "(CHECK) 1-2 done". Damage filled by tier: T1: 11/11; T2: 10/10; T3: 5/21; T4: 7/14; T5: 5/9; T6: 6/9. There are no rules for blast radius, damage falloff, friendly fire, fuze delay, mine placement, or blowback. Thrown weapons should use the STR rule, but the formula's thrown branch is missing (see melee bug). Ammo mismatches: 40mm G, 25mm G (Ammo tab: 40mm Shell, 25mm Shell), Guided Missile, Mini-Nuke, Flare and Cannonball have no ammo rows.
CF-11	Conflict	92	Launchers use two damage sources. The formula reads Damage and PEN off the weapon. The Ammo tab also holds 25 Explosive Projectile loads with their own damage and Pen (Rocket, Missile, 25mm, 40mm), which the explosive branch ignores. Dynamite and Flare also share the same "Fire on direct hit" text, which looks copy-pasted.
UF-37	Unfinished	95	Roadmap: "Rebalancing". Damage filled by tier: T1: 20/20; T2: 24/24; T3: 28/33; T4: 27/27; T5: 6/20; T6: 0/15. Tier 5 and 6 are mostly names. STR requirement is blank on 137 of 139 player weapons. DOT Chance is blank on 211 of 217 rows. Basic Fighting is in the player-weapon list as the default second slot.
UF-38	Unfinished	101	Blank damage or Pen: .44 Magnum - Mysterious, 2mm EC - Junk, 2mm EC - Standard, 20 Gauge - Magnum Buck, 20 Gauge - 3/0 Magnum, Bolt - Tripwire Backed.
UX-24	Unexplained	101	**Text damage** "AxB" (pellets × damage, presumably): .22 LR - Rat Shot, .357 Magnum - Snakeshot, 20 Gauge - Junk, 20 Gauge - 00 Buckshot, 20 Gauge - Birdshot, 20 Gauge - Dragons Breath, 20 Gauge - BOLO, 12 Gauge - Junk, 12 Gauge - Buckshot, 12 Gauge - 00 Buckshot, 12 Gauge - Magnum Buck, 12 Gauge - Magnum 00 Buck, 12 Gauge - Dragon's Breath, 12 Gauge - BOLO, 4 Gauge - Junk, 4 Gauge - Buckshot, 4 Gauge - 00 Buckshot, 4 Gauge - Dragon's Breath, Missile - Canister Shot, Rocket - Canister Shot, 25mm Shell - Dragon's Breath. See Chapter 9. The **D/2 and P/2** columns (half damage, half Pen) feed nothing. The Note column uses "acc/2", "anti-robot", "X5 to robots, PA" and "Knocks down on crit", and no formula reads them. Ammo's Cap column is blank.
BG-22	Bug	101	Inconsistent names: calibers "5.56mm" and "5.56mm NATO" both exist. The load "Dragon's Breath" and "Dragons Breath" both exist, and "Hollow" sits beside "Hollow Point", "HP" beside them, ",+P+" has a stray comma, "AP" and "Armor Piercing" both exist.
UF-39	Unfinished	106	Effect blank on: Alloy Frame, Muzzle Break, Recon Scope, Short Range Scope, Adjustable Stock, Marksman's Stock, Pistol Added Stock, Recoil Compensating Stock, Short Stock. Tier blank on 83 of 93. Weight, value and required skill level are almost entirely blank. Nothing says how many mods a weapon can hold or how a mod attaches. Most of the Stat Converter's mod effects depend on Variable columns the sheet doesn't apply. Mods are never tied to a specific weapon: a mod marked Active in a character's inventory applies to whatever they fire.
UF-40	Unfinished	109	Roadmap: "Head options for 2-6, finish and add more accessories". Weight blank on 224 of 289. Value blank on 285. 54 accessories have no buff, nerf or mechanic. Many accessories are themed by weapon type in their name, such as "Spirit of Juba Keffiyeh (DMR)", with effects not written. Armour buffs in text are not automatic.
UX-25	Unexplained	109	Tier 666 rows are outside the normal scale (test or special). Power armor's use rules (training, power, frame) don't exist, even though traits like Bad Leg ("effects removed with Power Armor") rely on it. Faction armor's effect is only in Ghost and Devil in a New Dress.
UF-41	Unfinished	118	Roadmap: "Healing Items sort of done". **59 of 246 items have no effect**, including most drinks: Atomic Cocktail, Battle Brew, Green Lady Absinthe, New World Wine, Nukashine, Old Possum, Rum & Nuka, Scotch, Sierra Madre Martini, Vodka, Wasteland Tequila, Whiskey, Ant Nectar, Ant Queen Pheremones, Cannabis (Loud), Fire Ant Nectar, Molly, Quaalude, and 41 more. Status effects for chems are marked WIP. Literature's skill gains: Bookworm mentions books and magazines, but the amounts vary.
BG-23	Bug	118	**Duplicate item names** in Items, which the sheet looks up by exact name, so the second copy is unreachable: Mentats, Party Time Mentats, Antivenom, Burn Balm, Firey Purgative, Hemostatic Injector, Military Bandage, Snakebite Tourniquet, Radaway, Splint.
US-27	Unsure	118	Duration and After Time have no unit. Beer shows 24 and 12. Hours fits a day, turns fits the Loop's example. The Tier columns beside Initial Effect, After Effect and Withdrawal are mostly blank, and presumably mean the status tier applied.
UF-42	Unfinished	139	Roadmap: Human Enemies "Flesh out campaign specific". Non-human stats marked CHECK. Blank: Assaultron stats and XP; Displaced Resident; XP on the first named Goodsprings and Powder Gang characters. Faction is filled on only 5 rows. Notes and Items are empty on all rows. No mob has a Saving value.
BG-24	Bug	139	Broken links: enemy weapon "Assaultron Arm" doesn't exist, and armor "Prison Body Armor" doesn't exist (the item is Prison Guard Body Armor). Testy Tessie's DT shows #N/A as a result. "Agamemnon" uses "Hailberd" and "Counting (Kirk)": hand-picked for a test.

ID	Kind	Page	Item
UX-26	Unexplained	139	XP values show an apparent ceiling at 50: everything from Deathclaw Baby (T3) to Legendary Deathclaw (T6, 300 HP) gives 50 XP, which looks like a placeholder. Supermutants are typed Human. "Strong PA Recruit" sits beside PA Initiate, a likely naming slip. Some stats are odd: Giant Rat Pup has more HP than Giant Rat; Radscorpion Queen has DT 0; Civilian Eyebot has more HP than Military Eyebot.
UF-43	Unfinished	140	Generic human templates only fill in their weapon skills (Energy Weapons, Small Guns, Big Guns, Melee). Every other skill is blank, which breaks any check against an NPC's Speech, Sneak or Survival. It also means their saving throw is computed from Survival 0.
BG-25	Bug	155	The headers "1/2" and "3/4" auto-converted to dates (Jan 2 and Mar 4) in the sheet.

45. Open Items Register: changes

Changes since the bible was compiled, oldest first. Where this page and pages 147-154 disagree, this page is current.

Left for the DM

CHANGED 8 NOV 2026 These effects stay as written reminders, because they need a judgment call, a story decision or something the game doesn't track, such as NPC reactions, crafting, romance, or what resisting a status means.

Statuses (19)

Name	Note
Hologram Glare	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Undignified (Lack of Pride)	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Sociable	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Strengthened	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Knocked Out	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Flesh Craving	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Gambler's High	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Gambler's Slump	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Clairvoyance	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Shell Shocked	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Fire Craving	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Psychosis	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Got Away With Lie	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Flagelate	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Mania	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Hangover	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Fixer	Blank in the workbook, so it has no numbers. It can still be applied and removed.
System Flushed	Blank in the workbook, so it has no numbers. It can still be applied and removed.
Immunity	Blank in the workbook, so it has no numbers. It can still be applied and removed.

Consumables (14)

Name	Note
Ant Nectar	No effect written in the workbook, so nothing was changed.
Ant Queen Pheremones	No effect written in the workbook, so nothing was changed.
Fire Ant Nectar	No effect written in the workbook, so nothing was changed.
Rushing Water	No effect written in the workbook, so nothing was changed.
Special Glowing Mushrooms	No effect written in the workbook, so nothing was changed.
Frostbite Kit	No effect written in the workbook, so nothing was changed.
Datura Hide	No effect written in the workbook, so nothing was changed.
Armor Repair Kit	Text only, needs the DM: "Improves Armor Con by Rep/20"
Strength Implant	Text only, needs the DM: "+1 Strength"
Perception Implant	Text only, needs the DM: "+1 Perception"
Endurance Implant	Text only, needs the DM: "+1 Endurance"
Charisma Implant	Text only, needs the DM: "+1 Charisma"
Intelligence Implant	Text only, needs the DM: "+1 Intelligence"
Agility Implant	Text only, needs the DM: "+1 Agility"

Level perks (36)

Name	Note
Bookworm	For the DM: "Increases Skill Gained from books by 1, magazines by 5"
Sticky Fingers	For the DM: "Can roll to steal objects in world"
Pipe Weaponsmith	For the DM: "Can craft pipe weapons"
Field Remedy	For the DM: "Can craft a Numbing Salve"
Forgettable Face	For the DM: "NPCs will treat you neutrally more often"
Trustworthy	For the DM: "Critical success on speech checks yield the entire party (XP of check) x 2 and a"
One Man's Trash...	For the DM: "Improves odds of looting Crafting Materials +5%"
Mysterious Stranger	For the DM: "DM rolls secret d20, in that amount of turns mysterious stranger appears and sup"
Intense Training	For the DM: "Gain 1 SPECIAL of Choice"
Breakdown	For the DM: "Can break down looted weapons into useful parts"
Old World Blues	For the DM: "Can craft the Rudimentary Third Arm Accessory"
Double or Nothing	For the DM: "Can reroll a failed speech check at half odds"
Scrounger	For the DM: "Increases odds (Not Count) of finding ammo in buildings by 50%"
...and Carry a Long Stick	For the DM: "Intimidation Checks use greatest weapon skill"
Fame	For the DM: "You have become famous in civilized society"
Junk Rounds	For the DM: "Craft Junk ammunition from Scrap Metal, Tin Cans and the appropriate casing"
Sicilia Con Furore	For the DM: "Can roll (Melee/100) to block hand attacks"
Looksmaxxing	For the DM: "Can Mog roll (STR+CHA out of 20) certain speech checks"
Percussive Maintinence	For the DM: "Can Strength roll locks and terminals"
Counterattack	For the DM: "Upon crit by enemy melee/unarmed, you may immediately roll a counter attack duri"
Turnaround	For the DM: "Can counter roll a physical status effect inflicted at same odds, if passed no e"
The Look	For the DM: "Will be prompted whenever a Romance roll is possible for any party member"
Lead Your Shots	For the DM: "If an enemy you have targeted moves, roll the next turn from the higher range"
Master Lover	For the DM: "Sleeping with charachtewrs may yeild for favorable results"
Sowwy	For the DM: "Can roll (CHA+LCK/20) to "undo" Speech failures"
Fat Roll	For the DM: "Can roll (AGI+LCK/20) to fat roll away from an explosive"
Devil in a New Dress	For the DM: "Much higher likelihood to pass with faction armor"
Mr. Sandman	For the DM: "Silently kill any sleeping person"
Them's Good Eatin'	For the DM: "Living creatures have a 50% chance of having Thin Red Paste or Blood Sausage whe"
Meltdown	For the DM: "Enemies Killed have a chance to Explode into a corona, which can chain to other "
Infiltrator	For the DM: "Gives you a second attempt at a lock that you previously broke while trying to f"
Hand Loader	For the DM: "Twice as likely to recover ammunition cases"
Computer Whiz	For the DM: "Another attempt to hack any locked computer"
Nuka Chemist	For the DM: "Unlock special Nuka-Cola recipes at the workbench"
Hot Potato	For the DM: "When using explosives at R1 instantly jump two hexes out of the way"
Roughin It	For the DM: "Can sleep anywhere with no debuffs"

Skill perks (4)

Name	Note
Computer Whiz	For the DM: "Hacking"

Name	Note
Mad Scientist	For the DM: "Science Speech"
IT Support	For the DM: "Hacking"
Camoflauge	For the DM: "Roll to disappear"

Weapon mods (5)

Name	Note
Beam Splitter	For the DM: "Multi Beam"
Plasma Splitter	For the DM: "Multi Proj"
Zeroing	For the DM: "Variable"
Silencer	For the DM: "Before Combat"
Variable Range Scope	For the DM: "Player Chooses Range in CS (costs 1AP)"

Accessories (3)

Name	Note
Eyeglasses	For the DM: "Corrects Eyesight"
Sunglasses	For the DM: "Indoor (Concept WIP)"
Wedding Ring	For the DM: "Romance Speech Nerf"

Traits (21)

Name	Note
Nightkin	For the DM: "Addicted to Stealth Boys"
NATIONAL LOYALTY	For the DM: "IF Loyalty fulfilled"
Nearly Paralyzed	For the DM: "Double durability on legs, crippled chest immobilizes"
PTSD	For the DM: "Loud Noise inflict Afraid"
Split Personalities	For the DM: "TWO SPECIALS"
Around the Block	For the DM: "You will always find an old acquaintances in cities, some even able to"
Bipolar	For the DM: "Good Phase: +1 CHA, +1 INT, +10 Speech"
Bloody Mess	For the DM: "Bloody mess roll after critical hits below 25% enemy HP"
Cannibal	For the DM: "Can eat human flesh for (Benefit) and negative karma"
Child-Killer	For the DM: "Can kill children without debuffs"
Erratic Mood Swings	For the DM: "Good Roll: +2 CHA, +2 INT, +10 Speech, +5% XP gain"
Gambling Addict	For the DM: "Wins incur +1 CHA, +10 Barter, Max Gambler's high, and immunity to add"
God-Gifted	For the DM: "Improved rolls from romance/seduction, people who like you LIKE you"
Murphy's Son/Daughter/Child	For the DM: "Clarivoyance can be activated when consuming a cocktail of chems"
Party Animal	For the DM: "15+ Speech with Addicted charachters"
Secret Societies	For the DM: "Every faction has a sleeper member of your organization, start with sl"
Smoker	For the DM: "Start with 2 Packs of smoke of choice and 2 lighters"
Strict Religious RItes	For the DM: "Prayer gives +1 Luck +1 END +5 Chance to hit"
The Masquerade	For the DM: "Can drink human blood for +10 HP and negative karma, +20 Sneak, +1 SPE"
Whore	For the DM: "20+ Speech with romance options, +2 LCK and +2 AGI post coitus (x turn"
Golden Blood	For the DM: "Donating blood x10 Caps, your drawn blood +50% healing on others, norm"

Trait evolutions (4)

Name	Note
Twitchy	For the DM: "when enemy crit fail start turn"
Creative Strategist (Partywide)	For the DM: "only for movement"
Reinforced Spine	For the DM: "chest cannot cripple"
Expat	For the DM: "Weapon Match"

Weapon mods, text only (1)

Name	Note
Advanvced Calibration	Text only: "Chance to hit +5"

Where the register stands

CHANGED 12 NOV 2026 Was: each item marked only where a dated change settled it. Now: one list of everything still open, sorted by who acts on it. 132 items in all; 24 were settled before today, 11 today (UF-04 in chapter 9, the rest here), 97 are still open. Resolves BG-01, BG-11, CF-03, CF-04, CF-05, CF-06, US-05, US-25, UX-09, UX-10.

Settled by how the app already works. These now read RESOLVED.

Item	How it's settled
BG-01	The app's melee STR penalty works when it is switched on (strMelee); it is 0 for now.
BG-11	140 named weapons are flagged unique (10 Nov, chapter 29).
CF-03	No PER or STR penalties for now (perPenalty, strGun, strMelee 0; chapter 8). The app has both formulas if wanted.
CF-04	Crit is the weapon's % straight, as the brief says (critMode 'weapon'). The sheet's version is a Settings choice.
CF-05	Jam is the weapon's % straight, as the brief says (jamMode 'weapon'). The sheet's version is a Settings choice.
CF-06	Cover is read from the map for every shot (8 Nov), layered since 11 Nov. The checkbox and the action are gone.
US-05	Bands are read as whole dice faces, rounding the line up (82.5 means 83 and over).
US-25	Active means worn armor, held weapons and anything ticked Active; its limit is 65% of Carry (11 Nov, chapter 28).
UX-09	Super Crit Roll and Super Fail Roll widen the super crit and jam bands by that many dice faces.
UX-10	Crit D, Crit Mult, Super Crit Mult, Head Mult and Limb Mult are read by the attack math.

Partly settled by the app. Still open for the part named.

Item	What's settled, what's left
BG-07	The app reads weapon-type conditions itself, so this sheet bug does not touch it. Worth a check per perk.
BG-08	The app reads every situation row; the sheet's cut-off does not apply.
BG-09	The app looks crit modifiers up by name; the sheet's fixed rows do not apply.
BG-17	The app reads enemy caps as ranges and undoes Excel dates on import.
UF-17	A downed character makes a saving throw at the end of each round. What a pass does beyond staying alive is still open.
UF-21	Skill checks pay XP (10 Nov). The Action XP tab's own rows are still blank.
UF-27	Crits, grenades and knives now apply statuses. There is still no general chance-to-inflict rule.
UF-29	Vendors, stock and buy/sell prices exist (chapter 29). Haggling and stolen goods do not.
UF-32	Looting is rolled per body from the best looter's Survival and Luck (10 Nov, chapter 19).
US-26	Vendor prices now use Barter against the vendor's barter level (chapter 29).
UX-22	Armor type now sets the damage floor (40/30/20/10/5%), close to these labels.

Rules to decide. The book or the brief leaves these open; the app either skips them or uses the reading named in the item's chapter.

Item	Kind	Summary
CF-01	Conflict	AP.

Item	Kind	Summary
CF-02	Conflict	DT slots.
CF-07	Conflict	"Plains" does not exist.
CF-08	Conflict	Darkness.
CF-09	Conflict	CS Worksheet says a KO character is eliminated from initiative.
CF-10	Conflict	Revive penalty is missing from the formula.
CF-11	Conflict	Launchers use two damage sources.
UF-02	Unfinished	Roadmap note: "Rebalance Chance to Hit with new DC" (assigned to .
UF-05	Unfinished	Roadmap ideas not yet rules: "Snap shot (roughly 1.5) for high roll" (the perk Spec Ops mentions a "cost to snapshoot"), "Some sort of Piercing shot w
UF-06	Unfinished	Roadmap: "(REBALANCING) Buff DT and Pen on par with projectiles" for melee.
UF-11	Unfinished	Sneak attack benefits have no base rule.
UF-13	Unfinished	Enemy flee checks have no rule ("Raider 3 rolls a Flee check and succeeds").
UF-15	Unfinished	Weapon Condition sits on the sheet as a 1-10 value (usually 10) that worsens jam chance.
UF-19	Unfinished	Survival mechanics exist only as statuses (Hunger, Thirst, Fatigue) and food, drink and sleep items.
UF-26	Unfinished	Effects with no tiers at all: Hologram Glare, Undignified (Lack of Pride), Sociable, Strengthened, Knocked Out, Flesh Craving, Gambler's High, Gambler
UF-30	Unfinished	No crafting procedure exists.
UF-31	Unfinished	Home Base has no rules beyond capacity: no location, no upgrades, no access rules, no shared party stash.
US-01	Unsure	The brief names the file Fallout_Spreadsheet.xlsx, but the only workbook in the folder is Fallout Spreadsheet(4).xlsx.
US-02	Unsure	The checklist calls for AP tokens, and the Gameplay Loop has players hand them in.
US-03	Unsure	No maximum SPECIAL is enforced.
US-11	Unsure	CS Worksheet lists "heal" and "use item" as separate moves, and Wield or Unjam have no cost.
US-13	Unsure	The sneak formula is ambiguous.
US-14	Unsure	Time units.
US-15	Unsure	Roll direction is not stated.
US-16	Unsure	The Loop's revive example happens post-combat, but it also says the character "returns to the fight".
US-18	Unsure	"Raider Veteran" in the brief's example is not in the Enemies tab.
US-21	Unsure	The sheet has one level-perk slot per even level to 30, but the Level Perks tab has rows only to level 28 + "MAX".
US-23	Unsure	How many perks you get is not stated.
US-24	Unsure	Shock has five tiers, up to "functionally useless", yet the revive rule just says "revived characters get Shock".
US-27	Unsure	Duration and After Time have no unit.
UX-01	Unexplained	The checklist includes a Deck of Cards for gambling, but no gambling rules exist anywhere in the workbook.
UX-02	Unexplained	Gen Info lists effects with no mechanic behind them: Perception "Random Encounter, More Visual Info"; Endurance "Survival Mechanics, Fatigue, Mental H
UX-03	Unexplained	Gen Info gives Small Guns as "up to .308" and Big Guns as "above .308 and heavy guns".
UX-04	Unexplained	Several traits refer to skills that are not on the sheet: Unarmed (One Punch Man: "Unarmed 75"), Shotguns (Country Boy/Girl: "10+ shotguns") and Hand
UX-05	Unexplained	Gen Info keeps an old carry formula beside the new one: "was: 120 LB + (END x 10)".
UX-06	Unexplained	Some perks express checks as percentages, such as "Speech checks towards lies are +10% easier" and "Lockpick success chance +10%".

Item	Kind	Summary
UX-07	Unexplained	Several perks use their own roll formulas: Sicilia Con Furore (Melee÷100), Looksmaxxing (STR+CHA out of 20), Sowwy and Fat Roll (two SPECIAL÷20).
UX-08	Unexplained	Enemy attackers only read the player target's Enemy Acc column.
UX-12	Unexplained	Thunderstorm gives +25 Sneak and Heatwave −50% AP (a harsh value worth a look).
UX-13	Unexplained	NPC targeting has no rule, which seems intentional.
UX-14	Unexplained	The Combat Sheet has a Bloody Mess flag and a "Hit EN" counter, a Split flag and a UN Kill counter.
UX-16	Unexplained	Barter's starting caps: the table says "Caps x Barter level x2".
UX-18	Unexplained	Traits refer to systems that do not exist yet: Karma (Cannibal, Child-Killer, The Masquerade), Mental and Physical Status Resistance, VETO ROLL (Devou
UX-20	Unexplained	The Roll column is blank for every perk, so it is unclear whether perks were once rolled.
UX-21	Unexplained	Status resistance.
UX-24	Unexplained	Text damage "AxB" (pellets × damage, presumably): .22 LR - Rat Shot, .357 Magnum - Snakeshot, 20 Gauge - Junk, 20 Gauge - 00 Buckshot, 20 Gauge - Bird

Workbook data to fill or fix. Blank rows, mismatched names and sheet-only formula bugs. The app works around most of them; filling them in removes the workaround.

Item	Kind	Summary
BG-04	Bug	Circular cell.
BG-05	Bug	Melee secondary Hit% is ignored.
BG-06	Bug	Minor: on weapon slot 2, Combat Sheet!K35 tests R17="02" (slot 1's weapon) where it should test R25.
BG-10	Bug	Cap (known).
BG-12	Bug	START HERE!AF2 repeats the first tag's loot three times ("Pipe Shotgun + 16 20 Gauge Shells" ×3) rather than listing each tag's loot.
BG-13	Bug	Names don't all line up.
BG-14	Bug	Duplicate perk names.
BG-15	Bug	Active capacity disagrees with itself.
BG-16	Bug	"Nitrogen" is a craftable with no matching item.
BG-18	Bug	Some Small Guns' ammo names have no match on the Ammo tab: ".308 Win" (21 guns; the Ammo tab has ".308 WIN", which still matches because lookups ignor
BG-19	Bug	Ammo name mismatches: ".50 Cal Ball" (Ammo tab: .50 Ball), "Railway Spikes" (Ammo tab: Railway Spike).
BG-20	Bug	"Fast Plama" is misspelled on 10 weapons, and the Stat Converter column says Fast Plasma.
BG-21	Bug	All 74 explosives have no type code in the master list.
BG-22	Bug	Inconsistent names: calibers "5.56mm" and "5.56mm NATO" both exist.
BG-23	Bug	Duplicate item names in Items, which the sheet looks up by exact name, so the second copy is unreachable: Mentats, Party Time Mentats, Antivenom, Burn
BG-24	Bug	Broken links: enemy weapon "Assaultron Arm" doesn't exist, and armor "Prison Body Armor" doesn't exist (the item is Prison Guard Body Armor).
BG-25	Bug	The headers "1/2" and "3/4" auto-converted to dates (Jan 2 and Mar 4) in the sheet..
UF-09	Unfinished	Only 16 of 487 rows are marked Done.
UF-10	Unfinished	37 of 45 situations have no modifier.
UF-22	Unfinished	Evolution conditions are mostly missing.
UF-23	Unfinished	Evolutions with no name: Phineas Gage Syndrome, Traumatic Childhood, Tribal, Urbanite, Vengeful, Petulant Snob.
UF-24	Unfinished	The tab's foot says "Delete/strikethru any of these that dont work (Cuz progression balance".
UF-25	Unfinished	131 of 234 perk slots are empty.

Item	Kind	Summary
UF-28	Unfinished	Many items have no weight: 224 of 289 armour pieces, 183 of 246 items, 82 of 111 Big Guns, 68 of 90 Energy Weapons and 53 of 74 Explosives.
UF-33	Unfinished	Fully statted by tier: T1: 22/22; T2: 26/26; T3: 27/30; T4: 28/28; T5: 27/27; T6: 25/25.
UF-34	Unfinished	Roadmap: "Tier 1-2 IP".
UF-35	Unfinished	Roadmap: "1-2 CHECK".
UF-36	Unfinished	Roadmap: "(CHECK) 1-2 done".
UF-37	Unfinished	Roadmap: "Rebalancing".
UF-38	Unfinished	Blank damage or Pen: .44 Magnum - Mysterious, 2mm EC - Junk, 2mm EC - Standard, 20 Gauge - Magnum Buck, 20 Gauge - 3/0 Magnum, Bolt - Tripwire Backed.
UF-39	Unfinished	Effect blank on: Alloy Frame, Muzzle Break, Recon Scope, Short Range Scope, Adjustable Stock, Marksman's Stock, Pistol Added Stock, Recoil Compensatin
UF-40	Unfinished	Roadmap: "Head options for 2-6, finish and add more accessories".
UF-41	Unfinished	Roadmap: "Healing Items sort of done".
UF-42	Unfinished	Roadmap: Human Enemies "Flesh out campaign specific".
UF-43	Unfinished	Generic human templates only fill in their weapon skills (Energy Weapons, Small Guns, Big Guns, Melee).
UX-17	Unexplained	Inventory and traits disagree in places.
UX-19	Unexplained	A note beside Paralyzing Palm reads "?", and one beside Deep Cover reads "Add other branch for wildlife".
UX-23	Unexplained	Non-cap currencies exist as materials with no rule: Pre War Money, NCR Dogtag, BoS Holotag, Enclave Holotag.
UX-25	Unexplained	Tier 666 rows are outside the normal scale (test or special).
UX-26	Unexplained	XP values show an apparent ceiling at 50: everything from Deathclaw Baby (T3) to Legendary Deathclaw (T6, 300 HP) gives 50 XP, which looks like a plac

46. Roadmap and Future Ideas

From the Roadmap tab. Progress columns are Concept, 1/2, 3/4, Full (Beta), Done.

> **BUG BG-25** The headers "1/2" and "3/4" auto-converted to dates (Jan 2 and Mar 4) in the sheet.

System	Lead	Con	1/2	3/4	Beta	Done	Note
Combat Calc	CHECK	●	●	●	●	○	—
Ammo	CHECK	●	●	●	●	○	—
Non Human Enemy Stats	CHECK	●	●	●	●	○	—
Human Enemies	Lead 2	●	●	○	○	○	FLesh out campaign specific
Armor	—	●	●	○	○	○	Head options for 2-6, finish and add more accessories
Items	—	●	●	○	○	○	Healing Items sort of done
Small Guns	Lead 1	●	●	●	●	○	Tier 1-6 done
Big Guns	Lead 1	●	●	○	○	○	Tier 1-2 IP
Energy Weapons	Lead 3	●	●	○	○	○	1-2 CHECK,
Melee Weapons	—	●	●	●	○	○	(REBALANCING) Buff DT and Pen on par with projectiles
Explosives	—	●	●	○	○	○	(CHECK) 1-2 done
Status Effects	Lead 1	●	●	●	○	○	Many Done, flesh out item based effects
Sneaking	Lead 2	●	●	●	○	○	Process in Gameplay Loop, Need to Review
Skill Perks	—	●	●	○	○	○	Mostly finished, needs testing and integration into relevant calculations
Level Perks	—	●	○	○	○	○	—
Weight	—	●	●	○	○	○	—
XP	—	●	●	○	○	○	Enemy XP done, Action XP WIP
Barter/Caps	—	●	○	○	○	○	—
Looting	—	●	○	○	○	○	Flesh out how we loot, what's given. PRESENT: Roll d20, Consult table to right
Crafting	Lead 1	●	●	●	○	○	most recipes accounted for and crafting items created

Lead CHECK means the sheet asks for a review. Fixes in progress: Positive/Negative Effects (Lead 1); Melee Damage, Pen, Hit (Lead 2): "Rebalance Chance to Hit with new DC". No system is marked Done.

Phase Two: not started

Looting Generator, Env. Interacting, NPC Interacting, OoC Time, Internalizations/mutations, Targeted Limbs, Location Variance. Phase 3 is titled "Take the Next Step...".

Future ideas (from the Roadmap)

- What happens after saving throw
- Snap shot (roughly 1.5) for high roll
- Survival roll for animal butcher
- Each player rolls Survival roll for loot ?
- Perk Idea: Suppression - spend extra AP in shot to "suppress" enemy, if they fire or move, player rolls for hit
- Some sort of Piercing shot with AMR/GAUSS ?
- Cap grenades at r6
- Make sheet just for stat changes over time (outside of base stats)

- MAKE MORE B-P, and P-B Weapons

47. Workbook Map

Every tab, and where its contents appear in this book.

Tab	Holds	In this book
Roadmap	Project status and ideas	Ch. 46, 31
START HERE	Character creation inputs	Ch. 22, 23
Starting Loot	Loot by tag	Ch. 22
Player Sheets	Derived stats, levels, perks slots	Ch. 6, 21, 23
Inventory	Per-character inventory, encumbrance	Ch. 23, 28
Combat Sheet	Live hit, bands, damage, initiative, range	Ch. 8-13, 16
Home Base	Per-character stash	Ch. 30
XP Count	XP log	Ch. 21
Rough Gameplay Loop	The loop, DM's checks	Ch. 15
DM Session Checklist	Table kit	Ch. 3
Gen Info	SPECIAL, skills, derived stats, misc. rules	Ch. 4-12
Enemies	Enemy templates	Ch. 43
Stat Converter	Modifier matrix	Ch. 13, plus per-item text
Action XP, Action AP	Stubs	Ch. 11, 21
Traits	100 traits, evolutions, repressions	Ch. 24
Skill Perks, Level Perks	Perk lists	Ch. 25, 26
GLT	Master item list, type codes, faction loot flags	Ch. 20, 29, 31, 35
Small Guns, Big Guns, Energy Weapons, Explosives, Melee Weapons	Weapons	Ch. 32-36
Armor	Armour, clothing, accessories	Ch. 39
Ammo	Ammo	Ch. 37
Weapon Mods	Mods	Ch. 38
Items	Consumables, tools	Ch. 40
Materials	Crafting materials	Ch. 41
Crafting Recipes	Recipes	Ch. 30, 42
Status Effects	Statuses	Ch. 27
Looting Calculator	Stub	Ch. 31
Lists	Helper list of weapon names for dropdowns	Not reproduced
CS Worksheet	Design notes, test calculator	Ch. 8, 9, 12, 18
Mobs (OLD), (deprecated)Armor, (deprecated) DAMAGE CALCULATOR	Obsolete	Excluded
(DO NOT LOOK) FIRST Q	Not opened	Excluded

47. Workbook Map: changes

Changes since the bible was compiled, oldest first. Where this page and page 157 disagree, this page is current.

Save packs

CHANGED 8 NOV 2026 New.

Save pack makes a .zip with campaign.json, rules.json and every table as tables/*.csv. Open it, edit it, zip it back and use **Load pack**. Keep it a .zip: WinRAR can save as zip, but browsers can't open .rar files. Change a written effect and the app reads it again on load, or change the fx and use columns to set the variables yourself.

Saving to a file

CHANGED 9 NOV 2026 Was: Save wrote to the browser only. Now: Save asks where.

- Save to the file you last saved to or loaded, to a new location, or download a copy. The session remembers the file, and loading a save remembers its path.
- On phones and tablets, Save opens the share sheet so the file can go to Files, or downloads a copy.
